

## Benefits

- Cloud-based, secure data management with on-machine status and performance display
- HMI Dashboard local and remotely accessible
- Operator linked to Job and product
- Live OEE, status and counts
- Slow running indication
- Downtime planned and unplanned detail
- Customisable HMI Dashboards

## Features

- 10.9" Touch Screen
- Secure Kiosk mode
- Wake on human detection
- Secure lockable VESA mount enclosure

## Benefits

### Real-Time Monitoring:

Operators, supervisors, and managers can instantly view machine statuses, allowing them to detect issues early and keep production on track.

### Optimized Efficiency:

By monitoring downtime and performance as it happens, teams can quickly resolve inefficiencies and implement immediate corrective measures.

### Enhanced Collaboration:

Shared access to machine data improves communication between operators and management, facilitating quicker decisions and more effective actions.

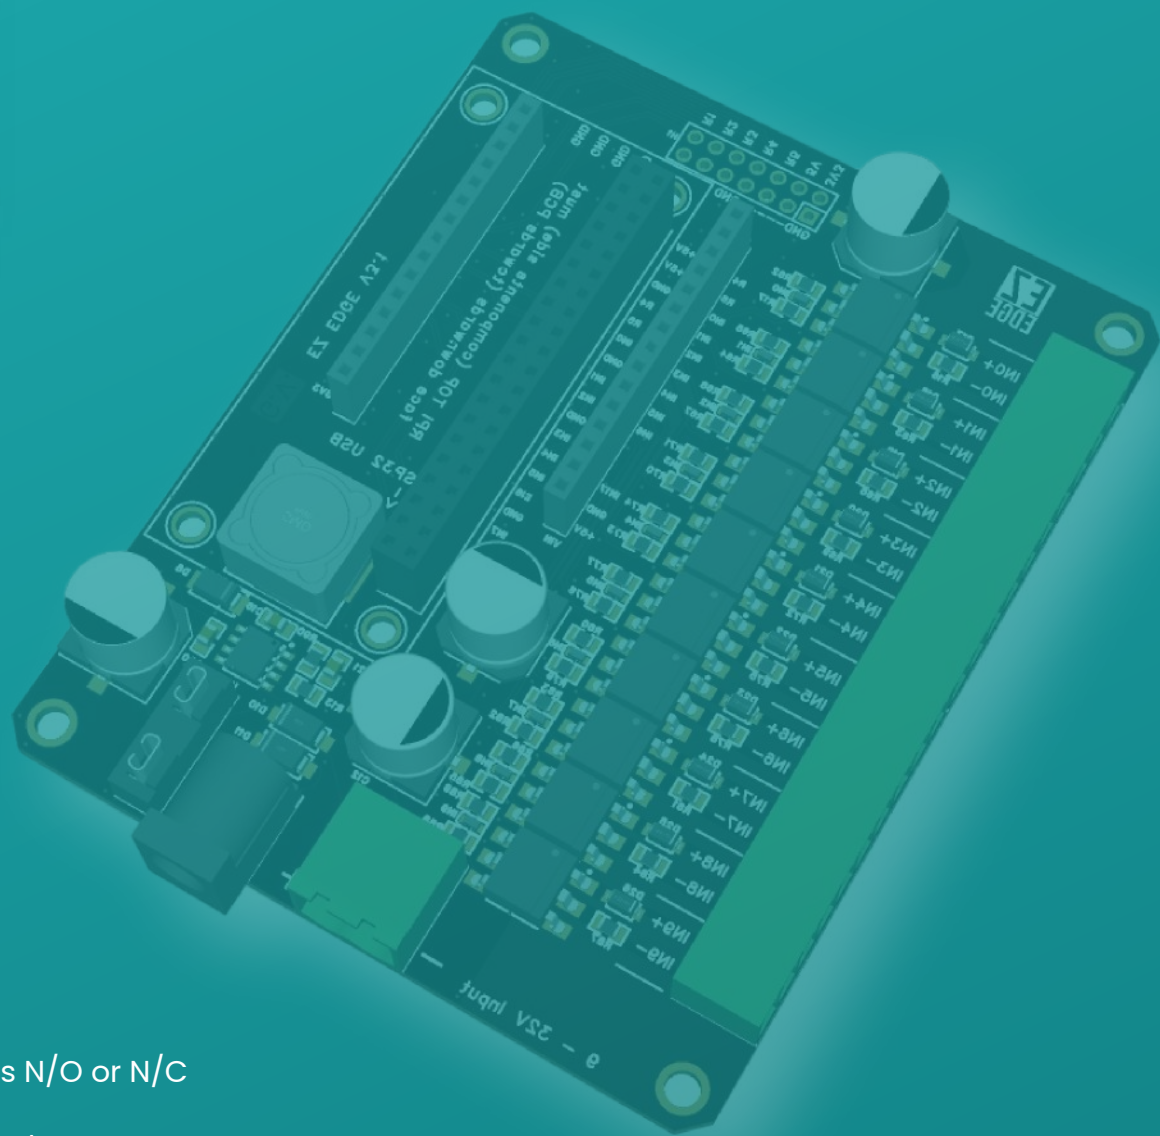

### Insight-Driven Decisions:

The dashboard provides real-time data insights, supporting smarter resource allocation and boosting overall productivity.

## Features

- HDMI Display Interface
- TV brand agnostic
- WiFi & LAN compatible
- Small form factor TV Module
- Low power consumption
- WiFi and LAN supported

# EZ EDGE V3

## Features

- 10 x 24V digital inputs N/O or N/C
- ESP32 uCPU supported
- Raspberry Pi Zero2 W supported
- 5-36V PSU Terminal & 2.5mm Barrel PSU connectors
- 5 x Relay output 3.3V-24V
- WiFi 2.4Ghz
- Bluetooth
- DIN Rail mount
