

LEGAL PATERNITY TESTING

Vital Lab offers legal paternity testing for family law attorneys, courts, DCSE, adoption agencies, immigration, and direct consumers.

LEGAL PATERNITY TESTING

Paternity testing determines whether a man (alleged father) is the biological father of a child. When establishing legal paternity the results can be used for various reasons such as child support, child custody, adoption, right to heir, grandparentage, siblingship, and more.

HOW ACCURATE IS THE TEST

Standard paternity testing is 99.9% accurate.

HOW IS THE TEST PERFORMED

Legal paternity tests are collected using a buccal swab from the child and alleged father for DNA analysis and comparison.

WHAT MAKES THE TEST LEGAL

Legal paternity tests automatically include court-admissible documentation with a notarial seal of acknowledgment.

WHO CAN REQUEST A TEST

Family law attorneys, judges, court liaisons, DCSE, adoption agencies, immigration, and direct consumers/clients.

- ✓ Court Admissable
- ✓ DCSE & Family Law Approved
