# SUPER SPECIALTY & TRAUMA CENTER AT GOVERNMENT GENERAL HOSPITAL, GUNTUR

In a relatively short period of time, **thanks to the generosity of Podila Venkata Prasad** and donors such as you, our dream of a Super Specialty and Trauma Center at Government General Hospital, Guntur, is now a reality. We are very excited and pleased to share the progress of the project with all of you during this Holiday season.

## Podila GMCANA Super Specialty & Trauma Center

is a facility comprised of a cellar, ground floor, first floor, second floor, and third floor that will accommodate more than two hundred patient beds upon completion. This project will deliver an expanded emergency care with a fully equipped trauma center, state-of-the-art surgical facilities and intensive care units, and integrated procedural services in several specialties and super specialties.

We anticipate that the construction of the cellar, ground floor and first floor will be **completed within the next six months**. We invite you to walk with us to **view the progress** of this construction.

**As fellow alumni** and donors to this project, we all have the same goals, which are to enable this facility to provide quality medical care that patients deserve and to empower the faculty and students with advanced medical training facilities. To reach this goal we ask for your financial support, especially for the completion of second and third floors.

We invite every single alumnus of GMCANA to be a part of this exciting and fulfilling project by making a donation. Every donor who contributes \$1,000 or more will be recognized on the “Wall of Recognition” permanently. Please see the enclosed sponsorship form to review the various options of donation. We hope that you will consider making a generous tax deductible donation to help us reach our goal of completing the project on time.

*Your donation will...*

**Educate** the future generation of students

**Elevate** the standard of Medical care

**Inspire** the others to contribute

**Transform** the lives of many patients
