

RxAir360

NEWSLETTER

Greetings RxAir360 Family,

We are pleased to announce the details of our 2nd patent. A Zoom will be scheduled soon.

As promised, RxAir360 will start the second phase of Financial Literacy classes. This session will focus on the value of insurance. Invitations will be sent as soon as the date is finalized. This class promises to be as informative and successful as our first financial literacy class. Congratulations to everyone who began securing their financial future.

RxAir360

clinical hyperbaric oxygen device

Great News

We want to congratulate Electroimpact on finishing the engineering design. They have worked tirelessly, remained committed, and are focused on completing this project.

A purchase order was issued earlier this month for ABW Technologies to build the chamber's housing for the RxAir360 Hyperbaric Chamber prototype. During this time, Electroimpact will continue working with FMS Engineering to add the pneumatic controls and operating system.

Once everything is assembled, it will be sent to the 510(k) pre-certification company by the end of the summer and submitted to the FDA for final clearance.

This latest update marks a significant achievement for our company and brings us closer to our goal of obtaining FDA approval by the end of this year. We are confident that our unwavering focus on marketing, sales, and installation in Q1 of 2025 will allow us to yield dividends in Q2.

Validation

We aim to keep you informed about the latest developments in Hyperbaric Oxygen Therapy (HBOT) and how it is benefiting people across the globe. Please take a moment to peruse the articles and videos we have provided to gain a better understanding of why we are thrilled to offer this product in private practice physicians' examination rooms.
