

RxAir360

NEWSLETTER

Greetings RxAir360 Family,

As you know from our previous newsletter, our team traveled to Houston to further the preparation stages of RxAir360.

Over the past three months, our CEO and some team members have traveled and worked diligently to develop partnerships for RxAir360.

Here are a few highlights of what's new.

RxAir360

clinical hyperbaric oxygen device

The Latest

Seattle - The CEO and medical team visited Electroimpact for the 1st physical look at the prototype. Design and construction have met FDA requirements and code-approved pressure testing for the entire chamber.

Virginia - The team met with the Director of Engineering at PCCI Hyperbaric Systems, a leading hyperbaric chamber manufacturer. Conversations led to a strategic alliance with PCCI and RxAir360.

Washington, DC - Meetings with our legal team to prepare for the next phase.

Canada - Our CEO, CLO, and Director of Operations visited a Hyperbaric Medical Center in Canada. At this facility, the team took apart a hyperbaric chamber. It was determined that, even though we are code-approved, added reinforcement would be given to the pressure vessels of our chamber to aid in completing our prototype. We are excited to submit the final version to start the FDA approval process next quarter.

Great News

As we approach 2024, the Corporate team will be hosting a private investor zoom to share more exciting news. Please join us on December 28th at 7 PM EST for an exciting call.

Validation

Keep up with information about what hyperbaric oxygen therapy (HBOT) is doing for people worldwide. Here are some videos to help you understand why the RxAir360 family is setting the standard and pioneering bringing hyperbaric oxygen therapy to private practice physicians' examination rooms.
