IT'S TIME FOR AN UPDATE!

Hello RxAir360 Family,

By now, we hope that everyone has received a token of our appreciation. As we continue to move forward, here are some highlights of what is happening with RxAir360.

RxAir360

clinical hyperbaric oxygen device

The Latest

As we strive to develop the best product possible, our engineering and design teams are diligently working with the expectation of finishing the prototype by the end of this quarter.

Our legal team is going through the process of preparing the paperwork and signing off on all documents to make this happen. We have projections of February 24th to send out an email notification with instructions for completing everything related to the share split. Please be on the lookout for the email as there will be important information to promptly sign for acceptance of your updated shares.

Round Two of funding will begin immediately after our share split, projected by February 24th. This round will only be open to those investing \$50,000 and above.

More Validation
