## NEWSLETTER

Greetings RxAir360 Family,

We trust you are all excited as we are with the progression of RxAir360 Inc. As per our end of year zoom, we are still on track with our timeline.

Here are a few highlights of what's new.

# RxAir360

clinical hyperbaric oxygen device

### The Latest

As production moves forward, our team has begun focusing more on the CARE (Children Are Really Everything) program.

Our 501c3 is filed "RxAir Cares," and conversations are being had with potential past and present professional athletes to act as ambassadors for donations to the chamber. Our goal is to donate a chamber to a Children's Hospital each month in areas that would not otherwise be affordable for the treatment of children, with the stipulation that all children be treated at no cost.

### Great News

We will be kicking off our financial literacy classes in the next 30-60 days. We will send out an email ahead of time to allow you to make adjustments to your schedule to attend. These classes are very important as you will learning different avenues of protecting your money.

### The Future

Our future newsletters will keep the family notified through the FDA Approval process and into production. In the meantime, if there are major milestones and exciting news to share, we will let you know as it happens.

### Validation

Keep up with information about what hyperbaric oxygen therapy (HBOT) is doing for people worldwide. Here are some articles to help you understand why the RxAir360 family is setting the standard and pioneering bringing hyperbaric oxygen therapy to private practice physicians' examination rooms.
