

RxAir360

NEWSLETTER

Greetings RxAir360 Family,

The production of the RxAir360 device is slated to commence in the first quarter of 2025 subsequent to obtaining FDA clearance in the fourth quarter of 2024. The current status indicates completion of the prototype design, with ongoing production targeting 510K FDA approval.

In case you missed it, the recording of our second patent Zoom was emailed to you after the live Zoom meeting on June 23rd. Dr. Stan did an excellent job and provided valuable information about the approved patent for future projects.

RxAir360

clinical hyperbaric oxygen device

The Latest

We hope you're still enthusiastic about your investment in RxAir360. We're happy to report that we are on track with our timeline as we approach our submission for FDA approval. We'll continue to keep you updated as we reach this milestone.

Great News

Our corporate team embarked on a productive trip to Nova Scotia, Canada, in early June. The objective of this visit was to engage in discussions with prominent investors, with the aim of finalizing our Series A funding for the RxAir360 project. The interactions with our CEO and Hyperbaric Specialist proved to be highly successful, and we are presently navigating through the necessary steps to secure the required funds. Rest assured, the RxAir360 team is resolutely focused on expediting this process, and we will keep you apprised of our progress.

Save The Date

Our financial literacy class was packed with information on Product Options to show you how to invest your wealth. If you missed it, a follow-up email with the session recording was sent. The last session on Legacy Plan Options ("Take the liability out of your legacy") will be on July 14th, 7PM EST.

Validation

We aim to keep you informed about the latest developments in Hyperbaric Oxygen Therapy (HBOT) and how it is benefiting people across the globe. Please take a moment to peruse the articles and videos we have provided to gain a better understanding of why we are thrilled to offer this product in private practice physicians' examination rooms.
