clinical hyperbaric oxygen device

### The Latest

Since our Series A round opened at the end of May, we would like to close the round by the end of June. This round is open to \$50K and above investors, and the amount to complete the round is \$15M. We are happy to inform you that several sources have shown heightened interest in our company. They are doing their due diligence in preparation for closing the round and moving forward.

Financial Literacy information sessions will be starting soon. In the meantime, please look at the article below - food for thought - written by a specialist in Financial Literacy and a candidate for our upcoming sessions. [Click Here](#) - Do I Have a Legacy?

### Great News

Our engineering team, Electroimpact, is in the final stages of the design and construction of the RxAir360 prototype. Once approved by the RxAir360 team, functionality will be tested, and the final prototype will be delivered.

### Validation

As we continue to bring you validation of Hyperbaric Oxygen Therapy (HBOT), please view the videos below and see how Hyperbaric Oxygen Therapy continues to change lives.
