

QUICK CAFÉ

Ready To Serve!

2023

QUICK CAFÉ MODELS

Are Offered In (5) Different Models

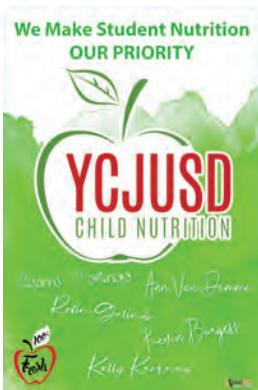

- Standard Quick Café
- Quick Café MiniMAX
- Quick Café Speed Line
- Quick Café BBQ Station
- Quick Café Speed Lane

For over 20 years the Quick Café has been the high volume solution for expanding meal access. The functional, attractive and durable Quick Café will provides years of reliable service. Each Quick Café includes your choice of custom color, custom graphics and a motor operated security door. No bending, stooping or struggling to open the Quick Cafés. An included remote control and keypad actuate the door.

All models include a battery back-up and manual override. We can help you bridge the gap with school administrators and involve them in the design process which will help you locate the Quick Cafés in the most functional and effective locations on your campuses.

There are a myriad of configurations, options and accessory equipment to maximize the benefits of the Quick Cafés on any campus. The Quick Cafés can be relocated as they not permanently mounted and do not attach to any school facilities. Call us today to schedule a site survey to walk your campuses and identify the best locations for your new food service distribution location.

QUICK CAFÉ SPEEDLINE

Your High Volume Meal Solution
Only **ONE** Staff Member Needed

The Quick Café Speed Line offers maximum velocity and capacity.

The Quick Café Speed Line creates a high volume point of meal distribution with dramatic massive capacity, exceptional flexibility for meal component offerings and only one staff member needed.

With a 600+ meal capacity without reloading, The Quick Café is your solution to serving 100's of students during lunch. Our specialized internal equipment configuration maximizes capacity and function while maintaining a professional aesthetic appearance.

QUICK CAFÉ SPEEDLINE

Configurations

The Quick Café Speed Line is offered with or without the awnings/stanchions. A full length eave is included with the models without the awnings to shade the equipment and keep moisture off. **Our Projects Managers visit your campuses at no charge to help determine the best model and configuration for your application.**

Standard Features

- Dual motorized doors
- Keep pad actuation
- Battery back-ups
- Mechanical override
- Back panels enclosure
- Powder coat finish
- Interchangeable graphic panels
- Expandable
- Free-standing

Long Lasting Quality.

The Quick Café Speed Line is designed for years of service in the most abusive environments. American made (here in California) and built to last.

Overall Dimensions:

25ft wide x 42" deep x 95" high

QUICK CAFÉ SPEEDLINE

Control Features-Communication Features

Total control with speed of service. The Quick Café Speed Line with the awning/stanchion option creates the service lane to control student flow and offer shade and weather protection for the equipment and staff. **Our Projects Managers visit your campuses at no charge to help determine the best model and configuration for your application.**

Custom stanchions are provided with each Quick Café Speed Line. Graphic panels can easily be updated should the line direction change or the additional information/art-logos.

Communication features include an information center on each Quick Café Speed Line with the ability to easily update information/menus or events. Engage the students with anticipation of upcoming food items and options.
