

95460021-WSE One belt cutter deck

Mounts from bottom of deck.
Replaces 71460026, 38 and 57
Torque blade bolt to between 70 – 80 ftlbs.

The **71460115** kit is for changing out the 71460038, 57 and 92 spindles used in the WSR/WSES/WZ/WSE models. The new 71460134 spindle bolts directly into the cutter deck (no spacer is needed) and uses the 71460111 tapered bushing and 11990090 bolts. Two 13990007 blades spacers are used between the blade and spindle to position the blade correctly and the 11990116 bolt and 13990039 washer are used to secure the blade. Torque blade bolt to between 70 – 80 ftlbs.
