- Signed off Deme project ITP's
- Attended daily onboard meetings

SUMMARY

Offshore Employers Representative.

Experienced Offshore Client Representative (Foundation Installation) with a proven record across major offshore wind projects

Specialised in heavy-lift operations, MWS coordination, and QA/QC compliance, ensuring all offshore activities are executed strictly in accordance with approved Method Statements, Work Authorisation Forms (WAFs), and Marine Warranty Surveyor Certificates of Approval (CoAs). Skilled in monitoring verticality, penetration, levelling, and grout performance, maintaining full traceability of test data, as-built records, and photographic documentation.

Respected for clear communication, calm decision-making, and integrity under pressure, fostering strong collaboration between client, contractor, and MWS teams throughout all installation phases. Promotes a proactive safety-first culture, actively engaging in toolbox talks, HAZID reviews, and daily coordination meetings to ensure strict HSE compliance and effective SIMOPS management.

Committed to representing client interests through technical competence, impartial oversight, and operational excellence.
