## Handle Sizes Explained

'Centres' describes the distance between the middle of each fixing hole on a handle.

The overall length of a handle will be bigger than the centres size, although this will vary on a style by style basis. To help give you an idea of which handles are best for you we've provided a handy guide here which features some of the most common centre sizes.

## Cambia Two-Piece Handles

- Cambia handles allow the choice of two finishes in one handle.
- Each half, in any finish, can be slotted together to form a single, dual-finish handle. This can then be fitted in either orientation so that a preferred finish is facing up.
