About Us

Welcome to Restore by Nurse Bibi — where wellness meets purpose. I'm Nurse Bibi, and I've spent over 11 years as a licensed nurse, dedicated to caring for others and understanding the deeper needs of the human body. But my mission became even more personal when I was diagnosed with endometriosis, a chronic condition that brought pain, fatigue, and frustration into my daily life.

Determined to find relief beyond prescriptions, I turned to natural alternatives—leading me to discover the incredible benefits of magnesium. What started as a personal remedy soon evolved into something much bigger: Restore, a Magnesium Mist Supplement designed to support not just me, but families everywhere. Restore is made with natural and organic ingredients, and delivers the calming, restorative power of magnesium in a convenient topical mist. It helps with relaxation, pain relief, muscle cramps, stress, tension, and many of the everyday discomforts we often push through. Whether you're managing chronic symptoms, recovering from a long day, or just need a moment of calm, Restore is here to support you—gently and effectively.

At Restore by Nurse Bibi, we believe in clean, honest wellness backed by real-life experience. I created this product because I needed it—now, I'm proud to share it with you and your family.

Thank you for trusting me to be part of your wellness journey.
