Why should you value this certificate from your IT Governance Ltd course?

IT Governance Ltd is a specialist IT governance and information security business, providing a single source for a comprehensive range of information, advice, guidance, books, tools, training and consultancy services and solutions for IT governance, risk management, compliance and information security. Our mission is to:

"Provide best-practice IT governance and information security frameworks, solutions, products and services that are essential for business managers in
achieving strategic goals, protecting and securing intellectual capital and meeting relevant corporate governance objectives."

With our wide-ranging expertise across the entire IT governance and corporate governance sphere, we can identify linkages and improvements that drive business efficiency and bottom-line benefits through your whole IT operation. Recognised by third party Accredited Certification Bodies, IT Governance is on the following approved consultant lists:

- BSI Management Systems UK Associate Consultant Programme;
- Bureau Veritas Certification approved list for the implementation and management of ISO 27001 and ISO 20000 (IT Service Management standard);
- Lloyds Register Quality Assurance (LRQA) Consultant Network;
- ISOQAR consultant database;
- NQA consultant database; and
- SGS The world's leading inspection, verification, testing and certification company
