# *Ethiopic/Ethiopian Quiz*

*As Presented to the Unicode Conference participants*

*Fesseha Atlaw*

- *Q 1- In which century was the reading tradition of Ethiopian documented? In which book was it documented*
- *Q 2- Which world famous book was discovered written only in Ethiopic*
- *Q 3 What is Ethiopia's population*
- *Q 4 What is Ethiopia's ranking in terms of world economic growth?*
- *Q 5 How was Ethiopic ranked among the most significant languages to computerize*

# Q1 Answer....

## 1<sup>st</sup> Century in the Bible

**Biblical Narrative.** Philip the Evangelist was told by an angel to go to the road from Jerusalem to Gaza, and there he met the **Ethiopian** nobleman. He had been to Jerusalem to worship (**Acts 8:27**), and was returning home. The nobleman was sitting in his chariot **reading the Book of Isaiah**, and had come to **Isaiah 53:7-8**.

# Q 2 Answer....

“..... the book of Enoch resurfaced at the beginning of the 17th century when it was discovered in Ethiopia, written in an Ethiopic language. In fact, the book of Enoch is preserved in its entirety in the Church at Ethiopia, and is included in their Bible. The Ethiopians claim it was divine scripture, and treat it as such to this day.....”

# In brief.....

- What is Ethiopic ?
- Significance of Ethiopia in World history
- Uniqueness of Ethiopic & Ethiopian culture
- Why Ethiopic alphabet was on the verge of extinction
- How Writing in Ethiopic has thrived because of the Unicode
- Who are the contributors of early implementation of Ethiopic in the Unicode.

# Ethiopic/ኢትዮጵያኛ

- Also known as Ge'ez
- An ancient script some say goes before Christ
- The Old Testament mentions refers to Ethiopia more than 50 times
- Ethiopia is mention in the New Testament once
- About 40AD: **Philip** the Evangelist was told by an angel to go to the road from Jerusalem to Gaza, and there he **met the Ethiopian**. He had been to Jerusalem to worship (Acts 8:27), and was returning home. **The Ethiopian was sitting in his chariot reading the Book of Isaiah**, and had come to Isaiah 53:7-8.
- It is not clear what he was reading was in Ethiopic but at least Ethiopia has been a “Reading Culture”

# Amharic Type Writer

Vowel Marks

# Ethiopic Alphabet

Ethiopia's ancient Ge'ez script, also known as "Ethiopic", is one of the oldest alphabets still in use in the world.

- Ethiopic is used to write : Amharic; Tigrinya ; Ge'ez language (liturgical ) and more than 80 other Ethiopian dialects
- Phonetic based Alphabet : Each character is a constant plus vowel
  - ሺ =She ; ጁ =Joe    የኒኮድ =Unicode;
- Semitic Origin but written left to write (unlike Hebrew & Arabic)

# Ethiopic Alphabet

- Before Ethiopic was introduced to computers only about 268 characters were in use mainly due to difficulty in accommodating them in a typewriter
- It was a consideration to truncate the alphabet even below 268 during early Ethiopic computerization.
  - Elimination of similar sounding characters (70)
  - ሀ ሐ ጎ ጎከ \* ሠ ሰ \* አ ዐ \* ፀ ጸ
  - Elimination of Rarely used characters : (37 characters)
    - ከ ቆ ኸኳ ጰ etc

# Now

- Ethiopic in the Unicode is 380+ characters (U+1200 - U+137F)
  - Addition of non Amharic sounds
  - Extended Ethiopic
    - ቀ ፤ ደ ፤ ኸ ፤ ማ ቆ
  - Music (Zeima)Notations
  - Punctuation Marks
- All 80 dialects/languages in Ethiopian can use Ethiopic Unicode if they choose to.
- Amharic speakers who can't read & Understand English can now read The Washington Post or LA Times in Amharic daily

# Computerization Challenges

- Ethiopic was a very minor and “commercially unattractive”
  - As an HP engineer – I offered my first Amharic/Ethiopic word processor to Hewlett -Packard for FREE – HP declined but supported my after-hour work on Ethiopic
- Ethiopia as a country was experiencing its worst time in its history under a brutal military communist regime
- The task of accommodating over 230 variable widths characters was not trivial in 8-bit & ASCII environment

- First designs were designed pixel by pixel
- In ASCII environment Limited
- Unicode made it possible for wide fonts
- Scanning
  - Font design software became available

- You can design your own keyboard and
- You assign keys (h+a) or (h+v) to U+1200
- This process is too easy so many are designing their own schemas and *Patent* them..

# Objectives of presentation

is to:

- Show how the unique nature of the history of the Ethiopic and the cultural environment
- Describe how the addition of Ethiopic to the Unicode in 1996 has made a significant difference to the Ethiopian community and it has contributed to the survival and thriving of languages that use Ethiopic
- Briefly discuss the unique aspects of Ethiopic and extended Ethiopic character set
- Give credit to those that have contributed to the addition of Ethiopic to the Unicode and continuously working to improve it .
- Briefly show some of the Amharic/Ethiopic Applications that were possible because of the Unicode
