

INTRODUCING:

SPEED SNACK

READY IN MINUTES

FRESH INGREDIENTS

healthy french bread snacks ready in minutes!

1. We developed this product several years back due to major supply issues from the industry leader. We felt our product was superior but backed off because many of our distributors were tied to the brand. We went thru many samples to get the bread right.
2. Supply problems came back worse in 2020. (Early June PO / product delivery in December)
3. **The difference is the bread!** Our high protein breads are optimized with ingredients and attributes that provide excellent resilience, heating and holding qualities for the best eating experience possible.
4. Packaging is superior to competition.
5. Speed Snack still utilizes the susceptor (tray) to aid in the process of heating the bread to simulate the same characteristics as if it was baked in the oven. The competition does not.
6. The garlic cheese bread I personally think is better out of the microwave than the larger product out of a conventional oven.
7. This product is a healthy, convenient snack for the busy families on the go that are exactly our target demographic.
8. www.speed-snack.com that Marc created does a great job selling the product!

Oh the bread!
Our high protein bread is optimized to provide the best eating experience possible.
