Doug Rankin
Toronto Golf Club

SMART Golf Software approached us and explained what they were offering for 2023. My staff and members quickly fell in love with the program. Unlike other scoring software which creates more headaches for golf shops, SMART Golf saves us a tremendous amount of time. We couldn't be happier with SMART Golf Software and the excellent service they provide!

Jamie Breedon
The Pulpit Club

We switched our Men's League to SMART Golf and could not be happier with the functionality, ease of use and the consistent level of support on the back end provided by Rob and his team. We would highly recommend SMART Golf to any course looking to upgrade their Tournament or League software for the upcoming season.

Jeremy Broom
Mississauga Golf & Country Club

The addition of SMART Golf to our Men's League in 2023 was a welcome addition. The Membership experience increased and the Staff interface was seamless. Mostly importantly the customer service that Rob and his Team provided was nothing short of exceptional. When any issue did arise they were quick to assist and provide a solution. Mississauga will be utilizing SMART Golf for the foreseeable future, can't recommend the software enough.

Jim Anderson
The University of Arizona

In 2024 we started working with SMART Golf and were very impressed with their program and the support. Rob and his team were always available and provided helpful videos on how to use the program which were fantastic. The interface and connectivity throughout the leaderboards looked contemporary and the back of house set up was very easy for our support team.

Rick Schmidgall
Point West Golf Club

We made the switch in November 2022 for the upcoming 2023 season and from day one our Members loved it. It was easy to use and navigate and the website looked "cleaner" than what we had in 2022. The support provided by Rob and everyone at Smart Golf League was tremendous. I have no hesitations in recommending other Golf Courses to upgrade to Smart Golf League for their League software provider.

Patrick Yashar
Credit Valley Golf & Country Club

SMART Golf has been an excellent addition for us in enhancing our league play. It is user-friendly and provides the members with a seamless experience in navigating all of the standings and statistics that are available to them, not to mention how easy it is to use on the back-end for the Golf Professional Staff. Robert and the team at SMART Golf are always available to help whenever an issue may arise, and worked closely with us to build out the software to fit our specific needs. If you are looking to add value to your league play, I would highly recommend using the software and partnering with Robert and his team.
