Ala Carte Options Per Piece/Pound

The most common question people ask themselves when placing a catering order is, "How much food should I order?" There is no simple formula to do this, however most experts agree on 1 to 1.5 pounds per person.

Ask yourself a few questions. Is your event meant to feed your guests a meal, or just small appetizers?

Is this for a children's birthday, or a dinner banquet for a football team?

When making these decisions we're here to help. Don't hesitate if you have any questions at all!
