

CWL – 150 Cross Web Labeller

Cross Web Labelling Systems
Specially constructed to mount directly on your packaging machine

INVEST IN YOUR FUTURE

The CWL 150 Labeller is designed for high - speed labelling on to thermoforming machines for vacuum packing.

Using a vacuum chamber, a whole row of labels is applied at a time.

The modular construction can be mounted without difficulty on to any thermoformer.

The machine meets the requirements of the food industry and the medical sector.

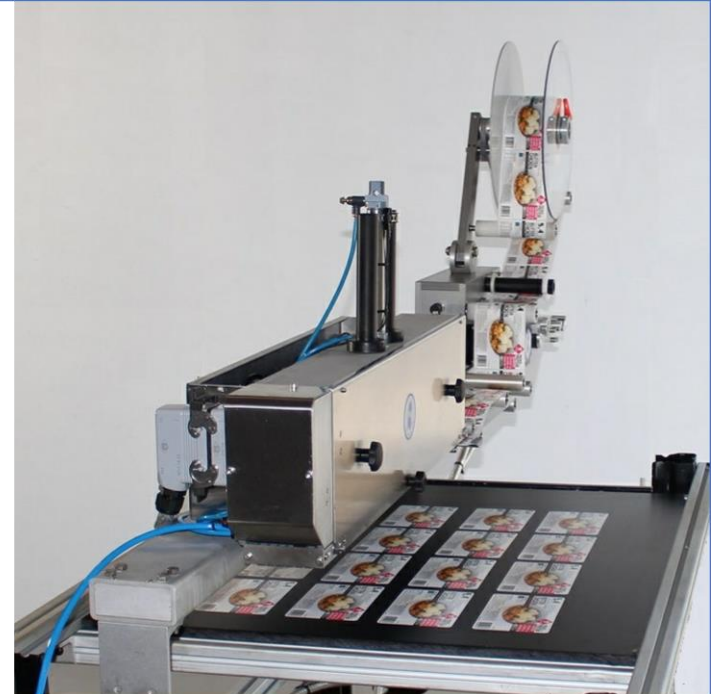

Label printing modules for date coding, bar code or product information can be attached.

INVEST IN YOUR FUTURE

EASY CONTROL ACCESS
AND PROGRAMMING

ADVANTAGES

Practical and cost - effective labelling solution for thermoformed packages

Proven control technology for flexible packaging production

Modular components for absolute flexibility

Worldwide installation and 24/7 technical support
