

Rotary Accumulation Turntables

WASHDOWN RATED ACCUMULATION SYSTEMS FOR THE FOOD AND NON FOOD INDUSTRY

Accumulation Turntable

Our stainless steel rotary accumulation tables ensure you have large platforms for efficiently staging product. These tables are built for food processing plants that require harsh washdown for cleaning.

The rotary turntable utilises high quality material and design, at an affordable price to ensure applications remain efficient with the production area.

Features and Benefits:

- > Can be placed before or at the end of the production line for manual or automatic packing
- > Heavy duty and low cost design
- > Stainless steel frame and heavy duty plastic disk
- > 1/4 Horsepower variable speed industrial AC reversible drive motor
- > Open frame design for easy cleaning
- > Adjustable height range from 750 mm to 950 mm (custom heights)
- > Optional stainless steel lockable castors for mobility

Rotary Accumulation Turntables

FOR THE FOOD AND NON FOOD INDUSTRY

Infeed belt conveyor combination for smooth product transmission.

Heavy duty construction for efficient and safe product accumulation allow stability and reduces production costs.

Our rotary accumulation turntable configurations can handle multiple containers sizes and products. The rotary design is flexible and the top discs diameters are 900 mm and 1200 mm.

Accumulators are supplied with an enclosed cabinet and variable speed controls. The rotary accumulation tables can be equipped with Infeed and discharge conveyors.

The rotary turntable can be used as a standalone product to provide an absorber when required for accumulation or descrambling, or as part of an integrated product handling system.

The rotary turntable also compliments our range of product handling systems, that can act as infeed or outfeed conveyors.
