

## PLAY TIME

Early Childhood Enrichment Center

In those early months, babies grow quickly and become sensitive to their surroundings. Our program provides sensory stimulation and nurturing care to spark their curiosity and support exploration. It's all about creating a cozy space where they can safely discover the big wide world around them.

From taking those first wobbly steps to unraveling the mysteries of the world, every day is an adventure. In our classroom, we make sure they have plenty of fun with stories, songs, and creative activities that spark their curiosity and build those budding language skills.

Prepare your child for preschool, exploring their identity and interests. Our program offers tailored activities, balancing quiet moments with lively play. We include small-group adventures, hands-on learning, and outings with future preschool friends for an enriching journey.

At this stage, children explore in our classroom with fun learning centers. Our curriculum, aligned with Ohio Early Learning Standards, fosters choice making, problem solving, and growth. They discover the alphabet and numbers while enjoying visits, field trips, and guest speakers!
