ADOPTION FEATURE

Marble

fostered in Kitchener
Waiting the longest to find her furrever home

MEDICAL UPDATES

ZURI

Sweet Zuri went into OVC Guelph today (April 8, 2024).

Vet Update

She is receiving lots of pets and everyone LOVES her. She has an IV for her current meds and her blood work is consistent with her liver shunt. She has elevated ammonia so she will have an enema in the morning pre-surgery. She is second to be operated on tomorrow.

We will anxiously wait for an update from the vet tomorrow and pray her surgery goes well!

GRIFFIN

We are still waiting for his specialist appointment May 7th; similar process to Zuri, to see what his next steps will be.

Marble

FEMALE - 2 YRS

- BEAUTIFUL TORTIE
- LOVES TO BE PET
- WOULD LOVE TO BE THE ONLY KITTY FOR ALL THE LOVE
- ENJOYS WATCHING BIRDS AND SQUIRRELS
- SO DESERVING OF HER OWN HOME

Perth East Recreation & Community Spring Market

Sunday April 14 - Milverton, ON

WHERE: Banquet Hall- 40
Temperance St., Milverton

45th annual Golden Triangle Cat Fanciers Cat Show

Sat May 25 & Sun May 26- Cambridge, ON

WHERE: Dickson Centre Arena- 30
Park Hill Rd W, Cambridge, ON

KITTEN SEASON

What is it?

Kitten season, as understood by the Ontario SPCA, refers to the period typically during warmer months when shelters and rescue organizations experience a surge in the intake of kittens. This increase is often attributed to unspayed female cats giving birth, leading to an influx of kittens in need of care and homes.

Preventing It

To help prevent it, we must understand the root causes of cat overpopulation:

- 1. Spaying & Neutering:** this procedure helps prevent unwanted pregnancies, especially for cats that roam the outdoors.
- 2. Education & Awareness:** benefits of spaying/neutering
- 3. Community Cat Programs:** contact a local rescue or humane society
- 4. Adoption & Foster:** If you spot kittens and mom, call for help. It is best to keep kittens **with their mom!** When kittens are young, they can get socialized and Mom can be assessed and trn'd if necessary.

female cats: eliminates the risk of uterine infections, and greatly reduces the risk of mammary gland tumours and ovarian cancer

male cats: reduces the risk of testicular cancer and may decrease the likelihood of certain prostate problems

Foster Families

Foster families are always needed, but even more so in kitten season.

Sweet Momma Cassie who recently gave birth to 7 kittens! Be sure to subscribe to our Youtube Channel to see updates about the new kittens!

Especially for female cats who come in stray, having a foster family to help support and socialize them and their kittens, makes the adoption process a breeze!

We are always looking for new foster homes! Ensure you reach out if you and/or your family are interested! We help every step of the way: whether a first-time foster or experienced!

♥ SUPPORT ♥

We need fosters

With kitten season (already) starting, we are looking for families or individuals who would be interested in fostering for RTC Rescue. Firstly, it provides temporary homes for animals in need, offering them a safe and nurturing environment outside of shelters. This reduces overcrowding in shelters, improving the overall well-being of animals. Fostering also allows potential adopters to experience a pet's personality in a home setting, increasing the chances of successful adoptions. Additionally, fostering aids in the rehabilitation of traumatized or neglected animals, offering them a chance to heal emotionally and physically. Ultimately, fostering plays a pivotal role in saving lives, promoting responsible pet ownership, and contributing to the overall welfare of animals in the community.

FUNDRAISERS

Misfits

Handmade with love, these cat stuffies are made from recycled clothing and given new life. \$25 each as an "adoption fee". Receive your own personalized adoption certificate.

WHAT IS FIP?

Feline infectious peritonitis
aka feline coronavirus

March 22 we celebrated Ollie 🎉

Ollie graduated from his FIP treatment with FIP Nation. He started his treatment on September 29th, 2023, for Ocular Feline Infectious Peritonitis (Feline Coronavirus) and finished on the 22nd!

We want to thank Dr. Jeff and his amazing team at South Tower Animal Hospital, who are run the FIP Nation study. Our vet team at New Hamburg Vet, as well as his foster mom Bia, for taking such great care of him! He has grown to a very healthy 6.1kg and is loving life with his bestie Finn!!
