SOLAR

Meet Solar, a lovely female kitty born around May 2023. Solar's journey started as a caring mother, found looking after her kittens outside in the small community of Mannheim.

Now, she's ready to find a forever home where she can shine as the beautiful and sweet girl she truly is. Solar may be a bit nervous at first, but with patience, she will start to show her love and you'll see her true, affectionate nature blossom.

She has made huge strides in her foster home, she greets them when they arrive home, hangs out with them in the living room while watching TV, and will even join them on the couch! Solar loves the company of other cats and thrives in their presence, so having at least one other kitty in the home is a must. She enjoys playing with wand toys, and running around with the other cats in the house. Are you ready to let Solar light up your life? If you have the love, patience, and another kitty friend, Solar is waiting to meet you and become your shining star! ?

Contact us today to learn more about adopting Solar! Solar has been spayed, vaccinated, microchipped, and received parasite control. You can find our adoption process and application on our website

MARBLE

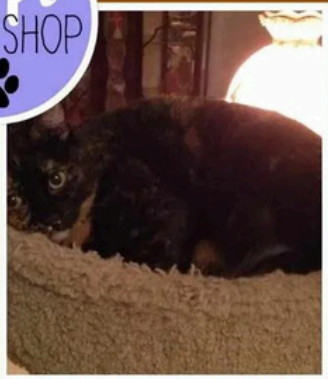

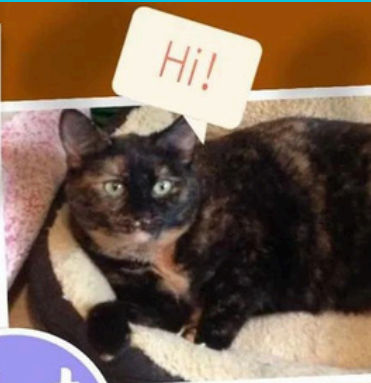

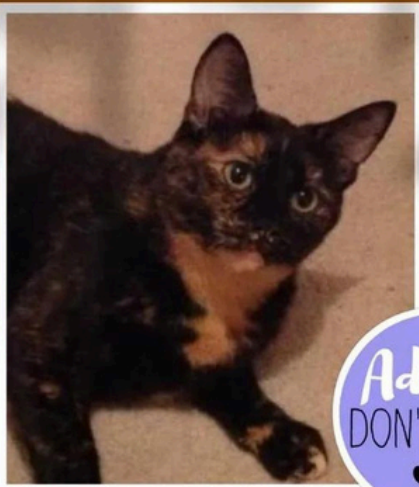

Marble is a very loving and affectionate girl who loves to be petted and is fine with being held. She can be a bit of a talker and quite persistent when she wants attention or her moist food.

Marble was rescued from outdoors in the country when she was pregnant. It was noticed that she has a rotating back hip when she walks and therefore it was decided that an xray was in order to see whether she had been previously injured or born this way. It turns out that both of her back legs had been previously broken in several places and had healed on their own but not properly. It is not known what happened to her to create these serious injuries. The vet couldn't believe that she could actually walk looking at the xrays however she walks quite well in spite of these injuries. She can't jump very high however she is able to go up and down stairs.

It has been decided to put her on a monthly injection of Solensia which is an anti-inflammatory to control pain for osteoarthritis. Marble will require this injection to be given by a vet for life and the cost is \$70.00 and up monthly depending on the vet.

In spite of her injuries Marble enjoys some play time. She likes chasing a laser light for a brief period or jumping at it, interacting with a wand toy or you may find her just laying in her cat tunnel. Marble loves her cat bed and that is likely where you'll find her napping every afternoon. Watching the birds and squirrels from the window is another of her favourite pastimes. She has not had any exposure to dogs.

Marble is a bit shy at first with new people therefore she would do best with a single adopter or a quiet couple. She would love to be an only pet as she is not fond of other cats and she would then be able to receive all the love and attention for herself that she craves.

PEPPER

Pepper was rescued after she turned up in someone's backyard in Kincardine. Posts were made to try and find her family with no success. She then came to Rtrc.

Pepper is sweet, affectionate and playful. She is the first to greet you at the door, and joins every activity around the house. She enjoys being the center of attention, in fact, she often demands this! She's quite curious about everything and loves to turn anything into a toy or fun new game to play. From hiding in cozy places to snuggling with her foster mom, she has a super sweet side. Her shenanigans are bound to make you laugh often.

Pepper has been waiting since April for her forever home!!!! Pepper's preference for being the center of attention and her occasional feisty interactions would suit her being an only cat, or a companion to another young and active cat.

Pepper is spayed, vaccinated, microchipped and received parasite control. You can find our adoption process along with our application on our website.

DIANA

This stunning girl came to us December 2022!!! She has been with us over a year now and it's time for her to find her family.

Diana was caring for her kittens in a small community as winter set in. Her kittens were rescued with her coming into care a short time later.

Diana was very scared and we had her TNR'd thinking she would have to return to her outdoor life. Given the frigid winter we chose to keep her indoors with hopes she would learn to trust.

She adored the kitties in her foster room, and now in her foster home as she is blended with the resident kitties. She snuggles close with the other cats and follows them everywhere. She watches them get love from their mom but she just hasn't quite got past her fears to accept love. Her foster mom can pet her at certain times and once she is being pet she seems to enjoy it, but she is fearful of sudden movements still. Diana is an active part of her foster home, mingling with the other kitties and coexisting with the dogs. She is still not sold on being pet but in the right home and environment she could get past that fear. She truly seems to want to snuggle in with her foster mom as the other kitties are getting snuggles but her fear holds her back. We feel, with time and patience she may even become that snuggle cat. She must have a few friendly felines in her forever home as she just adores other cats.

- AFRAID OF THE REACH BUT CURIOUS
- NEEDS A SPECIAL PERSON/HOME TO MAKE HER FLOURISH
- MUST HAVE OTHER FRIENDLY KITTIES IN HER FURREVER HOME

RTCR

Some might say Diana is not adoptable, why would you post her for adoption if you can't handle her?? We have hesitated for months to post her with hopes she will learn to trust enough to enjoy being pet. We feel she is just as deserving as any other kitty, we just have to find her the right person. She may never be a lap kitty, or she might turn into the biggest snuggler once with her very own people. There is NOTHING more rewarding then winning the love of a semi-feral kitty ??

Right now Diana lives in a home where her foster mom runs a rescue, works fulltime away from the home and cares for MANY animals. Unfortunately she doesn't get focused socializing time. We have faith that there are other loving, crazy cat people, that would welcome and love Diana for who she is, a beautiful calico with stunning markings?

REED

Meet Reed, a resilient and playful boy born on June 2, 2024, and rescued from Mitchell with his mom and siblings in July.

Despite suffering an injury to his right front leg that led to its amputation in early September, Reed doesn't let that slow him down one bit. He's as fast as lightning, full of curiosity, and brimming with life.

Reed is incredibly sweet and affectionate, often leaning into his person for belly rubs and soaking up all the love. He adores dogs and other cats, and would thrive in a home with furry friends to keep him company. Reed's playful spirit and loving nature make him a perfect fit for most homes, especially those that can offer him companionship and attention.

If you're looking for a brave, joyful, and affectionate companion, Reed is your guy! Reed is neutered, vaccinated, microchipped, and received parasite control. You can find our adoption process and application link on our website

MILTON

Meet Milton! This adorable snugglebug, born in June 2024, is ready to find his forever home! Milton is a playful and curious boy who loves wrestling with his sister Millie and chasing his laser pointer.

He's full of purrs and affection, always following his foster mom around, and is confident in every situation. Milton is also very sociable and loves being around people. Milton and Millie appeared one day on someone's porch in Milverton, hungry but affectionate, and now they're ready for adoption! Ideally, Milton hopes to be adopted with his sister Millie, as they are inseparable companions. If you're looking for a loving, playful, and sweet companion to add to your home, Milton might be the perfect fit.

Adopt, don't shop, and give Milton (and maybe Millie!) the loving home they deserve! Milton is neutered, vaccinated, microchipped, and received parasite control. You can find our adoption process and application link on our website

SAM

Meet Sam, an adorable ginger tabby with a heart as big as his personality! Born around April 25, 2024, this bright and curious boy is full of love and playful energy. Sam is a friendly kitten with a touch of spunk, making him the perfect companion for someone looking for a lively and affectionate feline. Sam enjoys belly rubs and rewards you with his mighty purr. He's always eager to explore and investigate his surroundings, and you'll often find him happily playing with his favorite toys. Sam is also a great friend to Dean, and we would love to see them find a forever home together! Sam does have a grade 4 systolic heart murmur, and his echocardiogram revealed a ventricular septal defect with mild left heart volume overload. While this means Sam may require a bit of extra care, it doesn't slow him down or diminish his loving nature. He remains a bright and active boy with so much love to give. If you're looking for a loving duo and can offer Sam and Dean the safe and supportive home they deserve, please reach out. These two would thrive in a home where they can continue their special bond together. Adopt, don't shop – Sam and Dean are ready to bring joy to your life! Sam is neutered, vaccinated, microchipped, and received parasite control. You can find our adoption process and application link on our website
