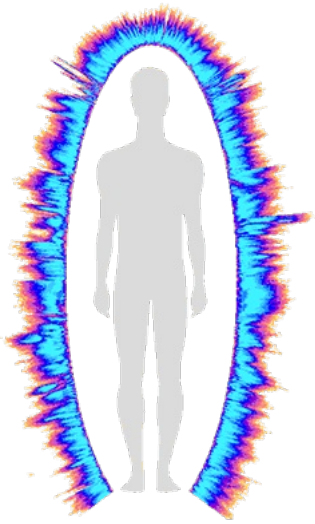
Bio-Well

Analysis of a Personal Energetic Homeostasis by Measuring Energy Field

Brian 2025-04-13 10:01:41, Brian 2025-04-13 10:58:10

About Bio-Well

Bio-Well GDV Camera is a revolutionary, non-intrusive way to measure human energy field using a specialized camera and software system.



Bio-Well has been developed by the team of Dr. Konstantin Korotkov and brings the powerful technology known as Gas Discharge Visualization (GDV) or Electro-Photonic Imaging (EPI) technique to market in a more accessible way than ever before. It was developed together with US partners. The product consists of a desktop camera and accompanying software, which allows a user to quickly and easily conduct human energy scans. When a scan is conducted, a weak electrical current is applied to the fingertip for less than a millisecond. In response to this stimulus fingertip emits electrons, which are striking and exciting air molecules. Excited air molecules create gas discharge or glow. This glow is captured by the videocamera and then digital image of the glow is processed by the Bio-Well Software to show energy & stress evaluations. Each scan returns a wealth of meaningful information to provide you with a truly holistic view of the state of your wellbeing.

The intersection of the fingertips glow created in Bio-Well Software is based on the concept of Acupuncture points and is verified by more than 20 years of clinical studies by hundreds of medical doctors and researchers with many thousands of patients. The scanning process is quick, easy and non-intrusive. Get real time feedback on factors affecting your energy state. View each scan in a variety of interesting ways with up to 9 result display options. With the Bio-Well accessories like Sputnik sensor, Water sensor or Bio-Well Glove measure energy of environment, human emotions and water energies!

Bio-Well presents analysis of the Energy Field and allows to see its day-to-day transformation and the influence of different treatments, situations and stimulus to the Energy Field and hence, to the condition of a person. Friendly software makes data processing simple and convenient for non-experienced users. With Bio-Well you do not need to be a scientist to make full-scale scientific research! Bio-Well is being used by thousands of doctors, practitioners and researchers worldwide. Bio-Well does not measure the anatomical structure of the body, but records functional/ energetic condition of organs and systems at the moment of measurement.

Bio-Well analysis has the following outcomes:

- Allows to define organs and systems of the body which need attention.
- Makes assessment of the follow up response of the body to different influences (treatments, emotions, mobile phone, etc).
- Provides information on psycho-emotional state and level of stress (anxiety).
- Allows easily measure response of the body to different medications, supplements and food.

Bio-Well GDV Camera is present in more than 70 countries. To get more information go to www.bio-well.com.

Bio-Well is not a medical instrument, it is not designed for medical diagnostics, it measures energy and stress of a person. In case of health concerns, please, consult your doctor.

Lifestyle

Color	Name	Physical activity	Nutrition	Environment	Psychology	Regime of the day	Hormonal activity
	2025-04-13 10_01 - Brian	65%	74%	87%	86%	87%	77%
	2025-04-13 10_58 - Brian	67%	74%	90%	91%	86%	74%

Sphere of the lifestyle	Low	Normal	Ideal
Physical (Dan tien)	<66%	66-79%	>79%
Nutrition	<69%	69-81%	>81%
Sleeping regime	<75%	75-86%	>86%
Hormones	<72%	72-85%	>85%
Environment	<78%	78-91%	>91%
Psychology	<74%	74-85%	>85%

Bio-Well is not a medical instrument, it is not designed for medical diagnostics, it measures energy and stress of a person. In case of health concerns, please, consult your doctor.

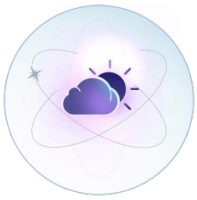
Lifestyle

Physical activity

This sphere is directly associated with the state of the lower back, pelvis zone and lower dan tien (center of gravity). Due to excessive time that we sit during the day and lack of movement - our spine is the one that suffers the most. NB! If you are actively involved in sports - it doesn't mean that you don't have issues with lower back and pelvis zone!

Nutrition

Three main aspects of our nutrition habits are: quality of food, amount consumed and timing of each meal. Considering all of them can lead to a better quality of life. Here we take into consideration organs that are involved in digestion and filtering of consumed food and liquids.



Environment

As we spend a lot of time indoors - we are breathing "dead" air and are exposed to excessive doses of EMFs and sometimes radioactivity. That is why environment influences our Energy state so much. Here we look into respiratory system and overall noise in the system.

Psychology

Constant stress, very high speed of life, excessive consumption of information are affecting our Energy, Stress and Balance levels, and also our nervous system functioning. Psychological balance is taken into consideration too.

Regime of the day

Sleeping regime in XXI century is highly disturbed by the electric lights and excessive use of computers and smartphones. Our brain and eyes are being affected the most by the incorrect sleeping regime.

Hormonal activity

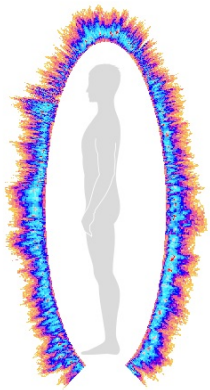
Hormones control many processes in our body and regulate the energy levels. Excessive sexual activity is depleting our Energy, especially for men.

Bio-Well is not a medical instrument, it is not designed for medical diagnostics, it measures energy and stress of a person. In case of health concerns, please, consult your doctor.

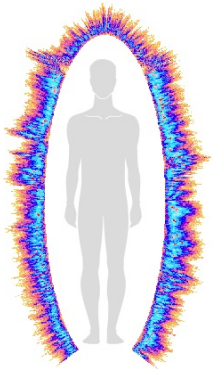
Energy Field

Brian 2025-04-13 10:01:41

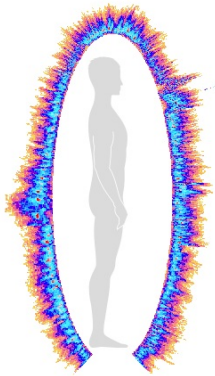
Energy 56 Joules (×10⁻²)



Left



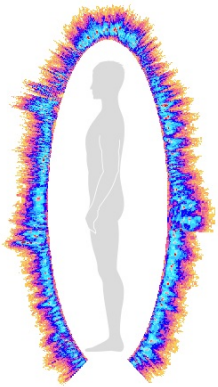
Front



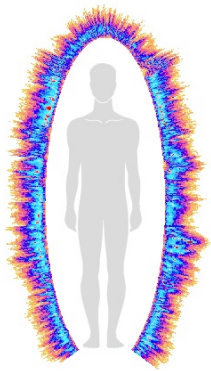
Right

Brian 2025-04-13 10:58:10

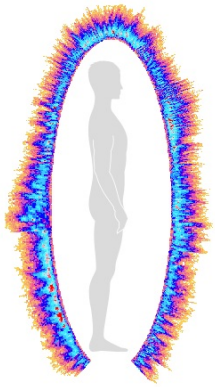
Energy 59 Joules (×10⁻²)



Left



Front



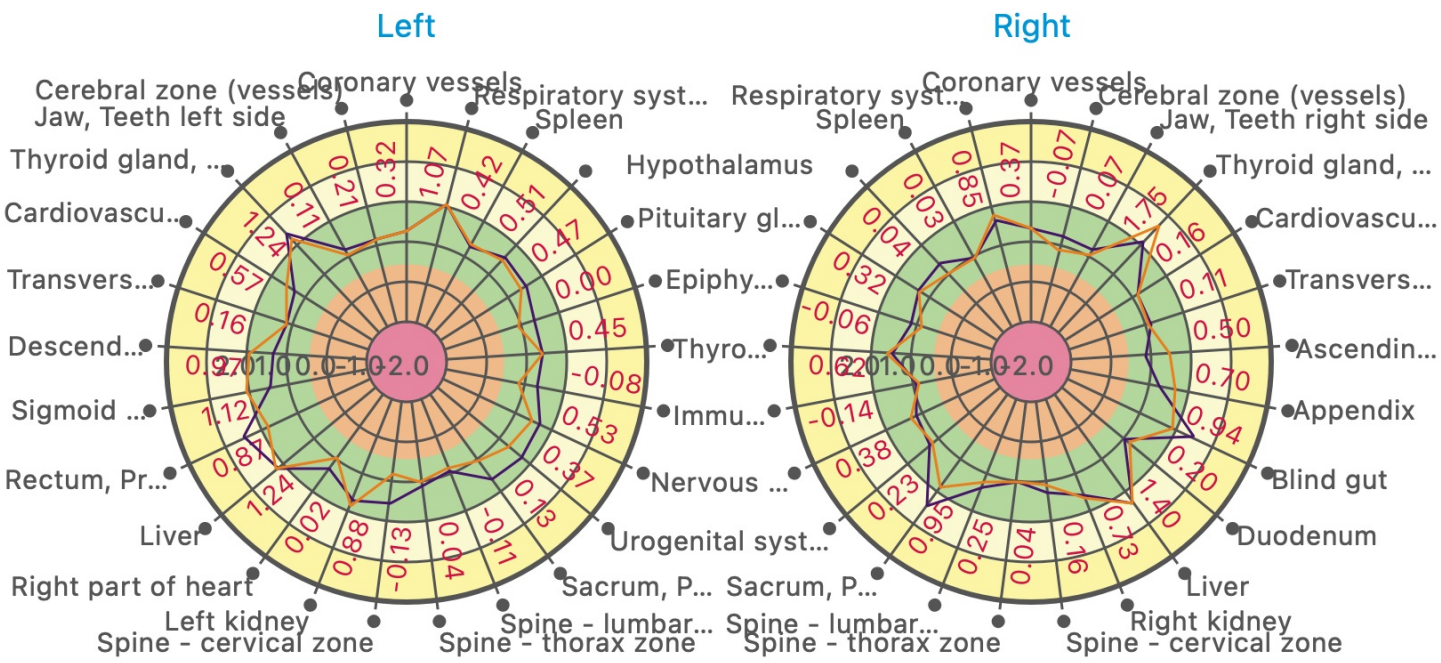
Right

Human Energy Field - is the most sensitive reflection of the physical, emotional and, in some cases, spiritual condition of a person. The image of Energy Field, created in Bio-Well software is based on the concept of acupuncture points and is verified by more than 20 years of clinical experience by hundreds of medical doctors and researchers with many thousands of patients.

Bio-Well is not a medical instrument, it is not designed for medical diagnostics, it measures energy and stress of a person. In case of health concerns, please, consult your doctor.

Area diagram

Reflects energy re-distribution for different organs and systems based on Area parameter.



Color	Name	HS left	HS right
	2025-04-13 10_01 - Brian	0.45	0.42
	2025-04-13 10_58 - Brian	0.57	0.44

Disbalance between left and right diagrams means:

- temporary reaction to some stress = adaptation process;
- person may be in the process of recovery from the illness or is getting ill;
- problems are created on conscious level = person is inventing problems for himself/herself => much more problematic sectors on the right diagram in comparison to the left;
- problems are on subconscious level = they were recorded some time ago and he/she already doesn't remember about them => much more problematic sectors on the left diagram in comparison to the right.

HS parameter (Integral Area) – mathematically is equal to average value of the diagram; it is the level of adaptation of organism to inner (psycho-physiological) and external (stress, food, ecology, etc.) influences; character of metabolism; vital resources.

Very Low Integral Area [-2.0>-3.0]

- Low capacity to work;
- High weakness;
- Exhaustion of resources;
- Complication to concentrate;
- High level of perspiration.

- Lability of psychic;
- Unstable mood;
- May be defects of capture.

If very low level of Integral Area stays for a long time then it means:

- Dysfunction of inner organs and systems;
- Malfunction of vegetative balance;
- Metabolic disturbance.

Low Integral Area [-0.6>-2.0]

- May be norm for some people;
- Tiredness;
- Irritability;
- Decreasing of adaptation;
- Low possibility of changing in new conditions;
- Hard to compensate disease;
- Deficiency of energy.

Normal Integral Area [-0.6>1.0]

- Optimal adaptation;
- Balanced power inputs and energy consumption.

High Integral Area [1.0<2.0]

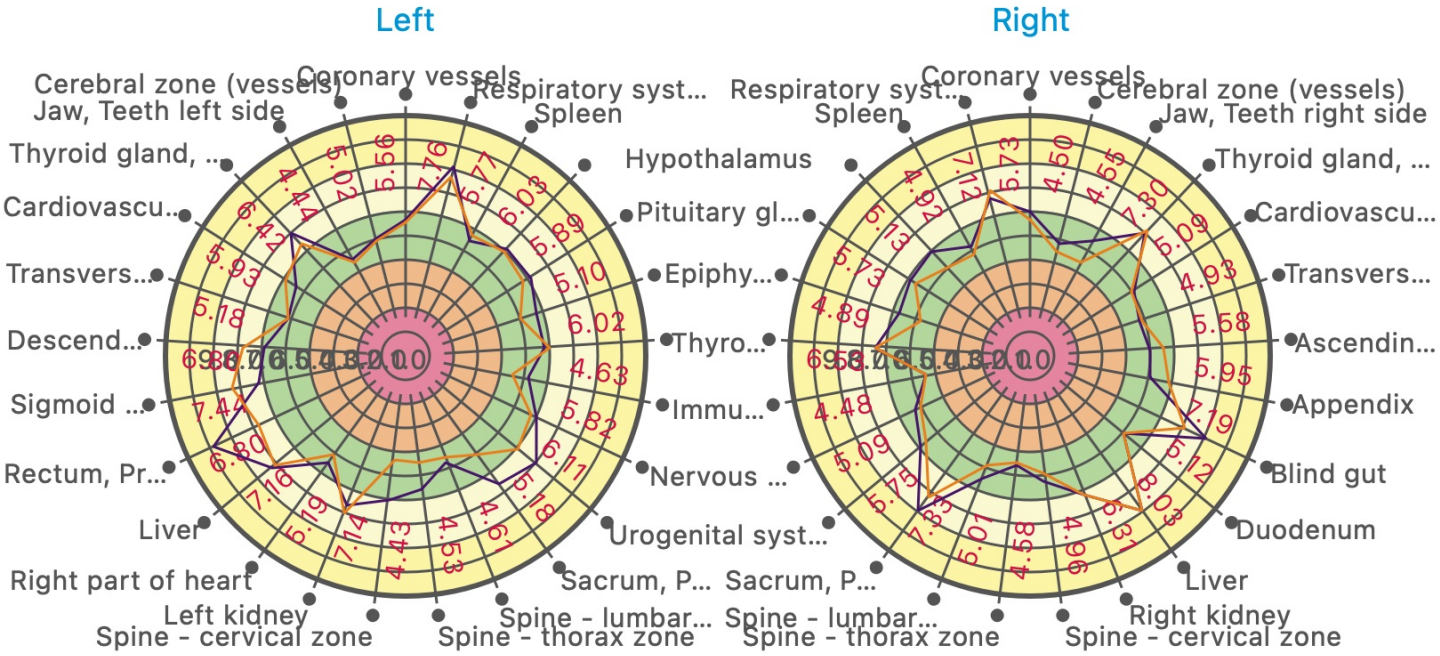
- May be norm for some people;
- Physiological tension, reflected high load on the system;
- Over reaction (for example, physical training);
- Activation of systems and organs;
- State of a healer during work.

Very High Integral Area [2.0<3.0]

- Significant tension/stress of adaptation and energy-supply systems;
- Hyper reaction with possible derangement of adaptation
- (temperature, inflammation);
- Presence of inflammatory processes in the body.

Bio-Well is not a medical instrument, it is not designed for medical diagnostics, it measures energy and stress of a person. In case of health concerns, please, consult your doctor.

Energy diagram



Color	Name	Energy diagram
	2025-04-13 10_01 - Brian	94%
	2025-04-13 10_58 - Brian	100%

The Energy diagram is designed for analysis of the functional state of the human body, by calculating the Energy parameter of the particular sector (energy of the glow). "Energy reserve" parameter (experimental) reflects energy reserve at the cellular level.

Value on the Energy diagram can be:

0 - 2 Joules (×10^{-2}) - low energy
2 - 4 Joules (×10^{-2}) - lowered energy
4 - 6 Joules (×10^{-2}) - optimal energy
6 - 8 Joules (×10^{-2}) - increased energy
8 - 10 Joules (×10^{-2}) - hightened energy

Disbalance between left and right diagrams means:

- temporary reaction to some stress = adaptation process;
- person may be in the process of recovery from the illness or is getting ill;
- problems are created on conscious level = person is inventing problems for himself/herself => much more problematic sectors on the right diagram in comparison to the left;
- problems are on subconscious level = they were recorded some time ago and he/she already doesn't remember about them => much more problematic sectors on the left diagram in comparison to the right.

*Energy reserve (experimental parameter):

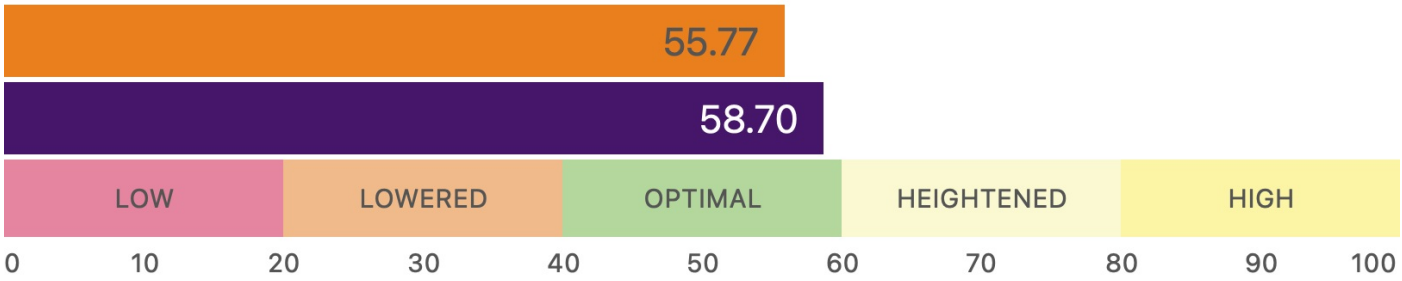
< 20% - low level
from 20% to 60% - optimal level
> 60% - high level

Bio-Well is not a medical instrument, it is not designed for medical diagnostics, it measures energy and stress of a person. In case of health concerns, please, consult your doctor.

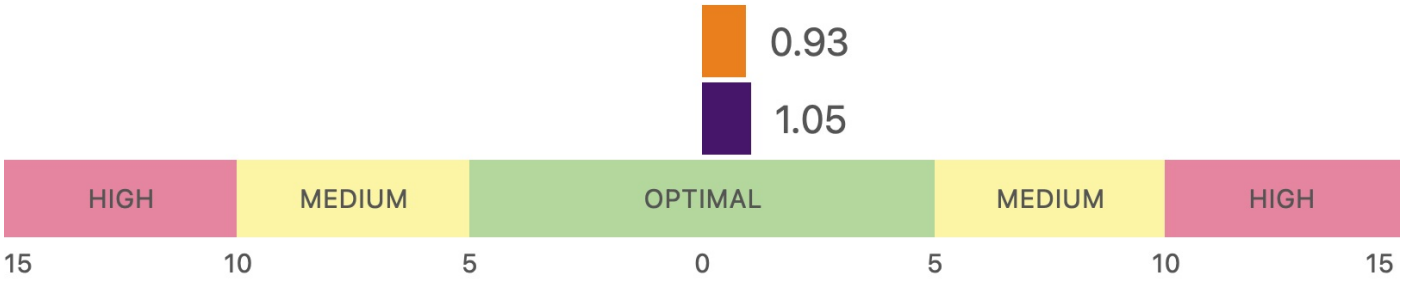
Analysis

STRESS

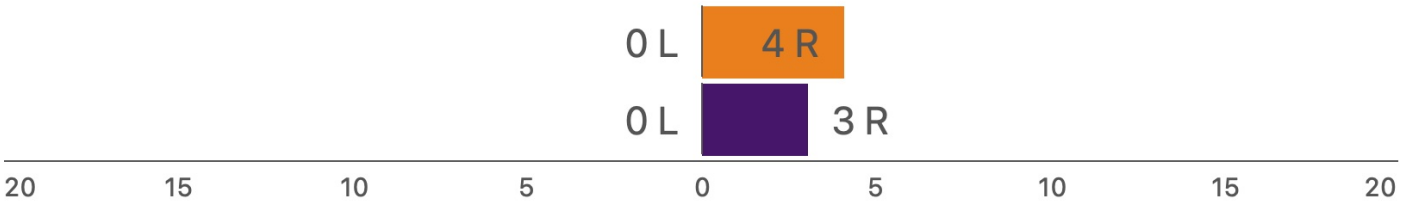
ENERGY



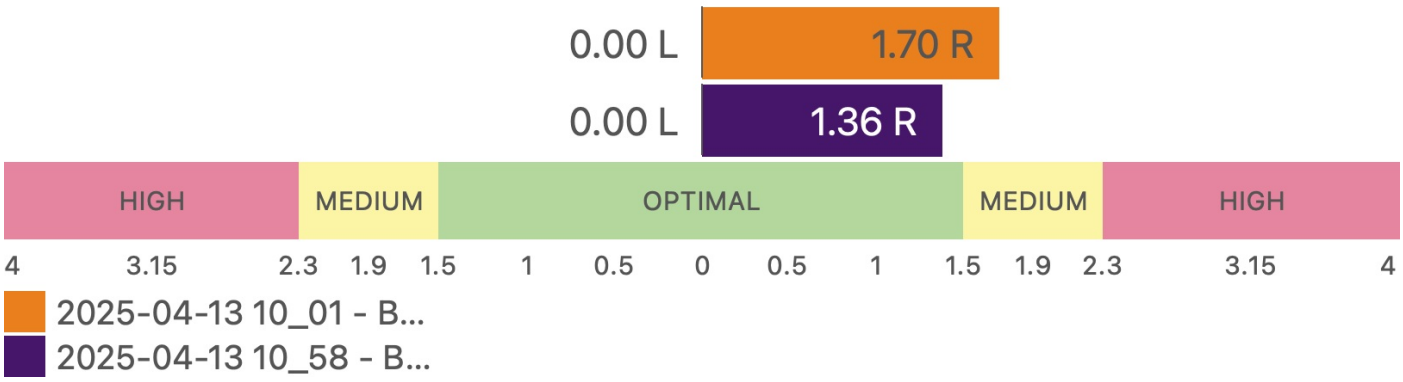
ORGANS DISBALANCE, %



NUMBER OF ORGANS IN DISBALANCE, N



AVERAGED DISBALANCE ENERGY, JOULES (×10⁻²)



Stress – level of organism involvement in stress-adaptation on psychological and physiological levels; «level of stress» speed of reaction to the external influences; level of tiredness/activity.

Calm [0.0>2.0]

- very calm person;
- meditative state;
- slow / deferred response, sluggishness;
- medicaments, drugs or alcohol influence;
- introversion.

Optimal [2.0>3.0]

- Normal state with normal reaction to the external influences.

Increased [3.0>4.0]

- Normal state, but with activation of reaction to the external influences.

High [4.0>6.0]

- compensated stress;
- active emotional type (cholerics);
- emotional excitation;
- reaction to physical load and/or uncomfortable environment.

Very high [6.0>8.0]

- high emotional excitement;
- emotional overload;
- uncompensated stress;
- activation of physiological processes;
- physiological tiredness, exhaustion;
- reaction to high air temperature.

Excessive [8.0>10.0]

- too high stress;
- psychological problems;
- inadequate state;
- reaction to alcohol, drugs, medicaments;
- reaction to a very high air temperature;
- extreme exhaustion.

Energy – overall energy level of organism.
Low [0-20] – exhaustion, high stress state, obligatory to rest.
Lower [20-40] – tiredness, medium stress state, need to rest.
Optimal [40-60] – optimal energy level for most types of activities; small stress (closer to 40).
Heightened [60-80] – mobilization of inner energy reserves; inflammatory processes; hyperactivation.
High [80-100] – acute inflammatory processes; strong hyperactivation.

Organs disbalance – disbalance of the overall energy of organs and systems (present on both hands) between left and right hands, represented in % of difference between two hands. Directly connected to the «Balance» tab. This parameter can be used for assessment of sympathetic/parasympathetic domination.
Left hand is connected with the right hemisphere of the brain and excitation, activation processes.
Right hand is connected with the left hemisphere of the brain and energy saving, slowing down processes.
Optimal (0-5%) - optimal disbalance between left and right sides;
Medium (5-10%) - average disbalance – temporary adaptation of the organism to the internal or external processes;
High (10-15% and higher) – high disbalance – adaptation to some extreme conditions, or internal problems.

Number of organs in disbalance – number of organs with dominance of the left or right hand higher than 20% (as on the «Balance» tab). Number is calculated for both sides separately.
In example, 1L / 3R means that there is 1 organ with left hand dominance and 3 organs with right hand dominance.
Coloring of the scale is applied according to the following scheme:
AD (Average Disbalance) – number of organs/systems with disbalance between 20% and 40%;
HD (High Disbalance) - number of organs/systems with disbalance higher than 40%.
Green color: HD = 0, AD = 0 to 5.
Yellow color: HD = 0, AD = 6 to 15.
Orange color: HD = 1-3 or AD is more than 16 organs/systems.
Red color: HD = 4 or more.
Thus, by looking at this scale one can understand how many disbalanced organs/systems there are in the body + understand how *relatively significant (in %)* are these disbalances.

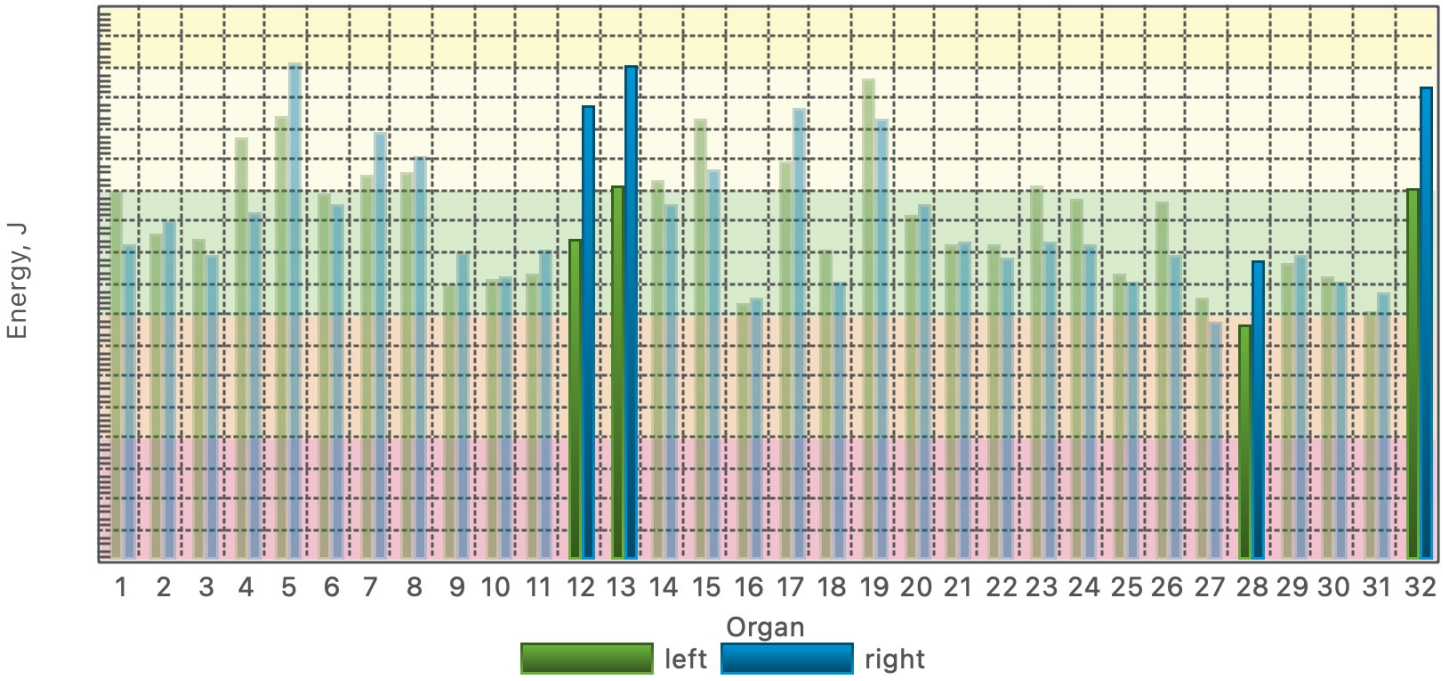
Averaged disbalance energy – presents the average Energy of the dominance of the organs/systems mentioned in the previous scale (Number of organs in disbalance).

This parameter gives you additional information – *absolute level of disbalance in Joules*. By looking at it you can understand how big, Energy wise, is the disbalance in the organism.

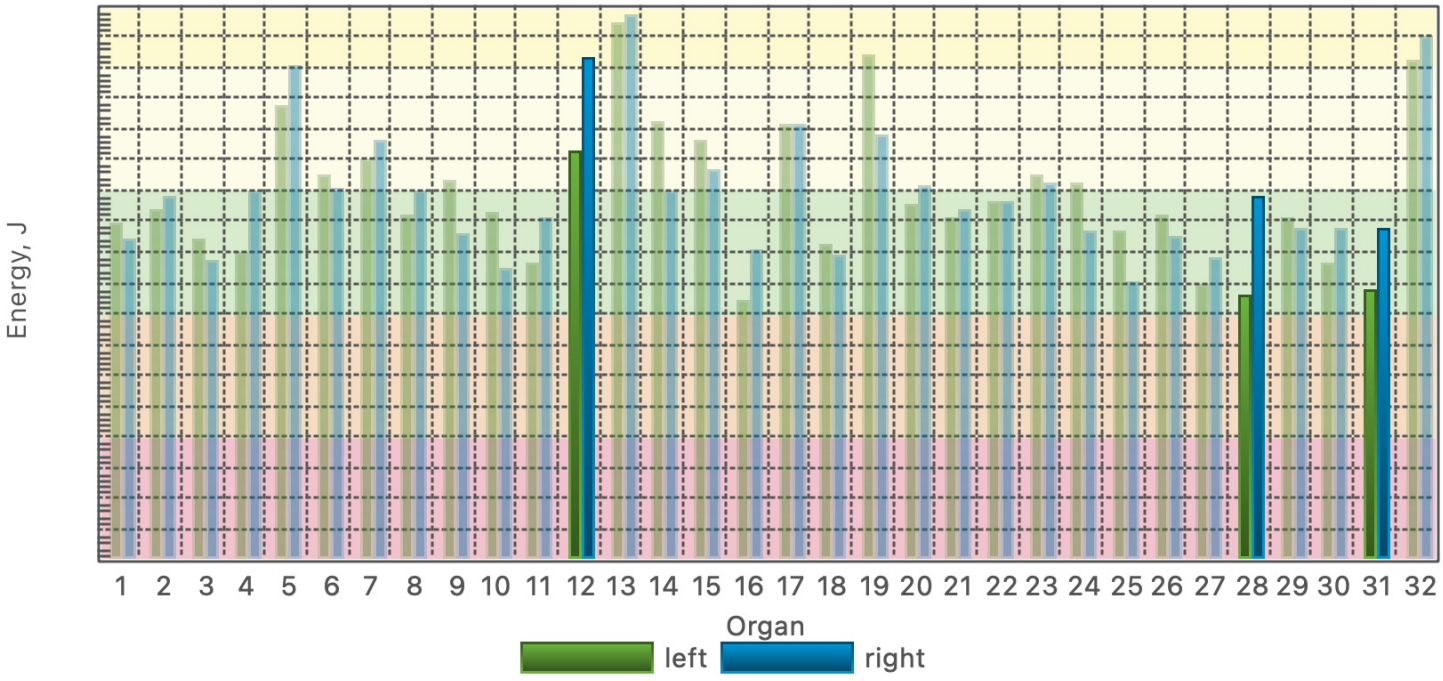
Bio-Well is not a medical instrument, it is not designed for medical diagnostics, it measures energy and stress of a person. In case of health concerns, please, consult your doctor.

Energy balance

Brian 2025-04-13 10:01:41



Brian 2025-04-13 10:58:10

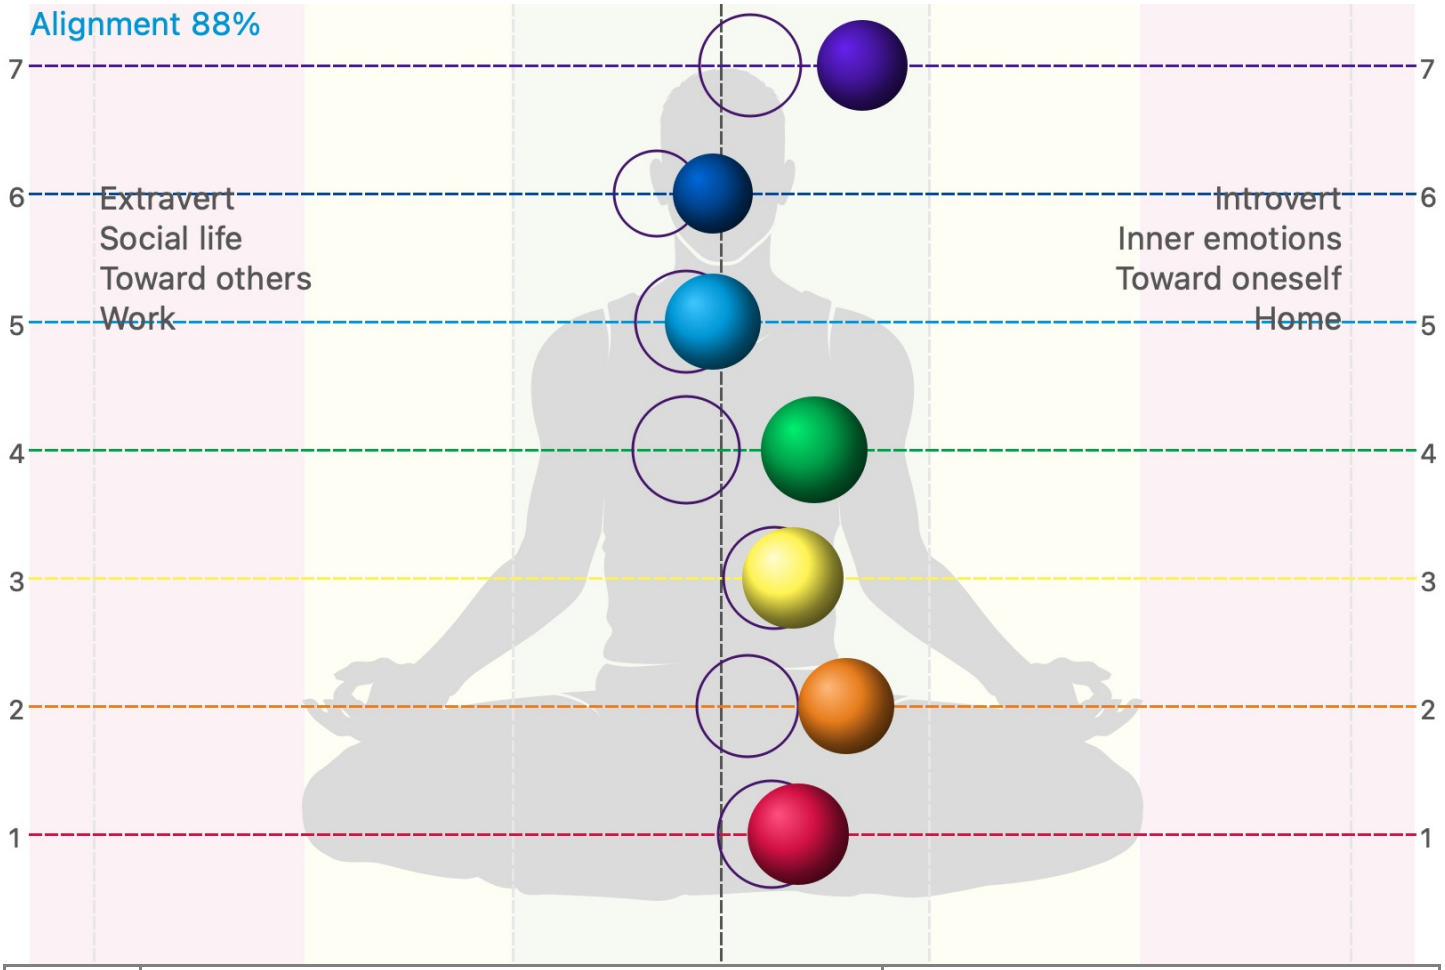


1. Cardiovascular system 2. Heart 3. Colon - transverse 4. Pancreas 5. Liver 6. Pituitary gland 7. Thyroid gland 8. Adrenals 9. Spine - cervical zone 10. Spine - thorax zone 11. Spine - lumbar zone 12. Sacrum 13. Coccyx, Pelvis minor zone 14. Urogenital system 15. Kidneys 16. Ears, nose, maxillary sinus 17. Throat, larynx, trachea 18. Cerebral zone (vessels) 19. Respiratory system 20. Coronary vessels 21. Thorax zone 22. Epiphysis 23. Hypothalamus 24. Nervous system 25. Immune system 26. Spleen 27. Right eye 28. Left eye 29. Jaw, Teeth 30. Cerebral zone (cortex) 31. Eyes 32. Prostate

Highlighted bars correspond to significant difference (more than 20%) between energy of the particular system or organ on the left and right hands.

Bio-Well is not a medical instrument, it is not designed for medical diagnostics, it measures energy and stress of a person. In case of health concerns, please, consult your doctor.

Chakras



Color	Name	Alignment
	2025-04-13 10_01 - Brian	88%
	2025-04-13 10_58 - Brian	93%

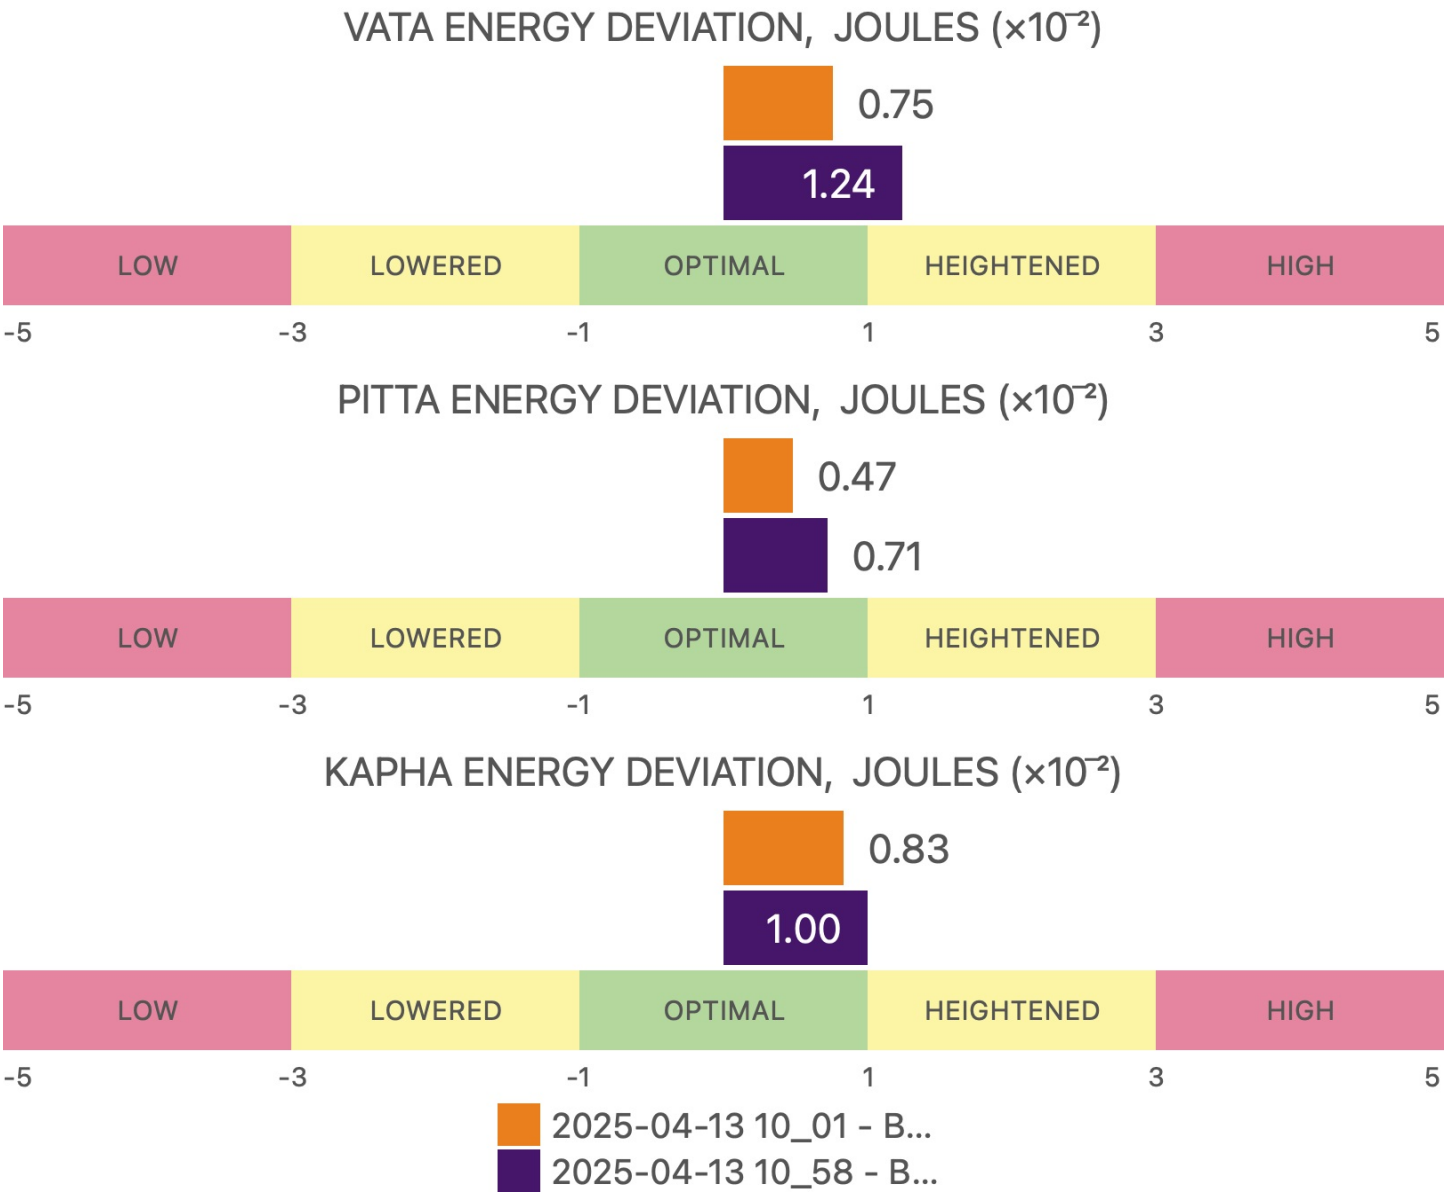
Bio-Well is not a medical instrument, it is not designed for medical diagnostics, it measures energy and stress of a person. In case of health concerns, please, consult your doctor.

Chakras

Psychosomatic approach. Connection of energetic state of organs with psychological state.
Energy centers (or Chakras) are correlated with the organs and systems situated in different parts of the body.
Chakras tab is not using the same sectors as all the rest of the tabs in the Bio-Well software (that you can see on the "Fingers" tab). Chakras sectors are based on Ayurvedic medicine.
Size of the center – level of energy of the corresponding sectors.
Balance of the center (Left/right orientation) – is the difference between the energies of the corresponding sectors on the left and right hands.
Grey/Green corridor on the graph – norm. Yellow corridors – average deviation – take into consideration. Red corridors – high deviation – pay maximum attention.
Left side of the screen – social life, extraversion. Right side of the screen – private life, introversion.
Chakra 1 - Red – self-confidence, sexual power.
Extreme introversion – shy and not self-confident person.
Extreme extraversion – too self-confident person, searching for proofs of his/her superiority.
Chakra 2 - Orange – material work, job or home.
Extreme introversion – don't want to go out of home, evading problems on work.
Extreme extraversion – don't want to return home from work, evading house problems.
Chakra 3 - Yellow – willingness to solve problems (personal or other's).
Extreme introversion – not eager to help others, concentrated on personal problems.
Extreme extraversion – eager to help anyone just not to work on personal problems.
Chakra 4 - Green – love, sympathy, empathy.
Extreme introversion – egoist.
Extreme extraversion – altruist.
Chakra 5 - Light blue – non-material work (art, painting, poems composition), verbal communication.
Extreme introversion – non-communicative person, not sharing his/her art with others.
Extreme extraversion – non-stop talking, show-off person.
Chakra 6 - Blue – approach to solving tasks and search of information.
Extreme introversion – thinks that there is only one right opinion – own, all others are not.
Extreme extraversion – doesn't have own opinion, always ask for help in any situation.
Chakra 7 - Magenta – relations with God, fanatic or atheist.
Extreme introversion – thinks that he/she can do anything and there will be no consequences.
Extreme extraversion – waits when God will solve his/her problems.

Bio-Well is not a medical instrument, it is not designed for medical diagnostics, it measures energy and stress of a person. In case of health concerns, please, consult your doctor.

Doshas



Deviation
2025-04-13 10_01 - Brian: Vata: 15.03% Pitta: 9.45% Kapha: 16.65%
2025-04-13 10_58 - Brian: Vata: 24.79% Pitta: 14.22% Kapha: 19.90%

Ayurveda, an ancient system of medicine that originated in India, recognizes three fundamental energies or doshas that govern the physiological and psychological functions of the human body. These doshas are known as Vata, Pitta, and Kapha. According to Ayurvedic philosophy, everyone has a unique combination of these doshas, known as their Prakriti (constitution), which influences their physical, mental, and emotional characteristics. Imbalances in the doshas are believed to be the root cause of various health issues.

Vata

Associated with the elements: air and ether (space)
Governs: movement, including breathing, circulation, and nerve impulses
Connected with the following organs: colon, brain, thighs, bones, kidney, urinary bladder, pancreas
Characteristics of imbalance may include: anxiety, insomnia, dry skin, and digestive issues
To balance, Ayurveda recommends: warm and nourishing foods, routine, and practices that promote grounding and relaxation

Pitta

Associated with the elements: fire and water
Governs: digestion, metabolism, and energy production
Connected with the following organs: small intestine, liver, spleen, gallbladder, kidney, heart, pancreas
Characteristics of imbalance may include: irritability, inflammation, acidity, and skin issues
To balance, Ayurveda recommends: cooling and soothing foods, mindfulness, and activities that promote a calm and composed state

Kapha

Associated with the elements: earth and water
Governs: structure and lubrication in the body
Connected with the following organs: stomach, lungs, pericardium, triple warmer, urinary bladder, pancreas
Characteristics of imbalance may include: lethargy, weight gain, congestion, and respiratory issues
To balance, Ayurveda recommends: warm and light foods, regular exercise, and activities that promote stimulation and warmth

Bio-Well is not a medical instrument, it is not designed for medical diagnostics, it measures energy and stress of a person. In case of health concerns, please, consult your doctor.

Bio-Well device has been developed by an international team led by Dr. Konstantin Korotkov and brings the powerful technology known as Electro-Photonic Imaging or Gas Discharge Visualization (EPI/GDV) to market in a more accessible way than ever before. Bio-Well has been specifically developed to allow a user to quickly and easily conduct human energy scans. EPI/GDV Technique is the computer registration and analysis of electrophotonic emissions of different objects, including biological (specifically the human fingers) resulting from placing the object in the high-intensity electromagnetic field.

When a scan is conducted, a weak electrical current is applied to the fingertip for less than a millisecond. In response to this stimulus fingertip emits electrons, which are striking and exciting air molecules. Excited air molecules create gas discharge or glow. This glow is captured by the videocamera and then digital image of the glow is processed by the Bio-Well Software to show energy & stress evaluations. Each scan returns a wealth of meaningful information to provide you with a truly holistic view of the state of your wellbeing.

The image created in Bio-Well Software is based on the concept of acupuncture points and is verified by more than 20 years of clinical experience by hundreds of medical doctors and researchers with many thousands of patients.
