

SAKER

# Saker Mining Group

## Our People – Your Capability

Saker's value lies in its people—experienced professionals with deep capability across:

- Project, operational and technical services
- Mining, civil and infrastructure engineering (including smart mining)
- Commercial, compliance and external affairs

Our teams have led remote operations, managed complex assets and delivered where safety, governance and schedule certainty are critical. We integrate seamlessly with organisations and help build capability for long-term success.

**Saker Mining Group is an Australian owned specialist mining services company delivering integrated study, development and execution solutions for global mining clients.**

Founded by senior leaders from Australia's mining, infrastructure and professional services sectors, we provide high confidence outcomes in complex, remote and highly regulated environments.

Lean by design and backed by over 100 years of combined global leadership experience, Saker mobilises rapidly, embeds seasoned decision makers close to delivery, and maintains strong governance, safety and operational discipline while always seeking to innovate.

With an in Kingdom presence and strong growth ambitions, Saker supports Saudi Arabia's Mining Strategy and Vision 2030 by accelerating project approvals, reducing delivery risk and building long-term in Kingdom mining capability. We partner with government, SOEs and private developers to advance projects from discovery through to production.

## Australian Expertise. Global Capability.

Australia's resource sector is recognised for delivering remote, technology-enabled mining operations under strict regulatory, safety and environmental frameworks—conditions closely aligned with the requirements of Saudi Arabia's modern mining industry.

Saker brings:

- Efficient asset and portfolio studies and development pathways
- Strong governance, compliance and risk discipline
- Mature safety and risk management systems
- Smart mining technology and innovation expertise
- Proven delivery in remote and extreme environments
- Long life asset and closure planning

- Power generation and distribution (including off grid)
- Water sourcing, distribution and management
- Communications systems for remote or stranded assets

## How We Work

Saker operates through a lean, senior-led model that enables rapid mobilisation, efficient scaling and clear accountability. We work effectively with international operators, joint ventures, EPC/EPCM contractors and regulators across complex operating environments.

By integrating technical studies, approvals support, early works, operations, infrastructure and utilities, Saker reduces interface risk and accelerates project delivery.

Saker Mining Group is built for clients who value innovation, experience, governance, safety and practical execution in challenging environments.
