ABOUT US

Healthy Living With A Vision Foundation sees a world where there are no health care disparities in groups of people because of race or economic situation. The foundation sees a society where individuals are empowered and manage their own good health and wellness with knowledge and innovative technologies. Each month we host virtual town hall meetings to educate the community and eliminate health disparities. Our recent town halls have focused on increasing awareness of and education about COVID-19 stigma. We've also focused on expanding our community health partnerships to help address social determinants of health including discussing low vision, hypertension, diabetes, and other important topics.

OUR MISSION

We are committed to transforming health disparities in historically underserved communities. By empowering individuals through health education, and economics the Foundation will assist in removing systemic barriers of access to care. The Foundation will utilize cutting-edge technologies and research to provide robust healthcare.

OUR VISION

We see a world where there are no health care disparities in groups of people because of race or economic situation. The foundation sees a society where individuals are empowered and manage their own good health and wellness with knowledge and innovative technologies.

ABOUT OUR TOWN HALL FORUM

Lessening health disparities need intentional effort. Our aim is to address determinants of health coverage, chronic health conditions, mental health, and mortality. It is factual that African Americans, Latinx Americans, and Native Americans are affected more than others. Based on this evidence, we bring top health experts together through our monthly town hall series to raise awareness and discuss how health issues impact our communities. Participants receive facts, trusted information, and resources.

MEET OUR LEADERSHIP TEAM
