

A Plan to Unite Americans by John G. Curry

Most efforts that are worthwhile require time, work, and money. Those who choose to spend money to help in this effort to create the proposed network might spend between \$15 - \$200, or more, depending on their choices and abilities. The amount of time, effort, and money that members choose to put into using the network will vary too, depending on their choices and options. Different members might use the network in different ways. Organized by zip codes, members might exercise shared power on national, state, county, and local levels to accomplish all sorts of goals.

My short book, *The New Revolutionary War: An American Firefighter's Dream to Help Save Humanity* (2005), proposes a peaceful revolution to change our dysfunctional socioeconomic situation. The Idea (The Weapon), in a war against "the enemies of every community", is explained in Chapter 4 of my book. The "enemies" are selfishness, separation, and ignorance.

Recommended actions for those who want to help create the American network:

- Read *A Plan to Unite Americans* by John G. Curry (was 1 page, now 2).
- Visit my websites to learn more about me, my Idea, and my plan.
- Watch my video (<8 minutes). I'm an introvert so don't expect to be wowed.
- Read *The New Revolutionary War* (maybe < 2 hours). My book text is free to read or download on my websites and my book is available at Chicago Public Library locations or for purchase at online retailers (Amazon.com or others).
- Decide on supporting this effort to create the network for Americans and/or joining the network once it has been created, if you are Americans.
- Purchase 1-3 copies of *The New Revolutionary War*, (\$11.95 list price), to help raise initial funds. Maybe, they might be souvenirs of a historic effort.
- Read and understand my Step 1. Royalty Sharing Offer (on my websites).
- Share and discuss my Idea, my plan, and this effort, with Americans you know, and with other people all over the world, who might be interested in supporting the creation of the American network, joining it if they are qualified, or creating similar networks for their use in their Countries.

If the lower fundraising goal in Step 1 (\$5,000,000) is reached, I will express that on one or both of my websites. Only at that point, will I start working on Steps 2, 3, and 4 of my plan, while we try to reach the upper fundraising goal (\$100,000,000). The custom-designed communication system will cost a lot of money. During Step 5, I/we will notify qualified prospective members (Americans) of how to formally join the network and start the enrollment. During Step 6, the main communication system will be designed and created, and the bylaws will be finalized. Preferably, members will be employed to manage and otherwise work for our organization, so they might care for it and protect it. Step 7 is when we start learning, using, and possibly customizing our new tools and systems more, to meet our needs and wants.

Thank you for your consideration. I hope that you support and/or join this effort.
