Volunteer firefighters are on the decline

- The Decline of the volunteer firefighter is estimated to be from around 300,000 volunteers in Pennsylvania in 1970 to around 38,000 in 2018.
- Volunteers are needed to maintain safe and consistent operation of your local volunteer fire department.
- Communities are at risk. Nationwide delays in response times are increasing as the number of volunteer firefighter's decline.

No Prior Experience?

Prior experience is not required. We offer all training and education to build you into a new volunteer firefighter.

Training in rescue, all levels of firefighting and fireground support.

Firefighters with all types of skills and abilities are needed. [Contact us today.](#)

A place for everyone

- Entry Firefighter
- Exterior Firefighter
- Driver/Operator
- Accountability/Safety Officer
- Administrative support
- Junior Firefighters

History of GCFD

Grove City Volunteer Fire Department was founded on September 21, 1904. It was then the borough supplied funding for the first equipment. A hose cart was one of the first pieces of equipment in the department. (One can still be seen on display in the department display room at 395 E. Pine St.)

The first piece of motorized equipment operated by GCFD was in 1916. (Our 1925 REO Speed wagon, one of the early pieces of apparatus can still be seen on display with the hose cart.)

The department currently operates at 395 E. Pine St. with Two Engines, a Tower Ladder, and a Utility pickup truck.
