

## No Capital Cost

**CGE|Sustain** is a no capital cost solution to bring immediate and long-term savings as well as maximize your facility's energy and maintenance operating costs.

This Program includes an LED lighting upgrade, and if applicable, an on-site renewable energy generation system. This is all maintained and operated by CGE Energy.

The entire Program is 100% off balance sheet and is fully funded by CGE Energy requiring absolutely no capital expenditure or liability to you. Simply join our Program and allow us to build a new profit center for your company's bottom line.

## Integrated Energy Solution

 CGE Energy will engineer and install the best possible lighting solution for the interior and exterior of your facility. We primarily utilize industry leading Cree® LED lighting which produces a high quality, natural light with true-to-life color rendering.

 Where economically beneficial to the you, CGE Energy will install a renewable energy system, such as solar panels or wind turbines, to generate clean energy on-site. This will help hedge against future utility rate increases and market volatility.

 CGE Energy will guarantee the performance, operation and maintenance of all products for a full 10 years. If problems arise, notify our dispatch through your dedicated customer website portal and we'll have any problem resolved within 36 hours.

**Let us bring you lower, sustainable operating costs.**
