

Major Car Wash - Rahway NJ

Sea Ray Solutions installed the OEM flow management device at Major Car Wash on 9/26/12. Major Car Wash is the first Car wash in New Jersey to utilize FMD technology. Before the installation SRS ran a car through the car wash to prime the system upon opening. Then we read the meter. We ran the same 3 cars through the wash 4 times for a total of 12 washes. Then the meter was read. The valve was installed successfully. Another car was run through after the FMD was installed to prime the system. The same 3 cars were run through the wash 4 times for a total of 12 washes. All cars were washed using the same basic wash. After the final reading the results were 6 gallons per wash saved or a 28% savings

	Reading B -	Reading A	Usage	Gallons per Car
Pre Install	31488685.4	31488428.09	257.312	21.44
Post Install	31488909.06	31488724.3	184.756	15.40

Pre Install Usage -	Post Install Usage	Savings in Gallons per Car	divided by pre usage	Per Car Savings
21.44	15.40	6.05	21.44	28%

22.14 Gallons vs 15.40 Gallons
Equals 28% savings or 6 gallons Per CAR
