

BioWashing = \$\$\$

Kansas bean farmer John is amazed at the difference in root size and growth

John tested BioWashing one acre out of 20 acres.

The BioWashed acre is definitely out producing the 19 non-BioWashed acres.

Skeptical Missouri soy grower was amazed

His BioWashed plants are producing double and triple the number of nitrogen nodules.

Cation Exchange Exciter

The New Soil Science

Kansas soy grower is delighted. His BioWashed plants show double and triple his normal soybean yields
