Julien Souris is Fourchette's longtime partner-in-arms, cautious where Fourchette is bold and the one who thinks two steps ahead in any negotiation. The two men have fought and buried friends together for years, and out of that history they share a hard-earned rule, rarely spoken aloud but never broken: never die for someone else's cause again.

It is that rule, as much as the Marseilles ambush itself, that drives Souris to break away with Fourchette and follow him into Smyth's network afterward. Souris is the quieter of the two, watching from the doorway of the café while Fourchette closes the arrangement with Smyth directly, then crossing to take the vacated seat once the deal is done — content, as ever, to let Fourchette do the talking so long as the terms hold.

Like Fourchette and Devries, Souris stays clear of the events of The Lindberg Discovery entirely, walled off from that plot by the handler's own instruction. His story is reserved for Book 2.
