

# WE BUILD THE FLOW.

Redeemer Resources delivers turnkey HDPE pipe solutions designed for reliable, efficient fluid movement across drilling, completions, production, and environmental operations. From short-term rental to permanent transfer systems and facility builds, we engineer and install pipe networks that perform under pressure and stay on schedule.

## HDPE Supply & Deployment

- All sizes of HDPE Pipe sourced and Installed.
    - 3" and 4" Rental Inventory
  - Rapid mobilization across West Texas
- ## Certified Fusion & Installation
- Butt fusion, electrofusion, and Datalogging
    - Experienced and certificated field crews
  - Pressure-ready builds with available hydrotesting
    - Clean, organized site execution

## System Design & Planning

- Route layout and Hydraulic optimization
  - Flow rate coordination
  - Pipeline tie in and Repairs

- High-capacity transfer pumps matched to system flow requirements
  - Diesel and electric pump options available
  - Flow rate coordination to optimize transfer efficiency
- Portable power generation to support remote operations
  - Generator sizing based on pump and treatment load demands
  - Reliable power for continuous 24/7 field performance
    - Frac tanks and temporary storage solutions
    - Pump containments and equipment berm systems
- Staging and layout coordination for efficient site utilization
- Fully integrated with HDPE transfer systems and treatment programs
- One accountable team managing movement, storage, and power
