

**REDEEMER
RESOURCES**

SECONDARY CONTAINMENT

Redeemer Resources offers a complete line of containment berm systems engineered for fast deployment, dependable performance, and regulatory compliance. Whether you need flexible roll-on transportable berms or rugged hard-wall systems, or custom built site specific containments for long-term containment, our solutions protect your site from spills, leaks, and environmental exposure.

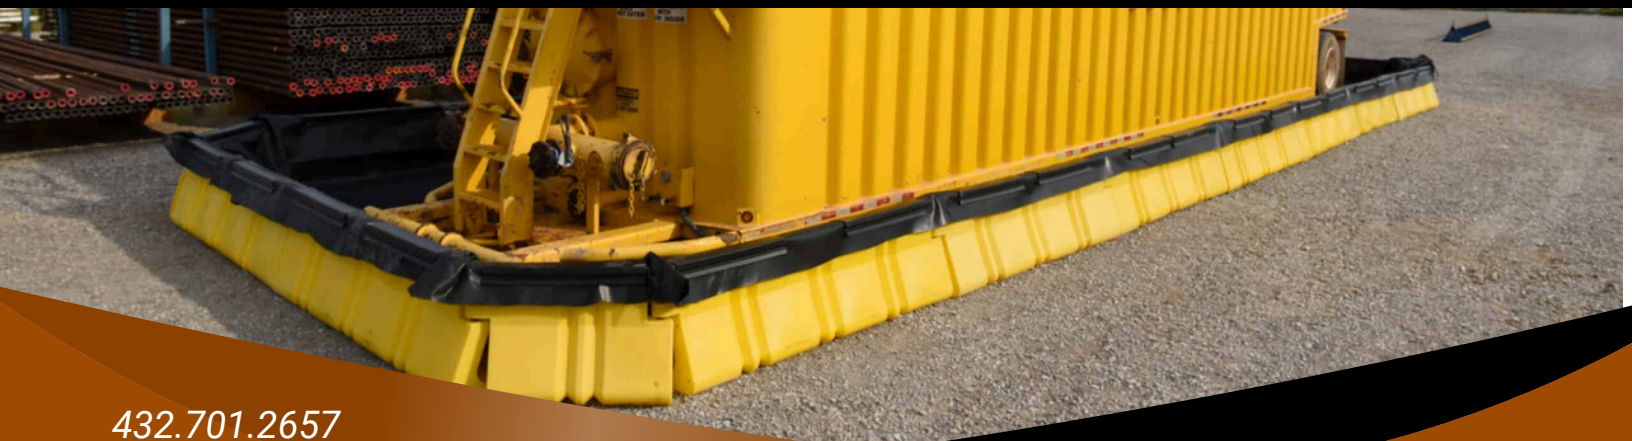

Roll on Containment

- *Drive-in/drive-out functionality – ideal for maintenance bays, fueling, and fluid transfer points*
- *Rapid deployment – unfolds and is ready in minutes, compact storage when not in use*
- *Versatile sizing – options for different equipment footprints and wall heights*
- *Heavy-duty materials – engineered to handle industrial work environments*
- *Portable & reusable – perfect for temporary workspaces and changing site needs*

Hard Wall Containment

- *Rigid wall construction – stable containment with enhanced spill capture capacity*
- *High-capacity systems – engineered for larger volumes and long-term installations*
- *Modular & customizable – sized and configured to match specific site layouts*
- *Industrial-grade materials – corrosion- and abrasion-resistant for demanding environments*
- *Permanent or semi-permanent use – excellent for fixed pads, yards, and dedicated storage areas*
