

Total Fluid Management Solutions

Serving the Permian, & Delaware Basins

Who We Are

Redeemer Resources is a West Texas-based oilfield services company delivering integrated fluid management solutions across drilling, completions, production, and environmental scopes.

We specialize in storing, moving, treating, containing, and protecting water — safely, efficiently, and compliantly.

Our crews bring field-tested experience, responsive leadership, and a culture built on accountability and execution.

Family Owned. Privately Held. Owner-Led Operations. Fully Insured. Safety and Compliance Focused.

Why Choose Us

Deep Industry Experience

Redeemer Resources is built on years of hands-on oilfield execution across the Permian Basin. Our leadership and field teams bring practical experience in scaling operations, managing multi-crew field deployments, and supporting high-demand drilling, completions, and production environments.

One Call Fluid Management

Redeemer Resources delivers a fully integrated fluid management solution — storing, moving, treating, containing, and protecting water through every phase of operations. Instead of coordinating multiple vendors, our clients make one call and gain a unified team responsible for execution, communication, safety, and performance. Streamlined coordination. Reduced downtime. Measurable results.

Community Involvement

Redeemer Resources is committed to serving the communities where we live and work. We actively support local initiatives, nonprofit partnerships, and volunteer efforts across West Texas. Our mission extends beyond the job site — we believe strong companies help build strong communities through service, stewardship, and meaningful engagement.
