

The world is adapting to AI (Artificial Intelligence),  
and I am campaigning for NI (Nature's Intelligence).

AI usually answers questions in seconds.  
NI, However...

Takes 7 days for a seed to germinate.

Another 70 days to flower and bear fruit.

Another 70 days to produce seeds.

[@vsanjai.com](https://www.vsanjai.com)

No AI agents to automate,  
Seamlessly achieved when micro-organisms coordinate.

No GPUs to train neural networks for deep learning,  
Just soil, sun, water, and little bit of human doing.

NI is counting on HI (Human Intelligence).

Human Intelligence , very well knows what to do.  
Whether it acts, or looks away, depends on you.!
