

I Found a Baby Mammal Now What?

If you find baby bunnies:

•If their nest has been damaged it can be repaired. Look for a shallow depression lined with grass/fur. Place babies in nest with light layers at grass to hide them. Leave the area, or the mother won't return. (Mothers return only at dawn & dusk.)

•If you find healthy bunnies that are 4-5 inches long, able to hop, with eyes open and ears up, they do not need help. They are able to survive on their own. Leave them alone. Questions? Call a wildlife rehabilitator.

If you find a seal pup or fawn:

•Mothers normally leave their babies to feed.

•If baby looks cold, hungry, diseased, or confused, or if dogs, other animals, or people threaten its safety, call a wildlife rehabilitator or park ranger.

•Otherwise, leave the baby alone and leave the area. The mother will not return if people or pets are present.
