LANDING PAGE

New Website with UX and SEO -
Otimizar o site para uma boa
experiência e tráfego orgânico.

In this UX design, dynamic images highlight the services, with brand colours seamlessly integrated across the project, text, and buttons. White space is strategically utilized to establish a clear visual hierarchy and enhance information absorption. The website maintains a clean, uncluttered layout, creating a more organized and calming experience. This approach allows users to navigate effortlessly, processing information smoothly and intuitively. To optimize SEO, the content includes targeted keywords, structured H1, H2, and H3 titles, and optimized image alt tags for improved search visibility and accessibility.
