Serves 4-8	

500g	\$800
Serves 8-16	

IMPERIAL OSCIETRA

Since olden times the donau delta has had one of the largest concentrations of Imperial Ocietra Sturgeons (*Acipenser Gueldenstaedtii*). Today we have created a sustainable way of farming this beloved species within it's natural habitat at the mouth of the Donau Delta.

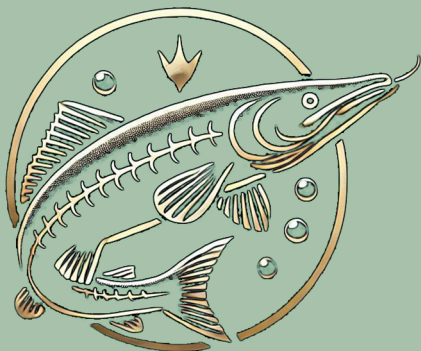

After reaching their mature age at 15 years our experts then harvest the caviar which then goes through a selection process in which we seperate the highest quality roe using the same ancestral methods they did for the emperors making it our Imperial Oscieta.

Imperial Oscieta caviar has a medium to large sized roe that comes in a dark Grey/Olive colour and has a sophisticated flavour profile with creamy, nutty and fruity undertones that burst in your mouth

*All priorly stated prices are in USD

*All items listed are subject to availability
