

- Not Order or Fund Branded
- Not competing with Life Science Contract
- Rapha 100% pure CBD Oils have been shown to be effective for anxiety, PTSD, sleeplessness, blood pressure, cholesterol, blood sugar, depression, ADHD, seizures, tremors, glaucoma, pain.

- RaphaRub products are sold online and in physician, therapist, physical therapy, chiropractor offices/clinics, spas, and boutiques. (Not sold in CBD Stores - they offer extremely diluted versions at terribly high prices; we choose to disassociate with such CBD outlets.)
- Rapha 100% pure CBD Oil is the only brand **made of just 1 ingredient** (100% pure CBD Oil), is **cold-pressed** (not processed with chemicals to increase output), **extra virgin** (utilizing only the 1st pressing - yielding nothing but the finest oil). Rapha CBD Oil is **not a tincture**; all other brands (we're aware of) are called "tinctures" (definition of "tincture" is "diluted down to between 10%-20%").
- RaphaRub CBD products represent the only brand (we're aware of) that **contains 0.00% THC.**
- RaphaRub relief products have been verified as having the **lowest retail price points** in the country.

Anyone who buys RaphaRub products through our site receives a 10% discount and a sponsoring Chapter/Unit will receive a donation from the net proceeds. As with all of our current partner products except Vapor Apparel, if the sponsoring chapter or unit number is not entered, the whole donation goes to the Fund.

Please visit our website (<https://mophfund.org/partners>) to learn more about RaphaRub and place your order to help the Order – and of course yourself as well.
