About Us:

Established in the peak of Covid, 2021, by a team of industry experienced sales and engineers with a goal to provide solutions support the print industry with a range of unique and niche print systems.

Built around the concept of premium inkjet systems and the integration of robotics and automation in the printing market place.

Inkdustrual's primary focus is printing as part of a manufacturing process.

From the printing of beverage cans to corrugated boxes, for last minute imprinting of product details in full colour to the high speed decoration of promotional products.

Inkdustrual is your partner of choice for your manufacturing needs.

Built of premium products supported locally.

Labels:

Cutting / Finishing Solutions

Our range of label finishing solutions includes roll feed cutting tables to roll to roll plotter systems all the way through to full laser cutting finishing lines.

Flatbed:

UV Desktop Series

NEW!

Our new small A3 flatbed printer is the development of years of experience by our partner manufacturer. Capable of UV Flatbed, roll and cylindrical print all in the one desktop unit.

Super Drop Series

Our range of Super Drop printers are capable of printing UV inkjet inks at a higher head gap than normal.

This allows for the decoration of unusual or irregular shaped items.

Available in the Mini at a 900mm x 700mm bed with 400mm height and the SD 2513 with a 2.5m x 1.3m bed with 100mm of height

www.inkindustrial.com.au

Flatbed:

iLB Pro Series

Production Speeds:
300-400m² per hour

The iLB Pro was designed to bring automation to the print industry with a key focus on productivity.

This system capable of both single or multi pass system designed for semi-rigid and rigid product printing and decoration.

Suitable for the sign graphics market through to interior or exterior panel printing.

Packaging Printers:

Our range of solutions for packaging and corrugated cardboard starts from basic entry level and covers all the way through to high productivity, high volume digital printing.

We represent a range of customer and a wide variety of solutions for full colour digital printing of cardboard and corrugated products

www.inkaustrial.com.au

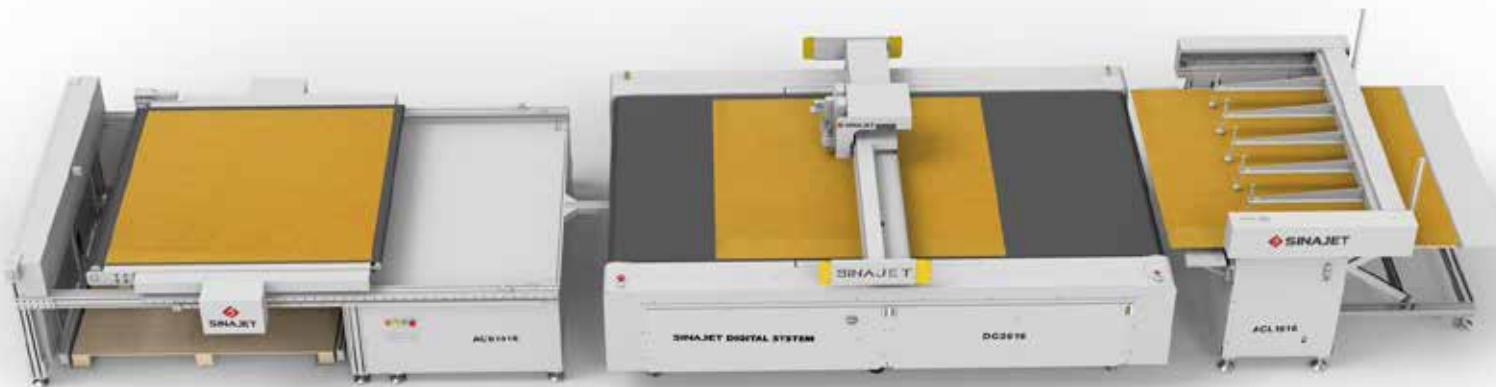

Flatbed - Cutters:

From small tables to automated production lines, we have a range of high performance cutting table.

Table sizes from 600mm x 400mm with auto sheet loader to 1.6m x 3m plus.

Direct to Object - bottle:

Starter Series

CX360

Also available with
automated loader

This series of direct bottle printers start as an entry level point into direct to object printing.

With production speeds starting from around 20 secs per item these unit offer a great return on investment without a large initial capital outlay.

Both machines are capable of full wrap prints with White, CMYK + Varnish

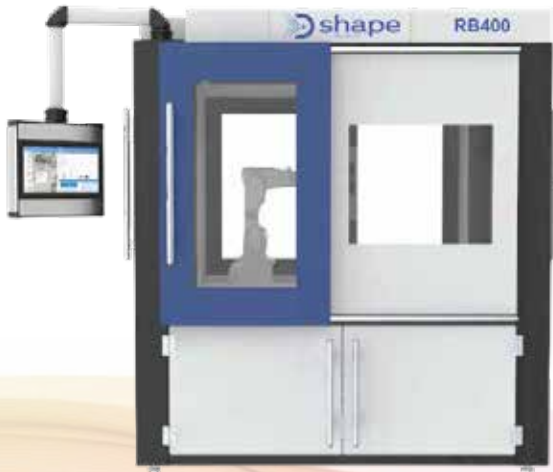

R6
Bottle / Can printer

Direct to Object :

Pro Series

From obscure sizes to production levels of over 3000+ per hour, we have a range of solutions for plastic tubes, aluminium cans to bottles and beyond.

Global partners that are reshaping the industry

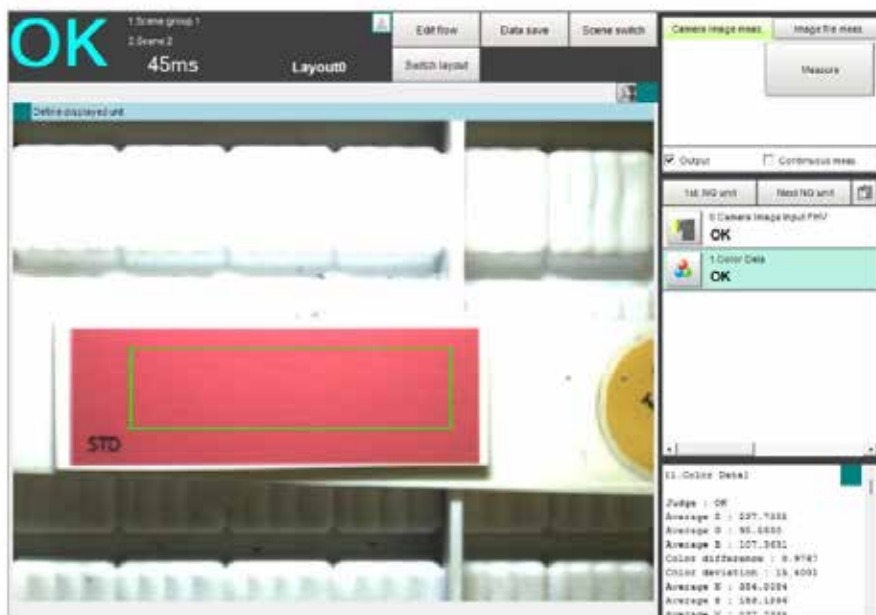

www.inkindustrial.com.au

Automation and Robotics

From automation and robotic loading of a flatbed printer, to the precision loading of a jig prior to printing. From Automated surface cleaning and pre-treatment with a plasma unit through to vision inspection of a printed item.

Talk with our team today about improved productivity, quality assurance and the reduced reliance on the human variable.

Consumables:

We carry a range of consumables for the traditional market through to new digital platforms:

Blank Label Stock

Die Cut label Stock

Thermal Transfer Ribbons

Toner

Alternative UV digital ink

Primers for UV digital printing

UV Screen Printing Inks

Solvent Based Screen Inks
