## Required Minimum Distributions (RMDs)

Defined Contribution Plans
IRAs including SEP, SIMPLE and SARSEP IRAs (e.g. 401(k), profit-sharing, and 403(b) plans)

When do I take my first RMD (the required beginning date)?

You must take your first RMD by April 1 of the year following the year in which you turn 701⁄2, regardless of whether you are still employed.

April 1 of the year following the later of the year you turn $701 / 2$ or the year you retire (if allowed by your plan). If you are a $5 \%$ owner, you must start RMDs by April 1 of the year following the year you turn 701⁄2.
When do I reach age 701/2?
You reach age $701 / 2$ on the date that is six calendar months after the date of your 70th birthday. See Example \#1 and Example \#2, next page.

What is the deadline for taking subsequent RMDs after the first RMD?
After the first RMD, you must take subsequent RMDs by December 31 of each year beginning with the calendar year containing your required beginning date. See Example \#3, next page.

## How do I calculate my RMD?

Your RMD is generally determined by dividing the adjusted market value of your IRAs as of December 31 of the preceding year by the distribution period that corresponds with your age in the Uniform Lifetime Table. See Uniform Lifetime Table and Joint Life and Last Survivor Expectancy Table, next page.
If your spouse is your sole beneficiary and is more than 10 years younger than you, you will use the Joint Life and Last Survivor Expectancy Table.

Same as IRA rule.

Same as IRA rule. Your plan sponsor/ administrator should calculate the RMD for you.

| How should I take my RMDs if I have multiple accounts? |  |
| If you have more than one IRA, you must calculate the RMD for each IRA separately each year. However, you may aggregate your RMD amounts for all of your IRAs and withdraw the total from one IRA or a portion from each of your IRAs. You do not have to take a separate RMD from each IRA. | If you have more than one defined contribution plan, you must calculate and satisfy your RMDs separately for each plan and withdraw that amount from that plan. Exception: If you have more than one 403(b) tax-sheltered annuity account, you can total the RMDs and then take them from any one (or more) of the tax-sheltered annuities. |
| May I withdraw more than the RMD? |  |
| Yes, an IRA owner can always withdraw more than the RMD. You cannot apply excess withdrawals toward future years' RMDs. | Same as IRA rule. |
| May I take more than one withdrawal in a year to meet my RMD? |  |
| You may withdraw your annual RMD in any number of distributions throughout the year, as long as you withdraw the total annual minimum amount by December 31 (or April 1 if it is for your first RMD). | Same as IRA rule. |
| What happens if I do not take the RMD? |  |
| If the distributions to you in any year are less than the RMD for that year, you are subject to an additional tax equal to $50 \%$ of the undistributed RMD. | Same as IRA rule. |
