RULES ARE FOR A REASON.....

In a bustling town, young Sam, merely 14, was hurrying back from his evening coaching class on his bike. Caught in his own world, he accidentally scraped the side of a moving auto. Startled, the auto driver honked and tried to stop him, urging him to wait. Fear gripped Sam, and instead of facing consequences, he sped off. The auto driver, determined, chased him down and confronted him, emphasizing the danger of such impulsive actions that could harm others.

A small crowd gathered, tensions rising as the auto driver scolded Sam for his reckless behaviour. Angry voices filled the air as Sam's father rushed to the chaotic scene along with a few of his friends and defended his child. What followed was a tussle between the two parties, the auto driver with his colleagues and Sam's father with his friends, escalating the situation further.

This chaotic episode underscores the repercussions of breaking rules, especially when it comes to underage driving. The underdeveloped reflexes of young individuals make them prone to such incidents. It serves as a poignant reminder that certain privileges, like driving, should be earned at the right time, not rushed into.

With parents and children need to grasp the importance of adhering to rules and regulations, understanding that safety and responsibility go hand in hand. Let this anecdote be a lesson in patience, maturity, and the need to wait for the right moment for things to fall into place.

WIMBLEDON- TENNIS TOURNAMENT

Carlos Alcaraz wins Wimbledon by beating Novak Djokovic and now owns 4 Slam titles at age 21.

A peep into the past: Wimbledon History

The Wimbledon Championships, commonly called Wimbledon, is the oldest tennis tournament in the world and is widely regarded as the most prestigious.

The first Wimbledon championship was held in 1877 on one of the croquet lawns of the All England Croquet and Lawn Tennis Club (since 1899 the All England Lawn Tennis and Croquet Club).

In 1884 a women's championship was introduced at Wimbledon, and the national men's doubles was transferred there from Oxford.

Mixed doubles and women's doubles were inaugurated in 1913.

FACTS

INTERESTING FACTS:

#Even though dragonflies have six legs, they cannot walk.

Sea otters have the thickest fur of any mammal, at 1 million hairs per square inch.

An oak tree produces about 10 million acorns during its lifetime.

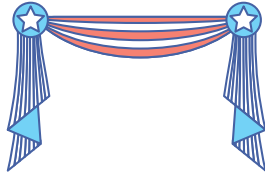

A snail's mouth is no larger than the head of a pin, but it can have over 25,000 teeth.

A grasshopper's ears are found not on its head, but rather, on its belly.

To make one pound of honey, honey bees must gather nectar from nearly 2 million flowers.

SPECIAL DAYS

20 July – International Chess Day

21 July- Guru Pournima

22 July- National Flag Day/ National Mango Day

24 July - National Thermal Engineer Day

25 July - World Embryologist Day

25 July (4th Thursday in July) - National Refreshment Day

26 July - Kargil Vijay Diwas

28 July - World Nature Conservation Day

28 July – National Parent's Day (4th Sunday in July)

30 July - International Friendship Day

My Idea of an Ideal school

An ideal school would think of the students. The school should think of the student's comfort, gender equality etc. The school should teach the little ones to follow the discipline. They should also tell the students to wear clean uniforms.

A bag less school would be great. The school could provide lockers to the children and tell the students to keep their stuff in the lockers. The school can provide food in the school itself.

The school can come close to nature by planting many trees. They can stop giving homework and complete that in the class. Till fifth standard the school can focus on the student's fitness. The school can provide many hobbies to the students.

I would really enjoy going to a school like this.

Country

Aarush Puranik: Standard IX

195 counties,
With their cultures unique
Each having borders,
With its own physique.

Independence takes pieces,
Like a preying vulture.
An example is,
The Soviet Union departure.
Well, what can I say?
We all live in one
But learning about them all,
Trust me, is lots of fun.

So, to conclude this poem,
Read this stanza, this piece.
Personally, what I want,
Is all countries in peace.

Are You Really Gone?

Avani Bothe: Standard IX

As my days draw out, I find myself thinking about you
I miss you dearly and wish you were by my side, too
You are a real friend and I hate not having you here
Never being able to see you or talk to you would be my greatest fear

We have become close and I think of you as kin
Malvika, I miss you; Will we be able to laugh again?
We had so much fun together; thinking of it makes me sad

I love you like a sister and I will always care
I wish things were different not being able to talk to you doesn't seem fair
I miss our silly jokes; I miss our bond of trust
I hate not being able to talk to you and I don't want to have to adjust

I love you so much Malu and will always continue
But all I only wish is for you to come back as my friend.

My Experience of a Jungle Safari at Pench

I was really surprised when my mom told me where we were going for vacation! It was my first ever jungle safari. I was so excited. On a hot evening of May we boarded the train to Nagpur. We had our first safari the we reached. On the first safari when we boarded our jeep, all the thoughts like ‘what if a tiger jumps on our jeep’ started to come in my mind. But all thoughts vanished when we saw two beautiful cubs of a fierce tigress called Bijamatta. Then we saw many deer, monkeys and lots of different birds. We were lucky enough to have spotted 5 tigers.

The things I was fascinated about was how the tigers walk with poise, elegance and as if us humans don’t exist at all. There was a bird called Rocket Tailed Drango whose back of the tail was sky blue coloured. I also learnt many new things like the difference between a mating call and dancer call of monkeys and deer. A mating call is usually very long and continuous which happens after about evert 5 minutes and a danger call is when a deer or monkey spots a tiger or a leopard nearby and makes sound to warn the other animals nearby. It is short but we can hear it after 2-3 seconds

I would like to give you some tips – Go in summer season as the tigers will come out in search of water

- ☒ Always wear jungle friendly colour clothes like green, beige and black
- ☒ Do not make any noise as the animals can get distracted
- ☒ Always remember to keep the jungle and nearby surroundings clean

Lesson to learn from World Cup 2024

Archit Modak:
Standard X

The ICC men's T20 world cup is held every two years. A total of 24 countries have competed since the start of this event in 2007. The inaugural 2007 T20 World Cup was staged in South Africa and won by India. In 2024 total nine editions have been played.

The Indian men's cricket team did a splendid job in the 2024 T20 World Cup winning the title without losing a single game in the whole tournament. India is the first nation to reach the finals and win the World Cup being undefeated. In the finals of the tournament India defeated South Africa, another team who was undefeated in the whole tournament. The Indian team was led by Rohit Sharma. This T20 World Cup tournament was special for India, as India had made it till the finals in the 50 overs World Cup in 2023 but unfortunately was defeated by Australia.

It was a total heart break for the team as well as for the fans. All the cricket fans back at home and overseas and on the men in blue on the field were in tears of heartbreak and disappointment. The T20 World Cup tournament was a golden chance for India to make a comeback. India made a great use of this opportunity and lived up to the expectations of the people of India and won the World Cup.

We have learnt many lessons from the victory of Indian team in T20 World Cup

- 1) *Class is permanent, even if it doesn't work for a few times...peaks at the right time:* - **Virat Kohli**
- 2) *When a leader leads from the front, and if fails once in a while – entire team comes together to cover up:* - **Rohit Sharma**
- 3) *It's not over till you think it's over:* - **Indian team even after South Africa needed 30 off 30.**
- 4) *You can bounce back from the lowest unimaginable lows [even if the entire world is against you]:* - **Hardik Pandya**
- 5) *Hard work and humility pay off even if it hasn't for decades:* - **Rahul Dravid**
- 6) *Consistency pays off eventually:* - **Jasprit Bumrah**
- 7) *There is a point in life which comes for most people from where getting up or getting back seems impossible. sheer will and determination gets you back:* - **Rishabh Pant**
- 8) *Losses at a big stage are possible but important is the comeback:* - **Indian team after T50 World Cup to winning the T20 World Cup**
- 9) *Nothing is above team work, ultimately every single individual's contribution matter:* - **Indian Team**
- 10) *At times the smallest contribution can be the biggest in the game or life:* - **Surya Kumar Yadav**

Amongst all the biggest lesson we learnt from this World Cup victory by team India is that we should not sit back when we get a setback but we should bounce back setback and achieve greater highs.

An Author who inspired me

“I don’t go finding trouble; Trouble usually finds me.” - Harry Potter. This is my favorite line from the famous Harry Potter book series.

Did you know that the author wrote the first Harry Potter book in a small café struggling to make ends meet? That’s right, the author who inspired me is J.K Rowling. She inspired a whole generation of people like me to believe in magic and her success is proof that anyone can do anything if they believe in themselves.

She was inspired by real places in London and Edinburgh and adapted them in the book by making them way more interesting places. These places inspired me to go and visit them to find out why she considered them in the first place.

Harry’s character shows us despite of the hurdles coming your way, you need to continue to move forward. The struggles faced by Harry are enormous for a young child. When I read about J. K. Rowling’s struggles in real life, I wondered if she was writing her own story through Harry’s character.

Her books taught me about to be strong and facing your enemies who will come at you always. Find your strengths and friends to work wisely and ensure you conquer your enemies at any cost.

While I read hundreds of books so far, Harry Potter will always have a special place in my heart now that I know about this amazing author who wrote them. Now I admire these books even more.

The Harry Potter series is so successful that J K Rowling is the richest author in the world today.

Kargil Victory Day

Kargil Vijay divas is observed on 26th July. It really holds a huge significance in India. As we won this war against the Pakistani intruders in 1999. This day specifically honors the remarkable valor and sacrifice which made by our Indian soldiers. This conflict was a very intense battle because it was fought in a very rough terrain but the spirits of the Indian soldiers were never low. The fight showcases the Indian soldier's bravery and patriotism.

Captain Vikram Batra played a vital role in this war. Across India every year there a lot of ceremonies and patriotic events held to remember the heroes of the Kargil war. This really promotes a sense of unity and pride among us common people.

Autobiography of Ukulele

Hi friends! Recognised me? I am (Guitar's small brother, Ukulele. I know some of you don't love me. But, don't worry, I will tell you my story. So firstly, my structure. Well, you all know how my big brother guitar looks!.. I look just the same. I have 4 strings (G-C-E-A), I have a sound hole, I have Frets and Eret markers, nut and headstock. I also have tuning pegs, everything same like guitar Now you might be thinking that Ukulele is just a guitar, right? There isn't any difference in structure, but size is smaller than the guitar because he is my big brother. I come in various sizes and I also have various sub-names lake Soprano ukulele (me.) Soprano Ukulele is the smallest of all, and is of only 21 inches/53 cm. The second biggest brother is Bariton Ukulele. He is around 29 inches/74 cm. Almost like the big brother guitar. I am small, so my cost and popularity is also less. I am cheaper than guitar so there aren't many parts in me. I am good for beginners. Beginners practice on me before starting on the bigger ones.

I am played in Hawaii the most, as part of Hawaiian music and culture. I am made of different type of woods like Koa, rosewood, maple, etc. Now let me introduce you to my inventors, actually Portuguese explorers. I was originated in Europe and introduced to Hawai later by 3 men Manuel Nans, Augusta Dias and Jose do Espirito Santo. By 1888 I became popular with Hawaiians. This was my journey from Europe to Hawaii. Now met you soon too.

यदि मोबाइल ना होता तो

मोबाइल से आज का एक मेहत्वपूरन साधन बन चुका है। मोबाइल अगर पास हो तो भी समस्या है और ना हो तो भी समस्या है। मोबाइल आने से तरक्की भी हुई और बरबादी भी। मोबाइल आने से हम लोगों से जब मन चाहे बात कर सकते हैं। तसवीरें, गाने, लेख आदी भेज सकते हैं। दुनिया में किसी भी शब्द का अर्थ ढूंढ सकते हैं। लोगों में किसी चीज की सावधानी लेने की बातों से लेकर रोज कि खबरें बताने तक, वो भी झट - पर कर सकते हैं। मनोरंजन के लिये मोबाइल इस्तमाल किया जाता है। कागज़ात की ऑनलाइन तसवीरें भी रख सकते है। मोबाइल से ऑनलाइन पैसे भेज सकते हैं। पर इस सब के परे हम हमारे मोबाइल में इतने व्यस्त हो जाते हैं कि हम हमारे काम, कर्तव्य भूल जाते हैं, परिवार को कम वक़्त देते हैं, अपना काम छोड़कर मोबाइल में मनोरंजन देखते हुए व्यस्त हो जाते हैं।

मोबाइल से बहुत लोगों के साथ बुरी चीजें भी होती हैं। जैसे गाड़ी चलाते वक्त मोबाइल के उपयोग से हम अपनी मौत को अपने सिर मोड़ ले सकते है। मोबाइल से लोग गुनाह करने से भी डरते नहीं हैं, पर इस में कुछ लोग अगर फँस गए तो उनकी जिंदगी बरबाद हो जाती है। मोबाइल पर किया हुआ हँसी मजाक किसी का मन या दिल दुखा सकता है। मोबाइल के कारण मानव शरीर मे बहुत सारी बीमारियां हो सकती हैं। मोबाइल से निकलने वाले इलेक्ट्रोमेगनेटिक किरणों से डीएनए क्षतिग्रस्त हो सकता है। मोबाइल के प्रयोग से दोनों, अच्छी और बुरी चीजें जुडी हैं, पर अगर हमने ठान लिया, तो हम मोबाइल से सिर्फ अच्छी बातें लेकर दुनिया को बदल सकते हैं। सही और उपयुक्त बदलाव लाना ये स्वयं मनुष्य के हात में होता है।

" मोबाइल या तो प्रगती कि चाबी हो सकता है या विनाश का साधन "
