MEET THE OWNER OF VIBE MEDISPA & SKINCARE

LINDA WAYNE, BS, MA, NREMT

Linda attended a seminar at the Anti-Aging Institute in Tennessee in 2005 and has been hooked to all things esthetics since then. Linda holds a Bachelors of Science and is a Licensed Medical Esthetician, Injector and Skin Health Specialist, as well as a Licensed Emergency Medical Provider.

She recently sold her medical esthetics practice in Indiana and upon relocating to Golden, Colorado is opening Vibe Medispa & SkinCare. She has teamed up with Keller to provide the highest standard of skin health products and treatments to gentlemen, ladies and teenagers. These products treat all skin types and concerns with a medical quality and natural approach.

Combine Vibe Skincare with modern, professional, in-spa medical esthetics treatments with Linda and you will look and feel better than ever.

MEET THE MAKER OF VIBE SKINCARE

Ted Keller graduated from the University of Colorado in 1969 with a degree in pharmacy and has practiced since that time.

In 2004, Keller received a post graduate diploma in natural medicine from the Pan American School of Natural Medicine. Upon completion of that curriculum he was awarded the degree of Doctor of Natural Medicine by the World Organization of Natural Medicine Practitioners.

Ted owns and operates a cosmetic manufacturing company, which produces Vibe Skincare products that are non-toxic, natural with only active ingredients, using no artificial colorings, fragrances, or chemical preservatives.

Mr. Keller has been published in the International Journal of Compounding and has applied for 3 patents; a medical device, and a treatment protocol., and a nutritional supplement. verse Type II diabetes, detoxification diets, drug induced nutrient depletion, elimination diets and homeopathy.

Ted has spoken at six international seminars of compounding pharmacies on nutrition in humans and animals, compounding for veterinary use and use of diet and supplements to reverse Type II diabetes, detoxification diets, drug induced nutrient depletion, elimination diets and homeopathy.

Mr. Keller has conducted over 100 seminars on the use of nutrition and natural hormone replacement to regulate menopausal symptoms. Ted has also spoken at the annual conference of the Colorado Association of Naturopathic Physicians on the diagnosis and treatment of insulin resistance and to the National Association of Nutrition Professionals of Stress and the endocrine system and Type II diabetes.

ABOUT VIBE SKINCARE

VIBE SKINCARE IS **CONSCIOUS SKINCARE**. Vibe products are better than other cosmetic products on the market because in development and production only the exact isomer or the "chirally correct" form of a nutrient is used. With this isomer science, the products can then be efficiently utilized by the skin. Only the highest grade ingredients are used to treat each skin type and concern. Unnecessary products are forbidden! If the ingredient does not perform an important function, it is not added.

Unlike other skin care retailers that package 1 ounce of ingredients into a 6 ounce bottle and a fancy box that just gets trashed to give you the impression of "more", Vibe utilizes the most minimalistic packaging with environmental concern.

Vibe products are the finest, least toxic skin nutrients found on the market at a price that is incredibly reasonable!

One of the most important skin care goals is improving the health and appearance of the skin. This is done by improving blood circulation and oxygenation of the skin, maintaining the skin's normal pH., revitalizing the skin cell membranes, connective tissues, and detoxifying and neutralizing toxins found in the skin tissues. Vibe Skincare produces real, cumulative, beneficial and long lasting visible results.

Vibe products are nutrient concentrated, with cutting edge synergistic activity that achieves results rapidly. With some products, results can be seen in as little as 30 minutes. Retail product returns on Vibe Skincare products have historically been less than 0.01% of sales.

Dangerous chemicals are added to most cosmetic products to enhance the texture, elegance, or appearance of the product. Vibe Skincare products produce the same elegance without the the toxic ingredients. It is more costly to do this, but the effort is worthwhile as these poisons are eliminated.

In a recent article in The Townsend Letter for doctors and patients, and The Wall Street Journal, concerning the rise of breast cancer in the United States, stated that some of the culprits in contributing to this increase, were toxic ingredients and mutagenic ingredients commonly found in almost all cosmetic products.

Most skin care products contain ingredients like preservatives, dyes, and chemicals that have no value in the beautification of the skin and may, in fact, contribute to hormonal or endocrine changes that are responsible for breast cancer. It is no secret that anything applied to the skin can be and almost always is absorbed into the blood stream, and must be handled as a toxic compound. These ingredients do not evaporate after application to the skin. Take parabens for example. Parabens are endocrine disrupters that mimic the hormone estrogen and have been found to accumulate in the tissue of women with breast cancer.

Safer alternatives are available such as essential oils that are anti-bacterial, anti-fungal, anti-viral, and do not disrupt endocrine systems and do not accumulate in the breast tissue. These essential oils are not as stable as parabens and thus do not have a long shelf life. Parabens on the other hand may increase shelf life up to 6 to 8 years. This is why major cosmetic companies use parabens. Vibe does not. Vibe products are always fresh and must be used within 2 years.

SKIN ANALYSIS

In esthetics, a person's skin is classified into one of the five skin types: dry, oily, aging, acneic, and combination - T-zones (treatment zones). The fact is all of the above skin conditions are caused or exacerbated by the same poor habits:

- Poor nutrition
- Dehydration
- Over exposure to the sun, tanning beds, pollutants, toxins and overuse of toxic skin care products.
- Overuse of skin treatment procedures, like peels and laser
- Lack of adequate exercise and stretching
- Inadequate Sleep
- Stress and Illness

By addressing the above conditions, improving healthy lifestyle and utilizing Vibe cutting edge skin products, protocols, and in-spa treatments, improvement and normalization of ALL skin types and conditions can occur.

The next step is to understand the products that are right for you. Continue browsing thru this catalog to discover the truly amazing and diverse products that are right for you.

WHAT CLEANSERS, TONERS & SCRUBS DO

Vibe non-toxic cleansers are great for leaving skin feeling soft, without using harmful chemicals or synthetic fragrances that can lead to irritated and dull skin. Cleansers work to remove makeup, impurities and oils as well as balance the acidity of the skin's pH, which is 5.5.

Toners can be a superb addition that prepares skin and helps other products in your regimen penetrate better. Toners remove any last traces of dirt, grime and impurities stuck in pores after washing the face. When added to your daily skincare routine and used regularly, it can have major positive impact on the appearance and tightness of your pores.

Using a facial scrub is a great way to exfoliate your skin and remove dead skin cells, leaving your face feeling refreshed and rejuvenated. Scrubs should be limited to 2 or 3 times per week.

CLEANSERS

★ APPLE DELIGHT

\$39

Skin Type - Dry

Heaven for dry skin with an even more heavenly scent - This is a moisture rich cleanser, that removes impurities and debris without stripping the skin of the natural skin oils. This will not dry out the skin.

Apples: support healthy aging, brighten complexion, exfoliate, hydrate skin and reduce acne.

Usage instructions: Squeeze two to three drops in the palm of damp hands, rub hands to create a lather, then proceed to cleanse your face and neck. Rinse with tepid water.

4 oz. Ingredients:

Water (Aqua), Decyl Glucoside, Decyl Glucoside Sodium Lauroyl Lactylate, Glycol Distearate, Laureth 14, Cocamidopropyl Betain, D-Beta Fructan, Pyrus Malus (Apple) Fruit Extract

★ CHERRY ENZYME WASH

\$39

Skin Type - All

A great wash with a great smell for all skin types this wash contains no SLS or harsh detergents. This is an AHA cleanser with enzymes to remove dirt impurities.

Cherries: provide a natural supply of vitamin A, B, C, and E, which helps with signs of premature aging, carry potent antioxidants and aids in the correction of hyper pigmentation.

Usage Instructions:

Squeeze two to three drops in the palm of damp hands, rub hands to create a lather, then proceed to cleanse your face and neck. Rinse with tepid water.

4 oz. Ingredients:

Ingredients: Aqua (water), Sodium Hydroxypropylsulfonate Laurylglucoside Crosspolymer, Sodium Methyl Cocoyl Taurate, Polyglyceryl-4 Caprate, Glycolic Acid, Sodium Cocoyl Hydrolyzed Amaranth Protein, Lactobacillus/Punica Granatum Fruit Ferment Extract, Gluconolactone, Glycerin, Butyrospermum Parkii (Shea) Butter Extract, Glucosamine HCl, Fructooligosaccharides (D-beta), Prunus serotina bark extract (wild Cherry bark extract)

EXTRA GENTLE CLEANSER

\$39

Skin Type - Sensitive

Ideal for sensitive skin - even rosacea and post-treatment, this extra gentle cleanser soothes and protects while leaving your skin feeling fresh without irritation or dryness.

Usage Instructions:

Squeeze two to three drops in the palm of damp hands, rub hands to create a lather, then proceed to cleanse your face and neck. Rinse with tepid water.

4 oz. Ingredients:

Aqua (water), Sodium Hydroxypropylsulfonate Laurylglucoside Crosspolymer, Succinic Acid Sulfate, Sodium Methyl Cocoyl Taurate, Butyrospermum Parkii (Shea Butter), Polyglyceryl-4, Caprate, Decyl Glucoside, Aniba Rosaedora (Rosewood) Oil

MORE CLEANSERS

CREAMY CLEANSER

\$39

Skin Type - All

This cleanser is very gentle on the skin and is for all skin types. It's texture is smooth and non-greasy. Removes makeup and leaves skin feeling clean and soft.

Usage Instructions:

Massage cleanser into the face and neck. Add water to help work the cleanser into the skin. Rinse with warm water or with a moist warm cloth.

4 oz. Ingredients:

water(aqua), Prunus amygdalus (sweet almond) nut oil, arachidyl alcohol, behenyl alcohol, arachidyl glucoside, cetearyl alcohol, glycerin, cocamidopropyl betainamide, rosa damascene(rose) flower water, sucrose cocoate, sodium cocoyl aminoacids, sarcosine, potassiumaspartate, magnesium aspartate, zinc gluconate, copper gluconate, copper PCA, anthemsnobilis (roman chamomile) flower oil, cananga odorata (ylang yang) flower oil, lavandula floweroil, anima rosaeodora (rosewood) wood oil, rosmarinus ofcials (rosemary) leaf extract,Helianthus annuus (sunflower) seed oil, Ionicera caprifolium (honeysuckle) flower extract,ionicera japonica (honeysuckle) flower extract

CLARIFYING CLEANSER

\$39

Skin Type - Acneic or Combo Skin

This is a gentle yet effective, non-abrasive, alpha hydroxy, exfoliating cleanser that effectively reduces blemishes. The new technology, using AHA polymers, results in less skin irritation. The addition of beta-hydroxy acid polymer helps clear the skin of blemishes.

Usage Instructions:

Squeeze two to three drops in the palm of damp hands, rub hands to create a lather, then proceed to cleanse your face and neck. Rinse with tepid water.

4 oz. Ingredients:

Aqua (Water), Sodium C14-16 Olefin Sulfonate, Propanediol, Cocamidopropyl, Hydroxysultaine, Cocamidopropyl Betaine, Glycerin, Sodium Cocoamphoacetate, Glycolic Acid, Salicylic Acid, L-Lactic Acid, Coco-Glucoside, Gluconolactone, Sodium Hydroxide, Vaccinium Macrocarpon (Cranberry) Fruit Extract, Sodium Chloride, Glycol Distearate, Sodium Benzoate, Potassium Sorbate, Sodium Gluconate, Eclipta Prostrata, Extract, Butyrospermum Parkii (Shea) Butter, Melia Azadirachta (Neem) Leaf Extract, Moringa Oleifera Seed Extract, Maltodextrin

TONERS

ACNE CLARIFYING TONER

\$39

SKIN TYPE - ACNEIC

The AHA's in this toner decongest pores, help prevent blemishes, and purify and control oil. Phenyl butyl nitron and beta-carotene provided antioxidant protections.

Usage Instructions:

Apply after cleansing. Use a small amount on a cotton square and apply over skin. Use during the day, in the evening and after exercise.

4 oz. Ingredients:

Aqua (water), Hamamelis Virginiana (Witch Hazel) Extract, Vaccinium Macrocarpon (Cranberry) Fruit Extract, Linum Usitatissimum (Linseed) Oil Extract, Althea Officinalis (Marshmallow) Root Powder extract, Prunus Sulcis (Almond) Oil Extract, Glycolic Acid Polymer, Lactic Acid Polymer, Citric Acid and Beta-Carotene.

ACNE CLARIFYING TONER - MILD

\$39

SKIN TYPE - NORMAL OR AGING

This toner is not as strong as the Acne Clarifying Toner. This toner can be used for normal skin or aging skin. It is not normally used for acne.

Usage Instructions:

Apply after cleansing. Use a small amount on a cotton square and apply over skin. Use during the day, in the evening and after exercise.

4 oz. Ingredients:

Distilled water, hamamelis extract, cranberry extract, linseed extract, althea extract, almond extract, glycolic acid polymer, lactic acid polymer, citric acid, and beta-carotene.

CAUTION

Avoid getting into any and all toners in the eyes. In case of eye contact, flush eye thoroughly with cool water. Seek immediate medical attention if needed.

MORE TONERS

ANTIOXIDANT TONER

\$39

SKIN TYPE - ALL

Flushes dirt from pores and repairs free radical damage.

Usage Instructions:

Apply after cleansing. Use a cotton square to apply a small amount over the skin. May be used during the day or after exercise.

4 oz. Ingredients:

Distilled water, hamamelis extract, phenyl butyl nitron, D-beta fructan, beta-glucosamine and amino guanidine.

GLYCOLIC ACID TONER

\$39

Glycolic Acid Toner is not as strong and can be used for normal skin.

Usage Instructions:

Apply after cleansing. Use a small amount on a cotton square and apply to skin. Use during the day, in the evening and after exercise.

4 oz. Ingredients:

Distilled water, hamamelis extract, hyaluronic acid, phenyl butyl nitron, D-beta glucosamine, amino guanidine, citric acid, glycolic acid and strawberry and melon extracts.

★ STRAWBERRY MELON TONER

\$39

Recommended for dry skin. Soothes, balances and hydrates, to give your skin a fresher appearance. A favorite due to its amazing smell. Use daily as a skin-reviving mist.

Usage Instructions:

Apply after cleansing. Use a small amount on a cotton square and apply to skin. Use during the day, in the evening and after exercise.

4 oz. Ingredients:

Distilled water, hamamelis extract, hyaluronic acid, phenyl butyl nitron, beta D-glucosamine, D-beta fructan, amino guanidine, citric acid, glycolic acid, and strawberry and melon extracts.

CAUTION

Avoid getting into any and all toners in the eyes. In case of eye contact, flush eye thoroughly with cool water. Seek immediate medical attention if needed.

PEPTIDE LOTIONS

WHY YOU MUST USE PEPTIDES

While many products just sit on top of the skin and provide little to no results, peptides are easily absorbed into the skin and used by the body. **Peptides are a must for every skin type and concern.** Think of peptides as messengers to other cells - they send signals telling cells to produce collagen and elastin, which both decrease with age. Incorporating peptides into your skin care routine has many benefits for the skin:

Improved skin barrier - The skin barrier is the body's line of defense against bacteria, ultraviolet rays, pollution, and other toxins. The skin barrier can be damaged from over-exfoliation, exposure to cigarette smoke and other pollution, or even poor sleep. Peptides help build up a stronger barrier. **Reduced wrinkles** - Collagen can plump skin and lips. When skin is firmer and plumper, wrinkles and fine lines will be less visible. **Improved elasticity** - In addition to collagen, peptides also make up elastin fibers, also a type of protein. These fibers make skin look firmer and tauter. **Clear breakouts** - some peptides are antimicrobial and can kill acne-causing bacteria.

TURN BACK TIME WONDER CREAM

\$85

Its like plastic surgery in a bottle because after an application to the skin, one can see a difference in the skin in as little as thirty minutes.

This product uses new anti-aging compounds, called glutathione, in a stable form along with hyaluronic acid, carnosine, and many other ingredients found in the Vibe Skincare peptide Creams. Glutathione increases microcirculation in the tissues quickly, to enhance skin tone and elasticity as well as hydration. Carnosine acts on dark areas of the skin. It is applied at night in place of the peptide lotion, which is still used during the day. Only one application is needed, as the nutrients have a long half-life.

This product works even better if used with the Vibe Skincare anti-aging protocol.

Usage Instructions:

Apply to face and neck, before bedtime, after Vitamin A Complex serum. This may be used in the a.m. as well.

1oz. Ingredients:

Aqua (Water), caprylic/capric triglycerides, vegetable glycerin, Aloe Barbadensis Leaf Juice, honey, cyclomethicone/dimethicone, triglycerides, Cera Alba (beeswax), squalene (olive), L-retinol, L-pentapeptides, thiamine, riboflavin, niacin, pantothenic acid, pyridoxine, biotin, folic acid, cobalamin, Cholecalciferol, L-hyaluronate, glutathione palmitate, carnosine palmitate, omega 3, 6, 9 oils, Super oxide dismutase, Vitamin E, L-lactic acid, royal gelee, idebenone, beta glucan, D-beta fructan, amino guanidine, D-beta glucosamine, L-sodium PCA, Calendula O cindalis, Plumeria Rubra Flower, Vanilla Tahitensis Fruit, Canaga Odorata (Ylang Ylang) Flower, Citrus Medica Limonum (Lemon), Rosa Damascena Flower, Prunus Avium (Cherry) and citrus seed extract.

MORE PEPTIDE LOTIONS

PEPTIDE +

\$85

Vibe Skincare Peptide Lotion has added three new peptides to enhance the speed and effectiveness of skin nutrition. Noticeable results can be seen with the Vibe protocol in as little as three days!!! Continual use of this product shows results on skin texture, brown spots and aging.

Usage Instructions:

This is an ideal anti-aging treatment. Smooth over clean skin before bedtime and allow the skin smoothing and skin strengthening ingredients to improve the overall appearance of the skin, while you sleep. You may also apply as a daytime treatment to moisturize. Dispense 2 to 4 pumps into the palm of the hand and gently spread over face, neck and décolleté, after cleansing, toning and applying Vital Therapy Vitamin A or Vitamin C

2 oz. Ingredients:

Aqua (Water), Cyclomethicone, Dimethicone, Copolyol, Glycerine, Silicone, Caprillic/Capric Triglycerides, Cetyl Alcohol, L-lactic acid, L-retinol, Cera Alba (beeswax), Ceteryl Alcohol, Butyrospermum Parkii (Shea Butter), L-pentapeptides, Aminoguanidine, Squalene (olive), Idebenone, Acetyl Glutathione, Acetyl Carnosine, Glyceryl Stearate, D-beta glucosamine, Xanthan Gum, Jasminum officinale (Jasmine) Alcohol, Vanilla Planifolia Fruit, Cananga Odorata Flower, Citrus Limonium (Lemon), and Aniba Rosaeodora (Rosewood) essential oils.

PEPTIDE + FIRM

\$85

This formula has all the ingredients of the Vital Therapy Peptide Lotion with the addition of DMAE and alpha lipoic acid, 3% of each. DMAE give greater firming (tone) to the skin, and alpha lipoic acid is supposed to be a more powerful antioxidant milligram than Vitamin C. The fragrance of the Ultra Firm Peptide Lotion is heavier in order to conceal the fishy odor of the DMAE. It also contains idebenone and green tea extract.

Usage Instructions:

This is an ideal anti-aging, and toning (firming) treatment. Dispense 2 to 4 pumps into the palm of the hand and gently spread over face, neck and décolleté, after cleansing, toning and applying Vital Therapy Vitamin A or Vitamin C, and before applying sunscreen. You can use this product as a day or night time moisturizer. This products will firm and tone aging skin as well as build collagen.

2 oz. Ingredients:

Aqua (Water), cyclomethicone, dimethicone copolyol, glycerine, silicone, caprillic / capric triglycerides, cetyl alcohol, Cera Alba (beeswax), DMAE, alpha lipoic acid, idebenone, acetyl-glutathione, acetyl carnosine, L-lactic acid, L-retinol, Camellia sinensis (Green Tea) Leaf Extract, Butyrospermum Parkii (Shea Butter), L-pentapeptides, aminoguanidine, squalene (olive), glyceryl stearate, D-beta glucosamine, Beta 1,3-D-glucan, xanthan gum, Jasminum officinale (Jasmine) alcohol, Vanilla Planifolia Fruit, Cananga Odorata Flower, Citrus Limonium (Lemon), and Aniba Rosaeodora (Rosewood) essential oils.

MORE PEPTIDE LOTIONS

PEPTIDE + MOISTURE

\$85

This is our peptide lotion with added moisturizers. It is great as a men's aftershave, anti-aging conditioner, and for clients that require a little more moisture to the face. It contains a higher concentration of Hyaluronic acid, Sodium PCA, and omega 6 oils. It still contains all the other ingredients of the Peptide Lotion.

Usage Instructions:

Dispense 2 to 4 pumps into the palm of the hand and gently spread over face, neck, and décolletage after cleansing, toning, and applying Vitamin A or Vitamin C serum.

2 oz. Ingredients:

Aqua (Water), Vegetable glycerin, Cyclomethicone, Dimethicone copolyol, Caprylic/Capric triglycerides, L-lactic acid, L-sodium PCA, Hyaluronic acid, Pyruvic acid, Acetyl- Glutathione. L-Penta peptides, D-beta Glucan, D- beta Glucosamine, lecithin, D- Panthenol, L-Retinol, Butyrospermum parkii (Shea Butter), Ceteryl alcohol, Xanthan gum, Honey, Borago Officinalis (Borage) Seed Oil, Rosa Damascena (rose) Flower Oil, CitrusMedica Limonum (Lemon) Peel Powder and Aniba Rosaeodora (Rosewood) Wood oils, Jasminum Officinale (Jasmine) Oil.

★ PEPTIDE + ACNE AWAY

\$85

A powerful anti-inflammatory, this new and improved form of bioactive peptides is strong enough to improve cystic acne. Inflammation is an important reason acne does not improve, so when inflammation is managed, the immune system can calm and heal acne pustules.

With proper protocol and consistent use, acne away peptides have the capability to heal acne scarring.

Users love this because it "just takes a little bit of product for huge results" and because "it totally healed my acne and sore skin".

Usage Instructions:

Smooth over clean skin during the day and at bedtime to reduce acne blemishes, even cystic acne.

2 oz. Ingredients:

Aqua (water), cyclomethicone /dimethicone copolyol, glycerin, silicone, caprillic/capric triglycerides, cetyl alcohol, L-lactic acid, L-retinol, Cera Alba (beeswax), cetearyl alcohol, Butyrospermum Parkii, L-pentapeptides, niacinamide, L-salicylic acid, squalene (olive Oil), glyceryl stearate, D-beta fructan, D-beta glucosamine, xanthan gum, Jasminum Officinale (Jasmine) Extract alcohol, Vanilla Planifolia Fruit extract, Cananga Odorata (Flower) Oil, CitrusMedica Limonum (Lemon) and Aniba Rosaeodora (rosewood) Wood essential oils.

SERUMS

★ MIRACLE VITAMIN C WITH CAFFEINE

\$79

This product is probably the most important skin care product.

It not only protects the skin from UV damage, it also is the best anti-aging compound for skin. The increase in collagen and elastin only takes place if Vitamin C is present in the skin!! This excellent anti-aging product is a highly concentrated Vitamin C Serum with proven antioxidant and regenerative properties to help fight and repair signs of aging by building collagen and elastin. The ingredients in the Vitamin C Serum contain active ingredients that provide a direct benefit to the skin, and are not just carriers.

Usage Instructions:

Dispense four to ten drops into palm of hand, and pat over face, neck, and décolleté after cleansing and toning. Can also be applied to backs of hands or arms, as these show the earliest signs of aging. Follow with the appropriate moisturizing product.

30ml Ingredients:

Aqua (Water), L- Ascorbic acid 20%, Oryza Sativa (rice) starch, glycerol, caffeine citrate, beta fructan, D-beta glucosamine, amino-guanidine, Ricinus Communis (Castor) Seed Oil, Hamamelis Virginiana (witch Hazel) extract, Phenyl Butyl Nitron.

VITAMIN C A DIFFERENCE

\$59

For acne, it not only will improves the firmness of the skin, it will soften and reduce the appearance of acne scars. It stimulates collagen and with proper skin treatment is a valuable and effective treatment of acne scared skin.

Usage Instructions:

Apply this serum to acne scars. Moisturizers may be layered on top of the application. It may be layered under makeup as well.

15ml Ingredients:

Aqua (Water), L-ascorbic acid, caffeine, L-carnosine, acetyl-carnosine, acetyl-glutathione, Oryza Sativa (rice) starch, glycerol, D-beta fructan, D-beta glucosamine, amino-guanidine, Ricinus Communis (Castor) Seed Oil, hamamelis Virginina (witch hazel) extract and phenyl butyl nitron.

Everyone should be using a Vitamin C product regularly where they are exposed to sun on the face, neck, décolletage and arms.

SERUMS

★ VITAMIN A COMPLEX

\$75

This is a Vitamin A and glycolic acid complex that gives an energized and synergized antioxidant combination. It is an excellent anti-aging product and a stimulant of new tissue Growth. Vitamin A is an essential fat-soluble vitamin. You may recognize names such as retinol, retinal, retinoic acid or retinyl ester — which are all forms of vitamin A that help increase cell turnover and accelerate skin renewal, effectively evening out discoloration and smoothing the damage that occurs during skin aging.

Usage Instructions:

Before bed, dispense four to eight drops into palm of hand, and pat over face, neck and décolleté after cleansing and toning. Can also be applied to backs of hands or arms, as these show the earliest signs of aging. Follow with the appropriate moisturizing product.

30 ml Ingredients:

Virginiana Hamamelis (witch hazel) extract, L-Retinol, Phenyl Butyl Nitron, Epithelial growth factor (peptide), Glycolic Acid, Beta glucan, Beta Fructan, Amino guanidine, Ethyl Hydroxide

HYDRATING RAIN

\$75

Think of fresh rain on a desert floor. Introducing Hydrating Rain by Vibe, a luxurious hydrating serum designed to nourish and revitalize your skin. The innovative formula locks in moisture, leaving your skin feeling refreshed and rejuvenated. Say goodbye to dryness and hello to a radiant complexion with Hydrating Rain. 3% Hyaluronic.

Usage Instructions:

Dispense two to three pumps into the palm of your hand; pat onto skin until absorbed. Can be mixed with Vitamin C Serum in the morning, or Vitamin A Complex Serum in the evening, or with any other Vibe products to make them more hydrating.

2 oz. Ingredients:

Aqua (Water), Vegetable Glycerin, Aloe Barbadensis Leaf Juice, Honey, Phosphatidylserine, Phosphatidylcholine, Sphingosine-1-Phosphate, L-sodium-hyaluronate, Citric Acid, Borago Ofcinalis (Borage) Seed Oil, Silicone, Rosa Moschata Seed Oil, Pyruvic Acid, L-sodium PCA, D-panthenol, L-Retinol, Thiamine, Riboflavin, Niacin, Pantothenic Acid, Pyridoxine, Biotin, Folic Acid, Cobalamin, Cholecalciferol, Jasminum Ofcinale (Jasmine) Oil

HYALURONIC ACID SERUM/GEL

\$60

Vibe's Hyaluronic Acid can effectively deliver the moisturizing benefits your skin needs without any irritation. Used topically, hyaluronic acid smooths fine lines and wrinkles and helps skin retain moisture in the dermis, deep below its barrier.

Usage Instructions:

Hyaluronic Acid works best when applied right after cleansing and right before moisturizing. It can provide a noticeable difference in skin's appearance after just 15 minutes. Additionally, HA can be a wonderful post-treatment application for those who have micro needling, lasers, chemical peels and other procedures.

2 oz. Ingredients: *Aqua (Water), Propanediol, Sodium hyaluronate, Aloe Barbadensis (Vera) leaf juice, Matricaria recutita (Chamomile) flower extract, Camellia sinensis (Green tea) leaf extract, Europaea (Olive) leaf extract, cellulose gum, citrus aurantium dulcis (Orange) oil, ethylhexylglycerin*

EYE CREAMS

ANTI-AGING EYE CREAM

\$75

The most powerful antioxidant available that both moisturizes and reduces fine eye lines. The active ingredient, glutathione, is the most powerful antioxidant found in the human body. It helps increase blood circulation to the applied area which reduces swelling and dark circles.

Usage Instructions:

Using your ring finger, gently apply a small amount to the area around the eyes, and the eyelids. Do not tug on the delicate eye tissue. Apply one hour before bedtime or in the am after cleansing and toning.

.5 oz Ingredients:

Aqua (Water), Caprylic/Capric Triglyceride, Palmitic Acid, Stearic Acid, Butyrospermum Parkii (Shea Butter), Glycerin, Hesperidin Methyl Chalcone, Palmitoyl Tetrapeptide -7, Dipeptide -2, Glyceryl Stearate, Cetearly Alcohol, Glycerin, Chrysin, Palmitoyl Oligopeptide, N-Hydroxysuccinimide, Olea europaea(Olive) Fruit Oil, Prunus Dulcis (Almond) Oil, Glycine Soja (Soybean) Oil, Tocopheryl Acetate (D-Alpha), albumen, L-retinol, L-penta peptides, Zea mays (Corn) oil, Althaea O cinalis Extract, Citrus Aurantium Dulcis (Orange) Peel Oil, Lavandula Angustifolia (Lavender) Oil, Chamomilla Recutiita (Matricaria) Flower Extract, Daucus carota (Carrot Seed) Oil, Rosa Damascena Flower Oil, Aloe Barbadensis Leaf Juice Powder, Acetyl-Glutathione, Acetyl-Carnosine, Melaleuca Alternifolia (Tea Tree) Leaf Oil, Glutathione Palmitate, Carnosine Palmitate, Sodium Hyaluronate(L), Lonicera Caprifolium (Honeysuckle) flower extract, hammamelis, Viginiana (witch hazel) extract, Xantham Gum, Potassium Sorbate, Allantoin, Cetyl Alcohol, alcohol, Denatured, Calcium Gluconate, Gluconolactone.

★ PUFFY EYE CREAM

\$30

This product works! It has the costliest ingredients that really work to remove dark circles and puffy rings around the eyes. It will also reduce fine lines around the eyes and slow signs of aging.

Usage Instructions:

Using your ring finger, dispense one pump and gently pat underneath eye and on eyelid until absorbed. Do not tug on delicate eye tissue. Apply one hour before bedtime for best results.

5 ml Ingredients:

Water (aqua) , Aloe Barbadensis Leaf Extract, Shea Butter (Butyrospermum Parkii Butter), phospholipids, sodium hyaluronate, L-sodium PCA, L-pentapeptides, Olea Europaea (Olive) Fruit Oil, Borago officinalis(Borage) Seed Oil, essential oils of rose, Pogostemon cablin Oil, Anthemis nobilis Flower Oil, carrot marshmallow, silicone, glycerin, 24 karat gold, Tocopherol, Vitamin B-complex, Vitamin A and Jasminum officinale (Jasmine) Flower Extract.

MORE EYE CREAM & LIP CREAM

PEPTIDE EYE CREAM

\$75

Diminishes fine lines and wrinkles and improves texture around the eyes.

Usage Instructions:

Using your ring finger, gently pat a small amount to the area around the eyes, and the eyelids. Gently smooth in. Do not tug on delicate eye tissue.

1 oz. Ingredients:

Aqua (Water), Butyrospermum parkii (Shea Butter) Fruit, hesperidin chalcone, dipeptide-2, palmitoyl tetrapeptide-3, glycerin, L-hyaluronic acid, Olea Europaea (Olive) Fruit Oil, Tocopherol, Aloe Barbadensis Leaf Juice, L-retinol, albumin, Prunus Amygdalus Dulcis Sweet(Almond) Oil, Pogostemon Cablin (Patchouli) Oil, lecithin, Daucus carota (Carrot Seed) Oil, Chamomilla Recutita Matricaria (Flower)Extract, Althea Officinalis (Marshmallow) Root extract, xanthan gum, and Jasminum Officinale (Jasmine) Oil

EVOLIPTION STEM CELL LIP ENHANCE

\$14

watermelon or pear spice

Plant Stem Cell Lip Therapy balm provides a lip boost of unrelenting potency, lathering your lips in loving luxury. Our special balm is a plant-based formula of the highest quality ingredients, providing a modern, science infused therapy for enhanced lips. It promotes improved lip elasticity and contouring, rebuilding the delicate matrix of cells beneath the lip and skin surface.

.35 oz Ingredients: *Sweet Almond Oil, Yellow Beeswax, Castor Seed Oil, Shea Butter*, Cocoa Butter*, Jojoba Seed Oil*, Meadowfoam Seed Oil, Evening Primrose Oil*, Avocado Butter, Murumuru Butter*, Cupuacu Butter*, Vitamin E, Amica Infused Sunflower Seed Oil*, Rosehip Seed Oil, Aloe Oil*, Neem Seed Oil*, Blueberry Seed Oil*, Watermelon Seed Oil*, Calendula Oil, Bakuchiol, German Chamomile, Malus Domestica Fruit Stem Cell Extract, Argania Spinosa Sprout Stem Cell Extract, Elderberry Fruit Extract, Rosemary Leaf Extract*, Flavor Oils*, Stevia*Organic*

EVOLIPTION LIP BUTTER SCRUB

\$14

watermelon

Superfine organic cane sugar for light exfoliation of dead skin cells, rich butters and oils packed with vitamins and antioxidants to help promote cell regeneration and repair. Prepares and exfoliates the skin so they are super soft and smooth and prepared for perfect makeup application or natural wear.

.35 oz Ingredients: *Superfine Cane Sugar*, Kokum Butter*, Cocoa Butter*, Beeswax*, Cupuacu Butter*, Apricot Seed Oil*, Coconut Oil*, Amica Infused Sunflower Seed Oil*, Siberian Sea Buckthorn Oil*, Elderberry Fruit Extract, Kalahari Watermelon Seed Oil*, Elderberry Seed Oil*, Flavor Oils**

Lips are perceived differently dependent on regional differences and popular culture. People in Latin America like large lips. North Americans and Europeans preferred large lips less, and those in Asia preferred smaller lips. All like smooth, soft lips.

SCRUBS & MASKS

RASPBERRY POLISHING SCRUB

\$39

Effectively polishes your skin by exfoliating surface dead skin cells, leaving your skin with a healthy shiny glow.

Usage Instructions:

Use once or twice a week to aggressively exfoliate the skin. Dispense a quarter-sized amount into the palm of hand, gently work around face and neck for one to two minutes, or until the products has lost its moisture, and then rinse thoroughly with warm water. Ideally, this should be done while in the shower.

Raspberries soothe and help with inflammation, which makes your skin red, sensitive, and can even make it swollen.

4 oz Ingredients:

Aqua (Water), Rubus occidentalis(raspberry fruit) concentrate, Simmondsia Chinensis (Jojoba) beads, L-lactic acid, blue Zea Mays (Corn) Kernel Meal, xanthan gum, D-glucuronic acid, vegetable glycerin, salicylic acid, and Jasminum Officinale (Jasmine) alcohol extract

BLUEBERRY SCRUB

\$39

A milder scrub than the Raspberry Polishing Scrub. It is less abrasive and can be used more often if needed. This product contains exfoliants and antioxidants like the Raspberry Polishing Scrub in a less abrasive formula.

Blueberries give skin nourishment and hydration, move toxins from the skin, maintain its pH, and tighten pores.

Usage Instructions:

Apply a thick layer to the skin and wash in a circular motion to activate the exfoliating jojoba beads.

4 oz. Ingredients:

Aqua (water), Milk caprylic/Capric triglycerides, Jojoba oil, Glycerin (vegetable), Simmondsia Chinensis (Jojoba) Seed Oil (beads), L-lactic acid, L-malic acid, L-salicylic acid, Rubus Idaeus (Raspberry) Fruit Extract Concentrate, Vaccinium Angustifolium (Blueberry) Fruit Extract concentrate, Hamamelis Virginiana (Witch Hazel) extract, Zea Mays (Corn) Kernel Meal, Xanthan gum, D-Glucuronic acid, Jasminum Officinale (Jasmine) Oil, Citrus Paradisi (Grapefruit) Oil, Medica Limonum (Lemon) Peel Oil, Citrus Aurantifolia (Lime) Oil

SCRUB AND SHINE

\$39

This is a combination mask/scrub that will leave your skin feeling and looking fresh and glowing.

Usage Instructions:

Apply a cake icing thick layer to skin after cleansing and leave on for five to fifteen minutes, then rub with water in a circular motion to activate the jojoba beads, to scrub and exfoliate the skin.

4 oz. Ingredients:

Aqua (Water), Vegetable Glycerin, Milk Caprylic/Capric Triglycerides, Simmondsia Chinensis (Jojoba) Seed Oil, L-Lactic Acid, L-Malic Acid, L-Salicylic Acid, Hamamelis Virginiana (witch hazel) Extract, Ananas Sativus (Pineapple) Fruit Enzymes, Xanthan Gum, Prunus Serotin(Wild Cherry) Bark Extract, Zeolyte, Simmondsia Chinensis (Jojoba) Beads, Citrus grandis (grapefruit) seed extract, Citrus medica limonum (Lemon) fruit extract, Citrus Aurantifolia (Lime) Fruit Extract

MORE SCRUBS & MASKS

CHERRY ENZYME MASK

\$50

The Cherry Enzyme Mask contains powerful enzymes to effectively exfoliate the top layer of dead skin cells. "A wonderful fragrance, a wonderful enzyme". This mask is exfoliating, hydrating, and loaded with powerful antioxidants.

Usage Instructions:

Use a thick application on cleansed skin for ten to fifteen minutes, then remove with warm water. For more aggressive procedure, use a micro dermabrasion treatment after the mask. This may create a very stimulating and tingling sensation.

2.5 oz Ingredients:

Aqua (Water), L-Lactic Acid, Vegetable Glycerin, L-Tartaric Acid, L-Malic Acid, L-Salicylic Acid, AnanasSativus (Pineapple) Enzyme, Punica Granatum Extract, L-Mandelic Acid, Redwine, Prunus Serotina (WildCherry) Bark Extract, Red Vitis Vinifera Seed Extract, Lycopersicum esculentum, Xanthomonas Campestris (Xanthan) Gum, Jasminum O cinale (Jasmine) Oil

GARDEN OF EDEN MASK (POWDER)

\$32

This enzyme mask will remove dead skin cells from the surface of the skin, leaving it alive and revived. Green and fresh, it feels and smells like you're putting a fresh cut garden on your face.

Usage Instructions:

Mix two parts liquid (aloe vera juice, yogurt, milk, fruit or vegetable juices, water, green tea, etc.) to one part Garden of Eden Mask Powder. Apply mixture to face and let dry several minutes. Let it get dry and tight. Rinse with warm water.

.75 oz Ingredients:

Spinacia oleracea (spinach) leaf Powder, Ananas Sativus (Pineapple), green Carica (Papaya), sweet whey, Melissa Offcinalis (Balm Mint) and Camellia Sinensis leaves.

MORE SCRUBS & MASKS

PURIFYING TEA TREE MASK

\$32

A clay mask beneficial for ridding the skin of impurities. Use on oily, acneic skin to calm irritation and control oil.

Usage Instructions:

Apply a thick layer to face and/or neck. Let dry for twenty to sixty minutes. Rinse off with warm water.

2.5 oz Ingredients:

Aqua (Water), Hamamelis Virginia (witch Hazel) Extract, Vegetable Glycerin, Caprylic/Capric Triglycerides, Kaolin, Bentonite, Salicylic Acid, Zinc Oxide, Melaleuca Alternifolia Camellia Sinensis Leaf Extract, L-Retinol, Allantoin, Eucalyptus Globulus (Eucalyptus) Leaf Oil, L-Limonene Oil, Rosmarinus Officinalis (Rosemary) Oil, L-Lactic Acid, Hydrogen Peroxide, L-Menthol Jasminum Officinale (Jasminol)

HYDRATING MASK

\$32

This mask will moisturize dehydrated skin leaving it soft and super smooth

Usage Instructions:

Apply a thick layer to face and/or neck. Leave on skin until completely absorbed, or rinse off after twenty minutes. Add Vitamin C Serum and Vitamin A Complex Serum and leave on skin for antioxidant benefits.

Ingredients:

Aqua (Water), Aloe Barbadensis Leaf Juice, vegetable glycerin, honey, riboflavin, niacin, pantothenic acid, pyridoxine, biotin, folic acid, cyanocobalamin, Cholecalciferol, Alpha Tocopherol, Sodium L-hyaluronate acid, sodium PCA, Lecithin, L-Retinol, Rosa Damascena (rose) Flower Oil, Citrus Medica Limonum (Lemon) oil, Citrus Nobilis (mandarin orange) Peel oil, Arnica montana (Flower) Extract, Olea Europaea (Olive) Fruit Oil, Carthamus tinctorius (Safflower) Seed Oil, Daucus carota (Carrot Seed) Oil, ginkgo Biloba, galli-um, Plumeria Acutifolia (Flower) Extract and royal gelee.

MOISTURIZERS

EVERYTHING MOISTURIZER

\$42

Vibe Skincare Ultra Rich Everything AHA Moisturizer is the ultimate anti-aging moisturizer to give your skin a fresh and healthy glow. With the Alpha Hydroxy Acids (AHAs), this moisturizer can exfoliate the uppermost layers of skin. Doing so reveals fresher, refined skin that appears much smoother, is more hydrated, and, over time, becomes visibly firmer. These advanced ingredients, will produce maximum results in reducing the appearance of fine lines and wrinkles. Used in conjunction with Hydrating Rain, your skin won't know it lives in the dry Colorado climate!

Usage Instructions:

Dispense two to four pumps into the palm of hand and gently spread over face, neck and décolleté, after cleansing, toning and applying Vitamin A Complex or Vitamin C Serums.

2 oz. Ingredients:

Organic Aloe Leaf Juice (Aloe Barbadensis), Organic Coconut Oil (Cocos Nucifera), Apricot Kernel Oil (Prunus Ameniaca), Glycerin, Emulsifying Wax (Cetyl Alcohol, Stearyl Alcohol, Polysorbate 60), Stearic Acid, Vitamin E (Tocopherol), Sunflower Seed Oil (Helianthus Annus), Phenoxyethanol, Glycolic Acid, Tartaric Acid, Malic Acid, Organic Shea Butter (Butyrospermum Parkii), Mango Seed Butter (Mangifera Indica), Organic Sugar Cane Extract (Saccharum Officinarum), Organic Bilberry Fruit Extract (Vaccinium Myrtillus), Organic Sugar Maple Extract (Acer Saccharinum), Organic Orange Peel Extract (Citrus Sinensis) Xanthan Gum, Tetrasodium Glutamate Diacetate

CALM & COLLECTED MOISTURIZER FOR SENSITIVE, DAMAGE SKIN

\$50

This is superior antioxidant face treatment cream. It will moisturize dry, flaky, or damaged skin. This moisturizer is best for sensitive skin and can even be used on rosacea, eczema, psoriasis or post laser chemical treatment.

Usage Instructions:

Apply to skin once or twice daily for dry and damaged skin

2 oz Ingredients:

Calendula officinalis (Flower), Melaleuca Alternifolia Leaf, Olea Europaea Fruit and Daucus Carota (carrot) Seed, Triticum Vulgare Germ, chlorophyll, royal lecithin Extract, Arnica Montana Flower Extract, Ginkgo Biloba Leaf Extract, Aloe Barbadensis Leaf, gallium, Plumeria Acutifolia Flower Extract, L-Retinol, Cholecalciferol, Alpha-Tocopherol, and Linoleic Acid.

★ REVIBE ME MIST

\$22

Usage Instructions:

A favorite, this lightweight helichrysum hydrating spritz can be applied in a number of different ways. In the morning, using it on a clean face straight after cleansing as a revitalizing pick-me-up that perfectly preps the skin for makeup. The hydration mist is dreamy to use at night, too. After a good cleanse, close eyes and spritz it all over your face, enjoying the calming, comforting sensation at the end of a long day. You can then follow with your favorite moisturizer. Put it in your car to spray in the air and on your face for good vibes.

4 oz. Ingredients:

Aqua (Water), Aloe Barbadensis (aloe vera) Leaf Juice, Rosa Damascena (rose) Flower Water, Sodium Hyaluronate, Helichrysum Italicum, Spirulina Platensis (algae) Extract, Anthemis Nobilis (roman chamomile) Flower Oil, Bisabolol, Caprylyl Capryl Glucoside

MOISTURIZERS

SQU"ALL"ANE OIL

\$42

Useful for ALL Skin types, Squalane is a clear moisturizing oil that mimics the sebum found in sebaceous glands. It is extremely soothing, moisturizing, lubricating, and protective to the skin while rarely causing irritation. This oil balances oil production, providing just enough moisture to keep the skin clear and healthy. It has powerful anti-aging properties to help the skin age gracefully as well as anti-inflammatory benefits to help troublesome conditions like acne and eczema.

Usage Instructions:

Apply topically as needed. Use after you wash your face on clean skin. This can be used alone or as a base layer under facial moisturizer. You can also use this serum for your hair or use before heat tools on your hair.

2 oz Ingredients:

Squalane Olive Oil derived

EVERYTHING OIL

\$48 / 70

Facial oils are more popular now more than ever and this Everything Oil is good for just about everything - makeup removal, first cleanse, moisturizing hands, face and body. This oil may also be used to improve sexual intercourse and on scabs to promote healing.

This oil is more potent than cream moisturizers because it is natural and highly effective. By adding your own water prior to applying, you can save money and get better moisturizing results.

Usage Instructions:

Facial oils are best used when they're most easily absorbed: at night. There is, however, one exception: if you have dry skin, you may benefit from adding a few drops of facial oil to your morning routine to layer under your makeup.

2 oz or 4 oz Ingredients:

Squalane, Carthamus Tinctorius (Safflower) Seed Oil, Persea Gratissima (Avocado) Oil, Argania Spinosa Kernel Oil (Argan Oil), (Embllica Ocinalis) Amla Oil, Crambe Abyssinica Seed Oil (Abyssinian Oil), Sclerocarya Birrea Seed Oil (Marula Oil), Citrus Medica Limonum (Lemon) Fruit Extract (Citrus seed Extract)

SUN DAMAGED TREATMENTS & SUN PROTECTION

"THE ONE" SUN PROTECT SPF 30

\$30

Providing UVA and UVB protection, Vibe's sunscreen is the only sunscreen you'll ever need to wear. A high-quality, mineral based sunscreen that is non-toxic, water resistant (30 min.) and reef-friendly, it protects from damaging UVA and UVB rays.

Usage Instructions:

Apply to clean skin 10-15 minutes before sun exposure. For daily use, allow the product to absorb completely before applying makeup.

2 oz. Ingredients:

Aloe Vera, Butyrospermum Parkii (Shea Butter), Camellia Sinensis (Green Tea), Caprylic/ Capric Triglyceride (Coconut Oil), Caprylyl/Capryl Glucoside, Glycerine, Glyceryl Caprylate, Glyceryl Stearate itrate, Glyceryl Undecylenate, Helianthus Annus (sunflower) Oil, Lavandula Angustifolia (Lavender) Oil, Lecithin (Sunflower), Polyhydroxystearic Acid, Radish Root Fer- ment Filtrate, Rubus Idaeus (Red Raspberry) Seed Oil, Stearic Acid, Tocopherol (Vitamin E), Xanthan Gum.
Active Ingredient: Zinc Oxide 8% Titanium Dioxide 8%

CLEAR AND BRIGHT LIGHTENING LOTION

\$50

This is the most powerful, non-toxic, skin lightening agent known containing NO Hydroquinone. Clear and Bright will work to treat hyper pigmentation, sun spots, brown spots and uneven skin tone. It will also help to treat post-inflammatory hyper pigmentation / redness from acne and/or skin injury. If your skin is more olive toned and very dark with a lot of melanin, this product should be used for approximately 2 weeks prior to esthetic treatments like micro dermabrasion, micro needling and/or laser treatments to minimize the risk of hyperpigmentation.

Usage Instructions:

Apply a small amount to dark spots on face, chest, arms and hands at bedtime. It is most effective to let sit for 15-20 minutes before applying serums or moisturizers.

1 oz. Ingredients:

Aqua (water), plant cellulose, Ricinus Communis Seed Oil, glutathione palmitate, pyruvic acid, azelaic acid, kojic acid, acetyl D-glucosamine, glycolic acid polymer, lactic acid polymer, L-ascorbic acid, beta-carotene, phenyl butyl nitron and Citrus limonum (Lemon) extract.

SPECIALTY PRODUCTS

HEALING CREAM

\$60

This is a superior antioxidant treatment cream that will moisturize dry, flaky or damaged skin. It is terrific to calm and heal the skin after resurfacing peels, facial rejuvenation, laser treatments or waxing. It can also be used as ordered by a medical professional. Put on your lips and skin for immediate relief of chapping and dryness. Use after wind, snow or sun exposure.

Usage Instructions:

Apply daily as needed to affected areas.

2 oz. Ingredients:

Aqua (Water), Calendula Officinalis Flower, Lecithin, Melaleuca Alternifolia (Tea Tree) Leaf, Olea Europaea (Olive) Fruit Oil, Daucus carota (Carrot Seed), Triticum Vulgare (Wheat) Germ, Chlorophyll, Royal gelee, Arnica montana (Flower) Extract, Ginkgo Biloba Leaf Extract, Acetyl-Glutathione, Glutathione Palmitate, Aloe Barbadensis Leaf Juice, Gallium, Plumeria Acutifolia (Flower) Extract, L-Retinol, Cholecalciferol, Alpha-Tocopherol, Linoleic Acid

★ SALVEATION - POWERFUL SKIN HEALING SALVE

\$45

- Crafted to treat the after-effects of peels, laser therapy & micro-needling and tattooing.
- Designed to boost skin radiance & reduce irritation, including symptoms of eczema & psoriasis
- Expertly blended for wound healing & to calm damaged, cracked or swollen skin.
- Optimized to reduce fine lines, wrinkles, discoloration, stretch marks & scarring.
- Crammed with organic & active ingredients for maximum glow.

Totally halo-worthy -100% natural, vegan, plant-based and cruelty-free. You'll love this pale golden balm with a sweet and nutty aroma. Mellow murumuru butter will banish irritation, while blueberry seed oil will wave away redness. Plus there's squalene to lessen swelling, jojoba oil to lock in moisture and rice bran oil for that crucial radiance boost.

Salvation has omega-3 fatty acids to reduce signs of aging, Kalahari melon seed oil for skin tightening and plant-based collagen for strengthening. It's not so much a beauty balm as it is a beauty banquet.

2 x .25 oz. Ingredients: Kokum Butter*, Murumuru Butter*, Tucuma Butter*, Jojoba Oil*, Castor Oil, Rice Bran Oil*, Blueberry Seed Oil, Amica-Infused Sunflower Oil, White Lupin Seed Extract, Elderberry Fruit Extract, Kalahari Melon Seed Oil*, Argan Oil*, Calendula-Infused Sunflower Oil*, Rosehip Oil*, Neem Seed Oil*, Buriti Oil, Organic

SCAR AND STRETCH MARK REPAIR

\$50

This is the most powerful scar and stretch mark treatment available with spectacular natural ingredients, 31 essential oils and epithelial growth factor. The ingredients in this product stimulate the regenerative immune function to increase cell turnover and replace dense scar tissue with new, normal skin. Works the best on newer scars. Use after receiving scar revision treatments.

Usage Instructions:

Apply a small amount to scars two to three times daily.

1 oz. Ingredients:

Calendula Officinalis, Melaleuca Alternifolia (Tea Tree), Olea Europaea (Olive) and Daucus carota (Carrot Seed), Triticum Vulgare (Wheat) Germ, Aqua (Water), chlorophyll, azurite, royal gelee, acetyl-glutathione, acetyl-carnosine, Arnica Montana Powder, Ginkgo Biloba, Aloe Barbadensis Leaf Juice, gallium, Plumeria Acutifolia (Flower) Extract, L-Retinol, L-Ascorbic Acid, Cholecalciferol, Alpha-Tocopherol and Linoleic Acid, dextrans of 31 essential oils, Allium Cepa (Onion) Bulb Extract and epithelial growth factor.

COLD SORE & ACNE TREATMENTS

COLD SORE CREAM

\$20

Vibe Cold Sore Cream, effectively treats cold sores by reducing the severity and duration of the virus that causes this condition, while soothing and healing the skin. If you are prone to cold sores and have a dental visit or appointment for lip augmentation, this is an absolute must have.

Usage Instructions:

Apply a small amount to cold sore at first sign of sore and reapply five to seven times per day as needed until the cold sore disappears. Use a few days prior to dental or esthetic treatments to help prevent cold sore from appearing.

5 ml Ingredients:

Aqua (Water), Olea Europaea (Olive), Calendula Officinalis, Melaleuca Alternifolia (Tea Tree) oil, Daucus Carota Sativa Extract (carrot), Triticum vulgare (wheat germ), royal gelee, Arnica Montana Flower Extract, Ginkgo Biloba Leaf, Aloe Barbadensis Leaf Juice, plumeria with Vitamins A, D3, E, and F, iron dextrans of 31 essential oils.

BLEMISH RESCUE

\$24

Quickly clears up the occasional blemish.

Usage Instructions:

Apply a small amount onto a cotton square and apply to affected area.

1 oz. Ingredients:

SD Alcohol 40, glycolic acid Polymer, L-salicylic acid, L-lactic acid, L-mandelic acid and L-limonene

PROBLEM SKIN GEL

\$40

An oil free moisturizing gel for problem skin. A perfect moisturizer for hormonal skin and acne, which will not clog pores and help maintain the skin's moisture barrier and balance.

Usage Instructions:

Apply to problem skin area twice a day.

1 oz. Ingredients:

Aqua (water), Hamamelis Virginiana (Witch Hazel) extract, Glycerin, Lactobacillus Ferment, Mandelic Acid (L), Alcohol, Gluconolactone, Syringa Vulgaris (Lilac) Leaf Cell Culture Extract, D2O (Heavy Water), Lecithin, Xanthan Gum, Lysolecithin, Lysophosphatidic Acid, Potassium Sorbate, Phenoxyethanol

*** see acne protocol sheet for the products you may need to heal even the most stubborn, painful acne.**

ACNE PROTOCOL

ACNE PROTOCOL

1. Daily Clarifying Cleanser is used to clean the pores of the skin. In addition, the AHA polymers of glycolic acid and the polymer of beta-hydroxy acid (salicylic acid) help exfoliate and are mildly anti-bacterial and anti-fungal. This eliminates the need for systemic antibiotics.
2. Scrub - use the raspberry, jojoba bead polishing scrub once to three times a week to aggressively exfoliate and cleanse the skin (microdermabrasion or other mechanical treatments will work as well).
3. After cleansing, a Clarifying Toner is applied to the skin with a cotton pad. The toner remains on the skin to acidify the skin and acts as an anti-microbial as well.
4. The final step of the acne protocol is the application of the Anti-Inflammatory Peptide Lotion. This product contains peptides that will improve even the worst cystic acne without the use of Accutane. This lotion, used in conjunction with C A Difference - Vitamin C L-Carnosine Serum, will also serve to reduce scar tissue that sometimes is the result of cystic or severe acne.

An improvement in all acne can be seen in a very short period of time if this protocol is followed faithfully

We also have the Problem Skin Gel. This is particularly useful for acne due to hormonal imbalances. Application of this product alone improves most acne outbreaks in a few days

EVEN BETTER RESULTS ARE EXPERIENCED WITH THE ANTI-INFLAMMATORY PEPTIDE LOTION WITH CBD.

ABOUT ACNE VULGARIS

Acne Vulgaris is a disease of both the skin and the gut. Sometimes antibiotics are used to treat this type of acne; however, the use of broad-spectrum antibiotics to treat Acne Vulgaris is like using a cannon instead of a fly-swatter, and can even exacerbate the problem in some cases.

The first treatment protocol must involve the use of diet and nutritional supplements. Sugar of all kinds must be eliminated from the diet, as well as all fats that are not meant for human consumption. It is also believed that soy must be eliminated, as it causes hormonal imbalances and thyroid problems.

The use of enzyme supplements, B Vitamins and Vitamin C also are needed to restore balance to the gut. Probiotics are a must in the treatment of acne. Once the above conditions have been met, we can begin the treatment phase with Vibe Skincare products.

ABSOLUTE MUST HAVE ANTI-AGING PROTOCOL

★★★ ABSOLUTE SKIN TRIO

\$275

The ABSOLUTE protocol is without a doubt the most powerful, rapid and comprehensive skin care developed. The combination of unique ingredients, and no toxic compounds, supplies the skin with ALL of the essential nutrients required to maintain an optimum physiological response. This is an ABSOLUTELY AMAZING SYSTEM FOR A YOUNGER LOOKING, REFRESHED APPEARANCE!

With use, improvement in skin tissue can occur in as little as 24 hours. While the goal is to use these products every evening, if the protocol was used only every 3 days the positive changes in the skin are apparent.

ABSOLUTE VITAMIN C, enhanced with master anti-oxidant glutathione (a stable form), Absolute C increases the natural SPF of the skin. It repairs sun damage, protects the DNA from damage due to overexposure to the sun, and lightens dark spots over time much more efficiently than toxic hydroquinone products. You'll experience increased blood circulation, nerve tissue support, and collagen and elastin repair, maintenance and production.

ABSOLUTE PEPTIDE combination reduces wrinkles, fine lines, smile lines, and tightens the neck tissue more effectively than any product that we have seen. This is due to the ingredients activating skin stem cells, and I know of no other products that make that claim.

ABSOLUTE A is superior to Retin-A, Retinol, Retinoic Acid and Tretinoin which may thin the skin and requires a prescription. Absolute A contains 2 powerful ingredients needed for regeneration of new skin cells and cellular turnover, which keeps skin smoother, brighter and rejuvenated. These ingredients are found in the correct isomer so they help regenerate new skin cells without harming the dermis.

Usage: Wash, scrub, tone, then mix a combination of these 3 products in the hand and apply generously and evenly to the neck, face, and upper chest. Best to use at night and let the products do magic while you sleep.

**STOP SEARCHING. YOU DESERVE THE BEST SKINCARE WITH RESULTS.
AFFORDABLE AND EFFECTIVE. Purchase online at VIBESKINCARE.COM**

ABSOLUTE ANTI-AGING PROTOCOL

ANTI-AGING PROTOCOL:

1. **AM** After **cleansing and toning**, the Miracle C product is applied. Use enough to cover the face, neck & décolletage. Let this product soak into the skin for a few minutes, then massage the remainder of the product in the skin.

Cleansers: Creamy Cleanser or Cherry Enzyme Cleanser for normal skin or Apple Delight Cleanser for dry or Extra Gentle Cleanser

Toners: Antioxidant Toner for sensitive skin, Strawberry Melon for dry skin, Glycolic for normal skin

2. Use Raspberry Polishing Scrub for normal skin or Blueberry Polishing Scrub for sensitive or dry skin 3x weekly after cleansing and before toning.
3. **Moisturize** with your favorite Vibe moisturizer or peptide of your choice.
4. Apply anti-aging eye cream and lip cream
5. Always apply **sunscreen** after regardless of weather or cloud conditions. Apply makeup as desired.
6. More Vibe Peptide may be applied during the day on top of makeup, if required. You may also spritz the face with Revibe Me Mist for a fresh pick-me-up
7. **PM** Before bedtime, cleanse and tone then use the **THREE ABSOLUTE PRODUCTS**. Mix together Absolute A, Absolute C and Absolute Peptide and cover face, neck and décolletage entirely.
If you do not have the Absolute Products, Vitamin A is applied after instead. Apply enough drops into hand to cover the face, neck and décolletage, massage into the skin and let dry before applying Vital Therapy Peptide or moisturizer.
8. If brown spots and pigment are a concern, apply a very thin layer of Even & Bright before peptides or moisturizer.

GLUTATHIONE IV THERAPY & SUPPLEMENTS

The Miracle Molecule

Recent statistics have good news for us. Centenarians are the fastest growing age group in America. What's the secret to a long and healthy life? And, what can you do right now to ensure you will one day take your place in the ranks of vibrant 100 year olds?

The answer can very well be found in the presence of a small but potent molecule made in every cell of your body called glutathione. While glutathione may not have the same notoriety as other more high profile nutrients such as vitamins C and E, it certainly is a miracle molecule.

Glutathione levels of 41 centenarians between the ages of 100-105 years old were compared with people between 60-79 years old. They found that the mean glutathione activity was significantly higher in centenarians than in the group of younger elderly subjects, and that centenarians with the best functional capacity tended to have the highest glutathione activity.

The study concluded that high glutathione levels are associated with increased survival. In a later study, glutathione levels were evaluated in 87 women in excellent physical and mental health ranging in age from 60-103. The scientist found that all women had very high blood glutathione levels. They followed these women for five years, and concluded "high blood glutathione concentrations are characteristic of long-lived women.

The life-Extending Master Antioxidant

Glutathione (GSH) is a tripeptide molecule composed of three amino acids: glutamic acid, cysteine and glycine. It is one of the main non-protein antioxidants that exists within each cell, and has been referred to as the body's "master antioxidant." It rules the body's cells and is abundant in cytoplasm, nuclei and the mitochondria.

Although discovered in 1888, the initial research on glutathione deficiency was conducted in the 1920's and the 1930's and concentrated on the eye, particularly the lens. It is well known that macular degeneration is related to low levels of glutathione. By the 1980's, researchers realized that glutathione was a major player in all aspects of good health and disease prevention.

Without adequate glutathione levels, each cell would eventually disintegrate from massive free radicals damage, your body would have little resistance to metabolic waste products, and your liver would be severely compromised from the eventual accumulation of toxins. Our cells would also be defenseless against the many bacteria, viruses and many of the carcinogens that pose a health threat.

For the past three decades, researchers have been investigating the role of antioxidants for the maintenance of good health as well as for the prevention and treatment of oxidative stress-induced diseases.

While the better known antioxidants such as vitamin A, vitamin E and selenium must be obtained from the diet. Glutathione, however, is considered the master antioxidant because all other antioxidants depend upon the presence of glutathione to function properly. For example, it is essential in regenerating oxidized forms of vitamins C and E by re-circulating them back into antioxidant function. Normally once these antioxidant vitamins scavenge free radicals, they can become oxidized themselves and attack the healthy cells. This is known as peroxidation. Glutathione easily restores them to their reduced form so they can resume the free radical scavenging activity again.

When the glutathione systems are functioning effectively, the use of antioxidants maximizes their effectiveness in the treatment and prevention of degenerative diseases associated with oxidative stress. This includes arthritis, cancer, cardiovascular diseases, diabetes and macular degeneration.

DETOX, IMMUNITY, CANCER PREVENTION...

Glutathione performs important jobs in the body which includes protecting cells against the destructive effects of free radicals; detoxifying external substances such as drugs, environmental pollutants and carcinogens; maintaining cell membrane stability; regulating protein and DNA biosynthesis and cell growth; enhancing immunologic function through its influence on lymphocytes; prostaglandin synthesis; and amino acid transport.

Since it is involved in so many critical functions, glutathione impacts all level of the body's physiological functioning. It is believed that glutathione has the potential to treat and prevent hundreds of diseases. When you consider the role glutathione plays in the basic wellness of cells, the primary living building blocks in our body, you can appreciate why maintaining glutathione levels is critical for optimal well-being.

Essential Support of Immunity and Detoxification

In addition to its role as a powerful antioxidant, glutathione also serves as an immune system enhancer and a detoxifier.

As an immune system enhancer, glutathione is needed for the proper functioning, and in particular the creation and maintenance, of T cells lymphocytes, the body's front line defense against infection.

Glutathione plays a central role in the proper function of the white blood cells. Dr. Gustavo Bounous, a leading Canadian glutathione expert, researcher and author, says, "The limiting factor in the proper activity of our lymphocytes (the white blood cells) is the availability of glutathione. The healthy growth and activity of the whiteblood cells depends upon high levels of intracellular glutathione."

In people with immune deficiency, glutathione levels fall well below the normal levels in blood and immune cells. Restoring glutathione levels to those found in healthy people has benefited immune deficient patients. Studies have suggested that an increase in the glutathione level in the body can help patients with HIV (AIDS) to improve theirsurvival.

In a toxic world, survival literally depends on the body's ability to adequately detoxify the tens of thousands of chemicals that are inhaled, ingested, and absorbed into the body. Glutathione also comes to our rescue as a major detoxifier. The level of glutathione in the liver is critically linked to the liver's capacity to detoxify. This means the higher the glutathione content, the greater the liver's capacity to detoxify harmful chemicals. Glutathione is able to bind to organic toxins, as well as heavy metals, solvents and pesticides, and transform them into a form that can be excreted in urine or bile.

Glutathione's Role in Cancer Prevention

Columbia University School of Public Health, estimated that 95% of cancer is caused by diet and environmental toxicity. It is evident that in order to prevent cancer, it is imperative to protect the body from this onslaught of toxins.

Dr. Dean Jones Ph.D., professor of biochemistry, Director of Nutritional Health Sciences at Emory University and a recognized expert on glutathione states, "The role of glutathione that has probably received the most attention in the past 50 years is the function of glutathione as an anti-carcinogen. Glutathione is used to counter reactive chemicals that would otherwise cause mutations in the DNA and cause cancer. A little over 50 years ago it was recognized that many chemicals we are exposed to are activated in the body to reactive chemicals, the most central way the body gets rid of these is by reacting these with glutathione.

Glutathione is the most **anti-carcinogenic** chemical we have in our body.

Most people do not inherit "cancer genes" rather; they have a genetic weakness in their detoxification system. Glutathione is an extremely important part of the detoxification system, and thus of our defenses against cancer.

THE MIRACLE MOLECULE

The Miracle Molecule

Over 80,000 published studies have shown the glutathione has a profound effect on a multitude of health challenges. As a powerful free radical scavenger, immune enhancer and detoxifier, glutathione has shown to be effective in the following conditions; autism, cardiovascular disease, autoimmune diseases, asthma, diabetes, lung disease, Parkinson's disease, gastrointestinal inflammation and Crohn's disease, hepatitis, chronic fatigue syndrome, neuro degenerative diseases such as MS (multiple sclerosis), ALS (Lou Gehrig's Disease), Alzheimer's and Parkinson's and degenerative eye conditions such as cataracts and macular degeneration.

Medical science is still ascertaining all the critical roles played by glutathione in disease resistance and general good health. Clinical evidence links low glutathione levels to the most common illnesses of our time as well as newly emerging diseases.

Staying healthy as well as recovering one's health requires maintaining high levels of glutathione. The older we get the more our levels of glutathione decline, especially after the age of 45. Therefore, shoring up your glutathione reserves is crucial.

Who needs to increase glutathione levels? If you have been diagnosed with a chronic illness, are in pain, have autism, are under stress, have digestive problems, have a weakened immune system, eat a lot of processed foods, engage in strenuous exercise, are overweight and feel

GLUTATHIONE & SKIN LIGHTENING

Glutathione can whiten skin because:

- Glutathione inhibits the formation of melanin. This is through stopping the chemical L-DOPA's ability to interact with tyrosinase, an enzyme used in melanin production.
- It inhibits the actual production of melanin by interrupting L-DOPA function
- Glutathione stops the enzyme tyrosinase by binding with copper within the enzyme's active site
- It stops the formation of peroxides and free radicals, which activate tyrosinase and lead to the formation of melanin

Getting it comfortably & quickly with IV Therapy

THE HIGHEST QUALITY INGREDIENTS

Acetyl-Carnosine - A naturally occurring compound chemically related to the dipeptide carnosine increases mitochondria in cells. Particularly active against lipid peroxidation.

Acetyl Glutathione - Glutathione is a potent antioxidant, and its depletion is a component of every chronic disease, or inflammatory condition, including aging. A tri-peptide that contains an unusual peptide linkage between the amine group of cysteine and the carboxyl group of the glutamate side-chain. It is an antioxidant, preventing damage to important cellular components caused by reactive oxygen species such as free radicals and peroxides.

Albumin/ Albumen - Refers generally to any protein that is water soluble. It is primarily used in skin care for its binding properties.

Alcohol Denat - Denatured alcohol is used as a solvent.

Aleurites Moluccana Seed Oil - When used in cosmetics and personal care products, it functions as a skin-conditioning agent-miscellaneous and a skin-conditioning agent -occlusive.

Allantoin - A moisturizing and keratolytic, meaning that it causes keratin in the skin to soften. This property helps skin to heal more quickly and to bind moisture more effectively.

Aloe Vera - Widely used in the cosmetics and alternative medicine industries. It has various rejuvenating, healing or soothing properties.

Alpha Lipoic Acid - A antioxidant that is made by the body and is found in every cell, where it helps turn glucose into energy. Antioxidants attack "free radicals" and waste products created when the body turns food into energy.

Althea Officinalis (Marshmallow) Root Extract - The mucilaginous extract of the roots of the Marshmallow attracts water and functions as a skin humectant. It is used to soothe and soften the skin while promoting flexibility of the stratum corneum.

Amino-Guanidine - Similar to D-Beta Glucosamine, this is an anti-inflammatory agent and a building block to collagen and elastin. The D-Beta isomer is the only isomer that the human body can utilize for this function. It works in combination with beta fructan to build stable mucopolysaccharides in the tissue.

Apple Extract - A natural fragrance and antioxidant also containing the moisturizing Malic Acid.

Aqua-Lanosterol - A tetracyclic triterpenoid, which is the compound from which all steroids are derived.

Arnica - Applied to the skin as a cream, ointment, liniment, salve or tincture, arnica has been used to soothe muscle aches, reduce inflammation and heal wounds. It is commonly used for injuries such as sprains and bruises.

Ascorbic Acid 20% - Also known as Vitamin C, this is a well documented antioxidant for the skin and is the main ingredient in Vitamin C Serum product. It is well known that L-Ascorbic Acid is required for normal skin physiology (in smaller quantities). In larger concentrations it is restorative to skin damaged by sun exposure, smoking and/or improper nutrition (i.e. eating large quantities of sugar). This concentration also acts as a preservative for the product and is commonly used in food preservation. The L form is the only form that can be utilized in the formation with L-Amino Acids into collagen and elastin.

SAFE & NON-TOXIC

Astaxanthin - A carotenoid. It is an antioxidant with a slightly lower antioxidant activity in some model systems than other carotenoids.

Azelaic Acid - This saturated dicarboxylic acid exists as a white powder. It is found in wheat, rye, and barley. In plants, azelaic acid serves as a "distress flare" involved in defense responses after infection. Azelaic Acid is used to treat mild to moderate acne. It works in part by stopping the growth of skin bacteria that can help cause acne. Azelaic Acid also helps to lessen acne by keeping skin pores (tiny openings on the skin's surface) clear.

Azurite - A soft, deep blue copper mineral produced by weathering of copper ore deposits.

B Complex Vitamins - B vitamins are a group of water-soluble vitamins that play important roles in cell metabolism. B vitamins include; B1 (thiamine), B2 (riboflavin), B3 (niacin or niacinamide), B5 (pantothenic acid), B6 (pyridoxine, pyridoxal, or pyridoxamine, or pyridoxine hydrochloride), B7 (biotin), B9 (folic acid) and B12 (various cobalamins; commonly cyanocobalamin in vitamin supplements).

Beeswax - From virgin bees, a non-toxic emollient and emulsifier.

Behenalkonium - An excellent conditioning and anti-static agent. It smoothes the hair follicle to give it a shiny appearance. It's frequently used in shampoos and conditioners to improve the hair's body and manageability. It also functions as a surfactant, and is commonly used in shaving creams and liquid soap.

Behenyl Alcohol - An emulsifier that also keeps the oil and liquid parts of a solution from separating. Its other functions include altering the thickness of a liquid, increasing foaming capacity, and stabilizing foams.

Bellis Perennis - A common European species of daisy, of the Asteraceae family, often considered the archetypal species of that name. It is used in homeopathic medicine as a treatment for wounds and after certain surgical procedures.

Beta Carotene - A powerful antioxidant which when split by the body forms two L-Retinol molecules.

Beta-Fructan - A polysaccharide found in mushroom extracts and is documented in Japanese studies to improve and stimulate immune functions of the skin (and entire body). This is a right-handed polymer (similar to aloe vera polysaccharides) that guides the activity of glucosamine into the cellular compartments that oversee the skin's moisture retention.

Beta-Glucan - Mushroom derived polysaccharide that enhances immune function (see Beta Fructan).

Beta-Glucosamine - Similar in structure to cellulose in humans, it is used in combination with Beta Fructan to build stable mucopolysaccharides in the tissue. It is an anti-inflammatory agent and a building block to collagen and elastin. The D-Beta isomer is the only isomer that the human body can utilize for this function. It works.

Blue Cornmeal - A meal (course flour) ground from dried maize. It is used as an exfoliant.

Borage Oil - Made from a wildflower (*Borago officinalis*) commonly called the "starflower". Used as an anti-inflammatory agent as well as for certain other skin conditions. It has one of the highest amounts of Gamma-Linolenic Acid (omega-6) of seed oils. It is considered to be soothing, regenerative and beneficial to all skin types.

CONFIDENCE WITH EVERYDAY USE

Calcium Gluconate - A mineral supplement. Improves skin moisture content and reinforces the cutaneous barrier. Helps to revitalize and restructure the skin.

Caprillic/Capric Triglycerides - Proven, non-toxic emollient which prevents the loss of water from the skin. This is anti-fungal and is derived from milk and butter fat. They condition the glycol-proteins that connect epidermal cells and improve the permeability barrier of the stratum corneum. See Milk Caprillic/Capric Triglycerides.

Caprylate/Caprates - Primarily used in cosmetics as an emollient and emulsifier for formulations. It is an ester of coconut fatty alcohol, caprylic acid and capric acid. It improves the glide of many varieties of products during application and leaves a non-greasy, soft after touch.

Carnosine Palmitate - Increases cell mitochondria.

Cassia Betaglycan - Derived from Cassia bark. Left-handed, D-catechin, boosts immunity; betaglycan calms skin during immune reactions.

Castor Oil - A vegetable oil obtained from the castor bean. Castor isostearate succinate is a polymeric mixture of esters with isostearic acid and succinic acid used for skin conditioning, such as in shampoo, lipstick and lip balm. Ricinoleic acid is the main component of castor oil, and it exerts anti-inflammatory effects.

Cetearyl Alcohol - An alcohol of a fatty acid found in egg yolks which suppresses peroxidation of epidermal lipids. It is a non-toxic emulsifier.

Cetearyl Olivates - A nonionic emulsifier that helps blend ingredients together in cosmetic solutions, usually ones with moisturizing properties. It helps soften the skin and hair, and gives products a smooth and luxurious feel.

Cetyl Alcohol - An emollient and emulsion stabilizer with low toxicity and does not promote acne.

Cherry Puree/Wild Cherry Bark Extract - These are soothing antioxidants.

China - An ancient herb with several antioxidants and energetic qualities.

Chlorophyll - A green pigment found in cyanobacteria and the chloroplasts of algae and plants. It acts as an antioxidant.

Chrysin - A naturally occurring flavone chemically extracted from the blue passion flower (*Passiflora caerulea*). Advertised as an aromatase inhibitor supplement by bodybuilders and athletes. It has been shown to induce anti-inflammatory effects, most likely by inhibition of COX-2 expression and via IL-6 signaling.

Citric Acid - A beta hydroxy acid (BHA) that softens the skin and is an essential contributor to the formation of L-ATP, the body's most important source of energy. It is found in all fruit.

Cyclotetrasiloxane (or Clotetrasiloxane)/Decamethylcyclopentasiloxane - A silicone polymer commonly used in cosmetics and skin care products to keep ingredients in the skin for a longer period of time.

NEVER AN UNECESSARY INGREDIENT

Cocamidopropyl Betain - An amine found naturally in coconut milk, combined with a glucosamine-like substance. It allows for foaming action and is a source for collagen building glucosamine. It also maintains the elasticity of the skin.

Coconut Amino Acids - an Assistant to the lathering effect.

Cranberry Extract - An antioxidant.

Cyclomethicone/Dimethicone Copolyol and Silicone - Increases the lining of hyaluronic acid and other mucopolysaccharides to protein in connective tissue and skin. Silicon is increasingly recognized as important in wound healing, anti-aging and maybe acne control.

Cyclopentasiloxane - A silicone polymer, allowing the active ingredient to remain longer.

D2O (Heavy Water) - Formally called deuterium oxide. It is a form of water that contains the hydrogen isotope deuterium rather than the common protium isotope. This difference increases the strength of water's hydrogen-oxygen bonds, and this in turn is enough to cause differences that are important to some biochemical reactions. The human body naturally contains deuterium equivalent to five grams of heavy water.

D-Beta Fructan - See Beta Fructan.

D-Beta Glucosamine - See Beta Glucosamine.

Denatured Alcohol - Ethyl alcohol for topical application

Depeptide-2 - A dipeptide consisting of the standard amino acids valine and tryptophan. It mainly works as a skin conditioning agent. It's also believed to improve lymphatic circulation, and for this reason is often used in eye creams aiming to combat dark and puffy under-eye circles. Many cosmetic manufacturers market it as clinically proven to reduce under-eye bagginess and puffiness, however, it's difficult to find any (and unbiased) "clinical" data supporting such claims.

D-Glucuronic Acid - Chiral D-Glucuronic Acid is the most basic building block of hyaluronic acid and chondroitin sulfate and precursor of Vitamin C, the chief detoxifying agent in both plants and animals. Hyper-efficient skin moisturizer direct from Nature.

Diethanolamine - Often abbreviated DEA. It is used as a surfactant.

DMAE - Also known as "dimethylaminoethanol" and "dimethylethanolamine". It is a natural compound sometimes used as an ingredient in skin-care products. Also sold in dietary supplement form, DMAE is essential to the production of acetylcholine (a type of chemical that helps nerve cells to transmit signals).

D-Panthenol - Used in cosmetics, panthenol is a humectant, emollient and moisturizer. Also known as Vitamin B5.

KNOW WHAT YOU'RE PUTTING ON YOUR SKIN

Epithelial Growth Factor - Derived from plants, EGF results in cellular proliferation.

Ergothioneine - A naturally occurring amino acid and is a thiourea derivative of histidine, containing a sulfur atom in the imidazole ring. This amino acid has antioxidant properties, but its chemistry differs from conventional sulfur-containing antioxidants such as glutathione or lipoic acid. It conserves and maintains the levels of other antioxidants such as Vitamin E, Vitamin C and glutathione.

Essential Oils - Uses aromatherapy principals. Anti-fungal, anti-bacterial and anti-viral.

Ethyl Hydroxide - A form of ethyl alcohol used solvent in the Vitamin A/Glycolic Complex in a very small amount that will not dry the skin.

Ethyl Macadamiate - Well suited for increasing sunscreen coverage. It is a promising alternative to cyclomethicone and dimethicone as a skin feel modifier where botanical, nonvolatile and/or lipid-soluble substance is preferred.

Foraha Oil - A remarkable topical healing agent with skin healing, anti-neurologic, anti-inflammatory, antimicrobial, antibiotic and antioxidant properties. The healing capabilities has been thoroughly researched. The evidence on its ability to heal damaged skin is both compelling and astounding.

Galium - A detoxifier that is used in a wide range of problems involving the lymph system, such as swollen glands.

Gingko - Gingko extract may have three effects on the human body: improvement in blood flow (including microcirculation in small capillaries) to most tissues and organs, protection against oxidative cell damage from free radicals, and blockage of many of the effects of platelet activating factors.

Glutathione Palmitate - A topical glutathione pro-moetation - a truly anti-aging nutrient.

Glycerin - Steam distilled from sugar fermentation. Improves the mobility of the right-handed ingredients through the dead stratum corneum.

Glycerol - Glycerin is an emollient that moisturizes the skin. It also enhances the mobility of right-handed ingredients to penetrate the dead stratum corneum.

Glyceryl Distearate - Improves the mobility of the D (right-handed) ingredients to penetrate the stratum corneum.

Glyceryl Isotearate - Used as an emollient and thickening agent in cosmetics.

GOES ON YOUR FACE AND INTO YOUR BODY

Gluconolactone - An antioxidant acid (PHA) that is capable of chelating metals.

Glyceryl Stearate - A non-toxic emulsifier.

Glycolic Acid Polymer – An exfoliant to soften the skin that breaks down slowly in tissues.

Green Papaya - A rich source of nutrients such as provitamin A carotenoids, Vitamin C, B Vitamins, lycopene, dietary minerals and dietary fiber.

Green Tea Extract - A herbal derivative from green tea leaves containing antioxidant ingredients. Green tea extract is twenty times more antioxidant-active than Vitamin C.

Hamamelis Extract - An antioxidant extract that contains the powerful antioxidants L-Epigallocatechin (also found in green tea extract), D-Gallocatechin and D-Hamamelose which remove free radical damage and has a calming effect.

Hazel Nut Extract - Hazelnuts are rich in protein and unsaturated fat. They contain significant amounts of thiamine and Vitamin B6.

Honey - Honey contains tiny amounts of several compounds thought to function as antioxidants.

Hordeum Disticon (Barley) Extract – Anti-aging active ingredient that protects skin against free radicals.

Hyaluronic Acid - A major component of skin, where it is involved in tissue repair

Hydroquinone – A bleaching agent.

Idebenone - An antioxidant similar to coenzyme Q-10.

jasimine Extract (Jasminol) - Aromatic alcohol from the jasmine (branch of the olive family) that is a powerful pheromone; discourages formation of bacteria and other micro-organisms. A natural preservative.

Jojoba Beads - Small beads used to exfoliate the skin. Commonly used in cosmetic formulations due to its remarkable similarity to the natural oils produced by the human skin.

Kaolin - A white clay also known as China Clay. It serves as a thickener and a base in mask products. Additionally it helps remove debris, absorb oils and reduces shine on skin.

Kojic Acid - Used in cosmetics to lighten skin. It has antibacterial and antifungal properties.

Lactobacillus Ferment - A proteolytic fraction that releases proteases (enzymes that breakdown proteins). The proteases are then used in cosmetics for gentle skin exfoliation and reduction of fine lines and wrinkles.

YOU DESERVE THE BEST INGREDIENTS

L-Ascorbic Acid 20% - Antioxidant for the skin. It is required for normal skin physiology (in smaller quantities) and in larger concentrations it is restorative to skin damaged by sun exposure, smoking, or improper nutrition (large quantities of sugar). It also acts as a preservative for the product and is commonly used in food preservation. The L form is the only form that can be utilized in formation with L-Amino Acids into collagen and elastin.

Laurel Berry - A mild surfactant derived from milk fatty acids and laural leaf.

Laureth 14 - A mild detergent found to be non-toxic.

L-Castor Oil - A natural oil that improves the slide (texture) of the skin; it is emollient and improves the absorption of active ingredients.

Lecithin - A plant phosolipid derived from soybeans. It acts as a natural emulsifier in creams and lotions as well as a soothing and moisturizing agent on the skin.

L-Hyaluronate – A powerful moisturizer and connective tissue builder.

Linseed Extract - Also known as common flax. One of the main components of flax is lignan, which has plant estrogen as well as antioxidants. A skin conditioning agent.

L-Lactic Acid - Derived from yogurt, this AHA finesses protein-softening and cell turnover with its left-hand orientation.

L-Limonene - A natural fragrance that acts as an antiseptic.

L-Malic Acid - Derived from green apples, it increases cell turnover and increases skin softening.

L-Mandelic Acid - Derived from almonds, it is a powerful antioxidant.

L-Menthol - Used as a fragrance. It is also known for its refreshing, cooling, bactericidal and anti-inflammatory properties.

L-Retinol - See Vitamin A.

L-Salicylic Acid – An exfoliant and antibacterial.

L-Sodium PCA - A important chiral component of human plasma and skin; derived from molasses. It is a highly effective moisturizer.

L-Sodium-Hyaluronate - A chiral hyaluronic; from polymerized plant D-Glucuronic. Improves cellular ability to hold moisture; expands tissue allowing more cells to migrate into the additional spaces between collagen fibers. It helps skin 'plump' to correct wrinkles and fill depressed surface scars.

L-Tartaric Acid - Derived from grapes, it increases cell turnover and increases skin softening.

NO JUNK, EVER!

Lycopene - Derived from tomatoes, it is a powerful antioxidant.

Lysolecithin - A component of cell membranes.

Lysophosphatidic Acid - A phospholipid derivative that can act as a signaling molecule.

Macadamia Ternifolia Seed Oil - Moisturizes and protects the skin. Used as an emollient.

Malic Acid - An AHA found in berries, it promotes better circulation and healthier capillaries in skin.

Mango Extract - Aromatherapy.

Methosulfate - Used in shampoos and conditioners to moisturize and condition the hair to the roots. A very mild yet effective ingredient known for its de-tangling and hair thickening properties.

Methyglycine - A derivative of the amino acid glycine. It can be found in beans and liver. A mitochondrial enhancement.

Methylated Karate - Derived from shea butter, it is an emollient.

Milk Caprylic/Capric Triglycerides and Milk Caprylate/Caprates Triglycerides - Found in dairy butter and milk, they are fatty acids that are anti-fungal. They condition (soften) the glycoproteins of the skin; they moisturize the skin and improve the permeability barrier of the stratum corneum.

Mint - Used as a fragrance. Also has antioxidant properties.

N-Hydroxysuccinimide - Used in beauty products as an ester. Activates the elimination of blood originated pigments responsible for dark color and inflammation that causes under eye circles.

Niacinamide - A Vitamin B3 derivative.

Olive Oil - Contains a wide variety of valuable antioxidants that are not found in other oils. Rich in oleic and palmitic acids, along with squalene and sterols, this nutrient emollient helps to condition and nourish the skin.

Omega 3, 6, and 9 Oils - Fatty acids that are important for all systems of the body to function normally, including your skin, respiratory system, circulatory system, brain and organs.

Onion Extract - Proposed as a means of reducing scars.

Palm Glycerides - The fatty acid component of palm oil. Contains antioxidants and repairing ingredients. Used as an emollient.

Palmitoyl - Used in beauty products to suppress the production of excess interleukins, the chemical messengers which trigger the body's acute inflammatory response.

LONG-LASTING RESULTS

Palmitoyl Oligopeptide - Stimulates collagen production and encourages the production of intercellular matrix substances such as hyaluronic acids.

PEG-100 - An emollient, emulsifier and moisturizer. Helps water mix with oil and dirt on the skin and hair so that they can be rinsed away.

PEG-150 - A non-toxic emulsifier.

Pentapeptides - Bioactive five-chain amino acids that reduce inflammation, relax muscles, and thus reduce fine lines and wrinkles.

Phellodendron Amurense Bark Extract - Applied to the skin for psoriasis, to kill germs and to reduce redness and swelling. Its main biological activities are anti-microbial, anti-inflammatory and sebum regulation.

Phenyl Butyl Nitron - See spin trap.

Phosphatidylcholine - A component of all cell membranes.

Phospholipids - A type of lipid (fat) composed of glycerol, fatty acids and phosphate. Phospholipids are essential to the function of cell membranes. Used as a natural emulsifier or for encapsulation of sensitive benefit agents.

Pineapple Enzymes - Also known as papain, this is a powerful enzyme that exfoliates the skin.

Plant Cellulose - Used as a skin emollient and/or texture that helps foaming action.

Plant Polysaccharides - Sugar polymers from flax; enhances immune function of the skin; thickens the emulsion and are emollient to the skin.

Polyglucose - A glucose polymer and moisturizer.

Poly-Sorbate 80 - A non-toxic, non-comedogenic emulsifier.

Pomegranate - A powerful antioxidant.

Porphyra Umbilicalis (Red Algae) Extract - Skin conditioning agent.

Potassium Cetyl Phosphate - A surfactant and emulsifying agent used as a cleansing agent.

Potassium Sorbate - A wide spectrum anti-microbial, Potassium Sorbate is intended for inhibition of common microorganisms such as mold, yeast and bacteria.

Pyruvic Acid - A key intersection in several metabolic pathways. Pyruvic acid supplies energy to living cells through the citric acid cycle when oxygen is present.

Raspberry Extract - Aromatherapy.

Red Grape Seed - A powerful antioxidant.

INGREDIENTS WITH AN HONEST VIBE

Red Wine - A powerful antioxidant.

Rice Starch - Is soothing to the skin and has anti-inflammatory properties.

Rose Hip Seed Oil - Extracted from the seeds of a rose bush, it is unique among vegetable oils in containing retinol (Vitamin A) and is also high in Vitamin C. It is used to heal scarring and to diminish photo-aging.

Royal Gelee - Contains B-complex vitamins and trace minerals, along with some enzymes, antibacterial and antibiotic components.

Safflower Oil - Helps maintain elasticity and is especially beneficial to sensitive and dry skin.

Salicylic Acid - A BHA commonly found in aspirin, it clarifies and exfoliates the skin. It has anti-inflammatory properties.

Saponins - The non-sugar part of saponins have a direct antioxidant activity, which may result in other benefits such as reduced risk of cancer and heart disease.

Shatroles – A mushroom extract with immune system stimulants.

Shea Butter - From the Karite tree, it contains L-Phytosterols and D-Alpha Tocopherol (Vitamin E) to prevent lipid peroxidation in the epidermis. It is a natural decongestant.

Silicone - Important in wound healing, aging and maybe acne control. Silicones in Vibe Skincare - Silicone is a trace mineral naturally found in plants and animals and is required for physiological functions of the connective tissue. Silicone developed a bad reputation when breast implants leaked over time ;a liquid silicone, which was also contaminated with impurities) found its way into the body cavities and caused an autoimmune reaction, in those patients ;which caused serious medical problems. The silicones used in Vital Therapy Skin Care are large polymers and cannot pass into dermis of the skin but lays on top of the epidermis and regulates the flow of nutrients into the dermis.

The silicone layer is removed when cleansing- even if a molecule or two broke off the large polymer and did enter the dermis it would be used as a trace mineral as indicated above. There is not one single study showing that topical silicone polymers are toxic : all the bad reports are concerning the silicone in the breast implants . In 30 years of producing our skin care we have no reports of health problems associated with our products and in fact we have customers that have used our skin care for 30 years!!! And continue to do so)

Sodium Chloride - A crystalline solid, normally obtained from sea water or rock deposits. It is commonly used in surfactant systems to adjust viscosity or enhance preservation.

Sodium Hydroxide - A inorganic compound used to control the pH levels or serve as a buffering agent in cosmetics and personal care products.

Sodium Hydroxymethylglycinate - A naturally derived sugar-based surfactant. Due to its natural origin, this surfactant is very gentle and readily biodegradable.

TIME FOR YOUR NEW SKINCARE ROUTINE

Sodium Hydroxypropylsulfonate - Used as a cleanser and for skin conditioning. It is also an Emulsifier.

Sodium Lactate - Acts as a preservative and acidity regulator.

Sodium PCA - The sodium salt of Pyrrolidone Carboxylic Acid (PCA). It is an element of the skin's natural moisturizing factor. It is used to boost moisture content of the skin and provide intensive hydration, while improving elasticity and softness.

Soybean Oil - A natural UV ray blocker. Helps keep pollutants from entering skin pores. These properties help aid in the anti-aging process.

Sphingolipids - Complex lipids which contain sphingosine or a related base, a polar headgroup and a long saturated or monosaturated fatty acid connected to the backbone at its amino group. A skin conditioning agent.

Spin Trap - The most powerful antioxidant known, milligram per milligram. It does not destroy the free radical (rogue oxygen), rather it traps it and escorts it back to the respiratory cycle where it is utilized in tissue respiration. The world's only intelligent antioxidant.

Spinach - A dark leafy green plant packed with anti-oxidant powerhouses which work to slow down the aging process and protect skin cells from free radical damage. It also strengthens your skin tissue and has high anti-inflammatory properties.

Squalane - Derived from olives, it is similar in structure to human squalene and boosts the effectiveness of the left-handed L-Lactic Acid. It brings moisture to the epidermal lipid layer.

Strawberry and Melon Extract - Recommended for oily skin to help with sebum production and large pores. It is a great wound and burn healer as well as an astringent.

Succinic Acid - Produced from lichen, it has a mild surfactant action and benefits the succinic acid portion of the ATP producing krebs cycle.

Sugar Polymers - Silky polysaccharides taken from flax, they thicken the formulation and are themselves emollient to the skin.

Sweet Whey - A natural protein that is vitamin rich.

Syringa Vulgaris (Lilac) - Extract of the Lilac plant. A skin conditioning agent.

Tetrahydrocurcuminoids - A potent antioxidant.

Tetrapeptide-3, 7 - Cell signal that compounds directing cellular processes.

Tocopheryl Acetate - Also known as Vitamin E acetate. It is made by the esterification of Tocopherol with acetic acid. Tocopheryl acetate is used as an alternative to tocopherol itself because it is a more stable compound. It provides protection against the sun's ultraviolet rays.

Triglycerides - Natural fatty acids providing natural fatty moisturizers.

ORDER NOW AT VIBESKINCARE.COM

Vegetable Glycerin - Water soluble with emollient-like properties which soften and soothe the skin; it assists the outer epidermis in retaining moisture.

Vinca Minor - Enhances blood circulation.

Viola Tricolor - A soothing, bitter-sweet herb that possesses purifying actions. It contains rutin, a chemical known for its restorative actions on capillary membranes.

Vitamin A (L-Retinol) - The exact vitamin in an isomer utilized by the body for skin health, that is proper hydration, tone and color and acts as a very powerful antioxidant, just as it acts when essential fatty acids: omega-3 and omega-6. These fats' primary functions is to repair and create tissue in the body.

Wheat Germ - Extracted from the germ of the wheat kernel. This highly nutritive oil is rich in Vitamin E and omega-3 and 6 fatty acids. Helps to moisturize and relieve, dry irritated skin.

Xanthan Gum - A natural thickener.

Ylang-Ylang - A flower fragrance and phytonutrient. A mood elevator.

Zea Mays Oil - Corn oil that contains a high concentration of Vitamin E (excellent for the skin) and essential fatty acids. The fatty acids are what enable it to be an emulsifier.

Zeolite - Removes pollution by deeply cleansing, purifying and detoxifying your skin, unclogging and refining your pores and eliminating free radicals.

Zinc Oxide - A white mineral pigment with skin-protecting properties. the body produces it naturally.

Vitamin C - See ascorbic acid 20%.

Vitamin D3, E and F - Vitamin E is a fat-soluble antioxidant that stops the productions of reactive oxygen species formed when fat undergoes oxidation. Vitamin F is a term for two essential fatty acids: omega-3 and omega-6. These fats' primary function is to create and repair tissue in the body.

Wheat Germ - Extracted from the germ of the wheat kernel. This highly nutritive oil is rich in Vitamin E and omega-3 and 6 fatty acids. Helps to moisturize and relieve, dry irritated skin.

Xanthan Gum - A natural thickener.

Ylang-Ylang - A flower fragrance and phytonutrient. A mood elevator.

Zea Mays Oil - Corn oil that contains a high concentration of Vitamin E (excellent for the skin) and essential fatty acids. The fatty acids are what enable it to be an emulsifier.

Zeolite - Removes pollution by deeply cleansing, purifying and detoxifying your skin, unclogging and refining your pores and eliminating free radicals.

Zinc Oxide - A white mineral pigment with skin-protecting properties
