

SAFELIFT[®]

 Made in Sweden

MAST LIFTS FOR INDOOR USE

Mast lifts for indoor use

Safelift is a series of compact and flexible mast lifts for working safely indoors. Our lifts are characterised by low entry, short turning radius and low weight.

Safelift makes work at height efficient and safe, eliminating the need for ladders.

Our lifts are manufactured in Sweden and are CE marked in accordance with the high standards of safety in the EC and EN280 standards.

Areas of use

Safelift's products are developed to facilitate work in, for example, trade, installation, cleaning, property upkeep, warehouse and construction industry.

All our products are easy to use and maintain. All lifts are delivered assembled and ready to start. At the end of the working day, the lift is connected to a standard wall outlet and the built-in charger charges the batteries.

It hardly becomes any smoother than that.

- ✓ SMOOTH

- ✓ SMART

**A NEW GENERATION
OF MAST LIFTS FOR
INDOOR USE**

SAFELIFT®

A man in a dark blue long-sleeved shirt and black pants is operating a white and yellow scissor lift in a warehouse aisle. The lift is positioned between two rows of high industrial shelving units. The shelves are filled with cardboard boxes, many of which are wrapped in clear plastic. The man is standing on the yellow platform of the lift, looking towards the right side of the aisle. The floor is a light-colored concrete. In the background, there are more shelves and a red fire door.

OUR PRODUCTS

Safelift is produced in two different variants

Both models are manufactured with a working height of 4.95 m. Safelift's mast lifts are safe and easy to use and require minimal maintenance. The lifts are delivered ready for use on EU pallets. At the end of the working day, the lift is connected to a standard wall outlet and the built-in charger charges the batteries.

Visit www.safelift.se/en for further information.

PushAround

Manually moved to where it's needed.

MoveAround

Operated with a joystick from the basket.

**SAFE AND EFFICIENT
WORK AT HEIGHT**

ADVANTAGES OF SAFELIFT

Decoupling

The drive is disconnected with a simple grip and the lift is manually moved.

Operating instructions

A smart compartment makes the instruction manual always easily accessible.

Small turning radius

With a small turning radius of 1.2m, the lift easily takes the corner.

Anchorage point

When the harness is required.

USB socket

USB sockets are available for easy charging of tablet or mobile device.

Emergency stop

If the accident is close by.

SPECIFICATIONS

Size of the platform	0.53 x 0.76 m
Total load on the platform	Max 180 kg
Total number of people	Max 1
Working height	4.95 m
Height of platform	2.95 m
Lifting speed (2.95 m)	16 seconds
Weight	320 kg
Total width	0.76 m
Total height	1.64 m
Total length	1.2 m
MoveAround driving speed lowered	4 km/h
MoveAround driving speed raised	2 km/h
Power source	2 pcs 75 Ah (C20) 12 V batteries, maintenance-free
Line voltage	24 V
Battery charger	230 V, 50 Hz / 60 Hz
Lifting system	Single manoeuvred hydraulic cylinder
Wheels	Diameter 200 mm, polyurethane coating, leaves no marks
Parking brakes for PushAround	Manual foot brakes
Parking brakes for MoveAround	Automatic
Height of the platform's railing	1.1 m
Height of skirting board	0.15 m

Safelift's mast lifts are approved in accordance with SS-EN-280
