

CAPABILITY STATEMENT

Grey Engineering was founded as a small, local business to provide engineering services to support transportation-focused projects that create a better future for Louisiana communities. By promoting safe, context-sensitive facilities for non-motorized transportation, Grey aims to improve environments, advance equity, reduce climate impacts, and increase economic, educational, and health opportunities. With expertise in policy, strategic planning, and project implementation, Grey helps local governments achieve these goals and continues to advocate for equitable, non-motorized transportation across the state.

CORE COMPETENCIES

- **Concept Development**
- **Feasibility Studies**
- **Quality Assurance and Quality Control in Plan Development**
- **Federal Funding Pursuits**
- **Local Roads Management**
- **Complete Streets Policy Integration**

DIFFERENTIATORS

Grey Engineering excels in **translating our clients' visions and goals into successful projects!**

Our foundation is built on **effective communication, collaboration, and data-driven strategies**, ensuring transparency and efficiency in government initiatives.
