**Complex Environment. Creative Solutions.**

## Corporate Overview

Metric Environmental, LLC is a DBE/MBE environmental consulting firm headquartered in Indianapolis but dedicated to serving clients in Indiana, Ohio and Kentucky. The term metric is used to denote “a set standard” of measurement against which things are judged and is in keeping with our vision for our business as a practice that sets the standard to which environmental consulting can be measured.

Metric Environmental is committed to assisting our clients to find creative but defensible alternatives to resolving the complex environmental challenges of their businesses. By incorporating our best-in-class experience and technical expertise, we work to serve our clients with a thoughtful, deliberate, knowledgeable commitment to the highest quality of project delivery. Our clients therefore are confident that their interests are measured in every decision and recommendation that we make.

Our diverse staff collective combines for decades of high quality professional experience providing a full range of high caliber environmental services. These services include Environmental Site Assessment and Remediation; NEPA documentation (CE, EA, EIS); Industrial Hygiene Services (asbestos, lead, mold and indoor air quality); Natural Resource/Ecological Management, and Environmental Permitting. Our personnel include licensed professional engineers, licensed professional geologists, certified hazardous materials managers, LEED® Accredited Professionals, wetland scientists, ENV Sustainability Professionals, licensed asbestos inspectors and asbestos project designers.

As a company we adhere to our Mission “To ethically perform exemplary environmental consulting services which challenge our people, enhance our communities and inspire those who work with us.” ... For our clients this means we meet our commitments with integrity and a passion to get it right the first time.
