

100% Natural Deodorant Spray FAQs

Does it work? Yes – it works. And it's inexpensive. I will never go back to expensive, chemical laden, store-bought deodorants.

Does it sting/hurt?

It depends. Using the spray immediately after shaving does sting, but will only last for a second or two.

Does it smell?

Naturally scented with Lavender and Cedarwood Essential Oils resulting in an earthy unisex fragrance.

Will I stink?

No... remember question number 1 – it works. The alcohol kills the bacteria that cause the odor.

Will I still sweat?

Yes, *and you should*. Sweating is good for you; it is your body's way of releasing toxins. If you blocking your sweat pores by using antiperspirant you impede your body's ability to naturally release those toxins. Impeding this process can also affect the pH balance in your body leaving your body more prone to infection by harmful viruses and bacteria. Using deodorant spray allows your body to release the toxins unimpeded, yet still eliminates odors by killing the bacteria outside the body.

How long does it last?

Depending on how much you exert yourself, it may last all day, or you may need to reapply. In my experience I have NEVER had to apply it more than twice in one day – once in the morning... and once in the evening.

Will it stain or bleach my clothes?

No. There are no staining additives included.

Is it safe?

Using deodorant spray is just as safe as use as an antiseptic on cuts and scrapes. Unless someone has an allergy to alcohol, using it as a deodorant is safe for adults and young adults alike.

NOW GO TRY IT!
