

A Department of St. Bernards Medical Center

a look at the numbers

This year's Triple Swing is raising funds for a linear accelerator and cancer treatment technologies that will allow our patients to receive the necessary care and treatments for optimum recovery and remission.

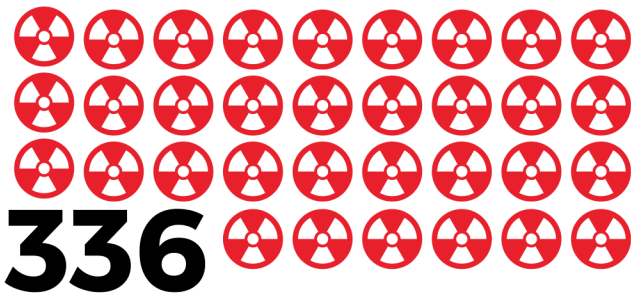

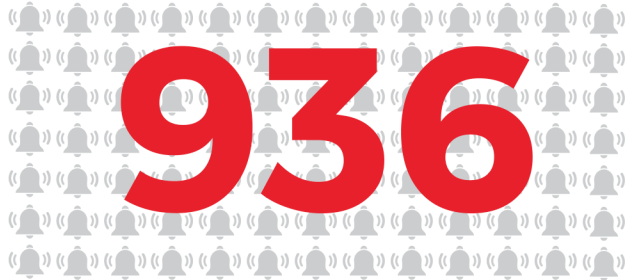

The purchase of an additional linear accelerator will allow us to deliver specialized treatments on two machines -- meaning no one has to wait or delay treatments during scheduled and unscheduled room downtime, etc.

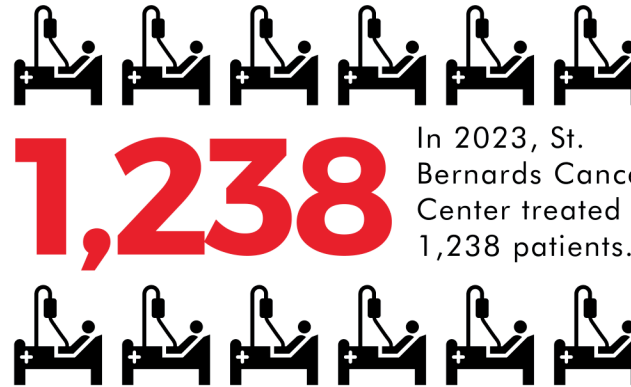

St. Bernards has three board certified Medical Oncologists and two Radiation Oncologists on staff.

During 2023, there were 936 patients that rang the bell/gong upon graduation from chemo and radiation treatment programs.

Patients received radiation therapy. Treatments are given daily for a span of four to six weeks for maximum benefit.

HOW YOU CAN MAKE A *difference*

- \$10** Provides a patient meal
- \$25** Provides a patient hat or head wrap
- \$50** Provides a patient gas card
- \$100** Provides one night of patient lodging
- \$260** Provides one cooling cap treatment
- \$500** Provides necessary tooth extraction prior to treatment
